Top Sustainable Construction Materials to Build a Better Future

[Article was originally posted on Autodesk Construction Cloud Blog. <https://construction.autodesk.com>]

By Grace Ellis,

One of the things that often comes up when discussing the future of construction is sustainability. The building sector is one of the largest contributors to greenhouse gas emissions (GHG), with occupied buildings being responsible for nearly 40% of global GHG emissions, according to Architecture2030.

Sourcing and manufacturing building materials also contribute a great deal to climate change. According to a report by the United Nations Environment Programme:

Some 40-50% of total flow of raw materials in the global economy is used in the manufacturing of building products and components, adding significant amounts and energy and greenhouse gas emissions to the life cycle impact of buildings. In addition, scarcity concerns over mineral resources and especially water provide for an additional urgency to extend the narrow focus on energy use in buildings and the associated greenhouse gas emissions.

The construction industry clearly has to do better to protect the environment. This is, after all,

the only planet we can live in (that we know of), so promoting sustainability will serve us — and future generations.

The good news? Construction pros are already taking steps in the right direction. Builders are now exploring sustainable construction materials to replace things like concrete, which is a major source of emissions.

This post rounds up some notable examples of sustainable construction materials. Have a look and see if you can use them in your projects.

1. Bendable Concrete

Also known as Engineered Cementitious Composite (ECC), bendable concrete is a type of concrete that can withstand bending. Unlike conventional concrete, which is brittle and can easily crack or break, bendable concrete is five hundred times more resistant to cracking and is more effective at absorbing shock.

This is because ECC contains small, polymer-derived fibers that increase the material's ductility. While bendable concrete is made up of the same ingredients as its traditional counterpart, it's these fibers that make ECC more flexible and durable.

5 Organizations Empowering Marginalized Communities In California

[Article was originally posted on wiki.ezvid.com]

California is home to a very diverse population, with a significant number of residents who are underrepresented by our present forms of social organization. This list, presented in no particular order, highlights some

institutions working to improve the lives of marginalized populations in the Golden State.

Kicking off the list at #1 is **East Bay Housing Organizations, or EBHO**. Its mission is to ensure that all people in Alameda and Contra Costa counties have a safe, healthy, and affordable place to call home. The group's Resident

Organizing Program seeks to empower tenants to become affordable housing advocates. This committee runs leadership trainings and engages residents in local policy and neighborhood decisions.

EBHO's Faith and Justice Committee develops and maintains collaborative relationships with faith communities, leaders, and inter-religious organizations. The committee's goal is to advance housing rights through the engagement of these groups in policy advocacy campaigns and participation in the movement for housing justice.

Taking the #2 spot is the **Chinese Progressive Association**. This nonprofit works to educate, organize, and empower the low-income and working-class immigrant Chinese community in San Francisco to build collective strength with other oppressed communities to demand better

living and working conditions and justice for all people.

"Organizing has always been key to liberation efforts for several oppressed groups, whether it be through planning solidarity marches, mutual aid efforts, or even approaching government leaders. There are several groups doing this work in Asian-American communities including the AAFC, Stop AAPI Hate, the APEN, the Chinese Progressive Association, Womankind, Filipino Cultural Center, the Southeast Asian Community Alliance, and others. Lai Wa Wu of the Chinese Progressive Association said that participating in such groups is a great way to be an active ally to Asian American communities."

Calling All Contractors: City of San José to Launch Unique Construction Academy in Spring 2021

“Building Our City With Our Community”

Vice Mayor Chappie Jones is encouraging contractors across Santa Clara County to participate in the San José Public Works Department’s upcoming Construction Academy’s Construction Contracting Seminar Series (Seminar Series) beginning in the Spring. It is a unique program available in only a handful of cities across the nation. It was initiated in 2019 as an effort to prioritize small and local business and provide them with opportunities to financially participate in construction projects. This could lead to significant rewards considering the City’s five-year Capital Improvement Program is valued at over \$4 billion.

Vice Mayor Chappie Jones, Chair of the City’s Small Business Advisory Task Force, shared “Our measurement of success is when we have a

strong and vibrant small business community in San José that is winning contracts and creating wealth and employment in our communities.” By completing the Seminar Series, participants benefit by learning how to navigate and manage a public works construction contract from bidding to project completion.

Matt Cano, Director of Public Works for the City of San José noted, “As stewards over a multi-billion dollar capital improvement program, we have a responsibility to not only construct quality projects, but also to engage our community in the construction of these projects, thus increasing opportunities for local residents and businesses.”

The Seminar Series will occur weekly for six weeks from May 5 to June 16 from 4:30 to 7:00 p.m. Attendance will help contractors streamline

their processes, avoid pitfalls, and place them in the best position to bid on and complete a public works project. Registration is available at www.sanjoseca.gov/constructionacademy.

In addition, two free virtual Opportunity Awareness events are scheduled for April 21, 2021 from 9:00 to 10:00 a.m. (Session A) and 4:00 to 5:00 p.m. (Session B). Attendance is optional and participants are encouraged to register for one session. Both sessions will contain the same agenda and programmatic information. These events will allow contractors to learn about new public works bid solicitations and they will offer networking opportunities with City staff, prime, and subcontractors. Registration is available at www.sanjoseca.gov/constructionacademy.

The program was initiated in coordination with various San José City departments, the Silicon

Valley Small Business Development Center, local chambers of commerce, and the City’s Small Business Advisory Task Force. Three cycles of the Construction Academy have been successfully completed thus far. As the City continues to work to increase small and local business participation, Vice Mayor Chappie Jones remains optimistic and shared, “I am encouraged by the progress the City of San José has made. With the advice and guidance from the San José Small Business Advisory Task Force, City staff has been able to design programs that meet the needs of our City’s small businesses. I look forward to continuing to expand opportunities for small business to work with the City.”

U.S. EPA announces nearly \$200,000 to Small Northern California Businesses for Developing Environmental Technologies

The U.S. Environmental Protection Agency (EPA) announced \$2,499,229 in awards to 24 U.S. small businesses to develop innovative technologies that help support EPA’s mission of protecting human health and the environment. The Small Business Innovation Research (SBIR) program is a competitive awards-based program, which funds technological research and development and revitalizes innovation. Two of the SBIR program awardees, Nikira Labs and Verdant Structural Engineers (VSE), are based in northern California. Each company has been awarded nearly \$100,000.

“Small businesses are confronting important environmental challenges head on with creativity and ingenuity,” said EPA Acting Regional Administrator for the Pacific Southwest, Deborah Jordan. “I congratulate the small businesses from California and Hawaii who are receiving EPA funding this week. EPA is proud to support their efforts to develop innovative environmental solutions.”

EPA is one of 11 federal agencies that participate in the SBIR program established by the Small Business Innovation Development Act of 1982. The small businesses in this week’s announcement are receiving Phase I awards of up to \$100,000 for six months for “proof of concept” of their proposed technology. Companies that successfully complete Phase I can then submit a proposal for a Phase II award of up to \$400,000 to further develop and commercialize the technology.

Nikira Labs is in Mountain View, California. The company is proposing to develop a sensitive, fast, and highly-selective ethylene oxide analyzer suitable for field-deployment. This analyzer technology has potential for detecting ethylene oxide emissions to reduce health risks in both in the medical sterilization and petrochemical markets.

“This EPA SBIR award will help Nikira Labs develop novel pollutant monitors, which is critical in supporting such high-risk, high-reward technologies that address tomorrow’s health and

safety needs,” said Rupal Gupta, Nikira Labs’ CEO and President.

VSE is in Berkeley, California. Their projects include carbon-storing (sequestering) straw-based structural insulated panels (S-SIP) for residential building applications in the U.S. These panels will reduce carbon emissions, toxicity, and end-of-life waste associated with building materials. VSE has extensive experience with environmentally sensitive building materials and methods such as straw bale, rammed earth, cob, adobe, and bamboo.

“Using less to produce our existing building materials has obvious limits in its potential, as an approach to reduce embodied carbon emissions,” said Anthony Dente, PE, LEED AP, VSE. “Storing carbon in our buildings with bio-based insulation systems like straw, is a clear path to a low carbon or negative carbon building future. Verdant Structural Engineers are grateful to the EPA and SBIR grant program for the opportunity to use our knowledge and experience with cut-

ting edge straw building engineering and science to develop a reliable, repeatable, and affordable straw panel system.”

EPA runs a yearly, two-phase process for the SBIR awards. Companies who have received the Phase I award can submit a proposal for a Phase II award of \$400,000 to further develop and commercialize the technology. Through this phased approach, EPA can evaluate whether the research idea is feasible; if the firm’s research is high-quality; and if sufficient technical and commercial progress has been made to justify a larger Phase II effort.

To learn more about EPA’s SBIR Phase I winners, please visit: https://cfpub.epa.gov/ncer_abstracts/index.cfm/fuseaction/recipients.display/rfa_id/679/records_per_page/ALL

Small-Business Loan vs. Business Credit Card: How to Choose

[Article was originally posted on www.nerdwallet.com]

By Steve Nicaastro,

Small-business loans vs. business credit cards: Which is best for me?

Small-business loans are a good choice if you're looking to refinance an existing debt, buy real estate or equipment, or make any type of large investment, as these loans provide a larger sum of money. They typically are repaid monthly at a fixed interest rate, making them a good option for financing large investments over a long time period.

These loans, however, are tougher to get approved for than business credit cards, may require collateral and it can take a long time to get funded, depending on the lender. They're best for more established businesses because you'll likely need strong revenue and business finances to qualify.

Business credit cards are generally better suited to financing ongoing expenses and working capital. A credit line offers flexibility, and you pay interest only on what you borrow, up to your credit limit.

Business credit cards can carry many advantages, such as rewards for spending, 0% introductory annual percentage rates, sign-up bonuses and the ability to build business credit. However, these revolving lines of credit may come with high interest costs and other fees.

Small-business loans: Pros and cons

Pros

Borrowing amounts are higher: Small-business loans guaranteed by the U.S. Small Business Administration have a maximum size of \$5 million, while online lenders provide up to \$2 million. This makes small-business loans better for a major expansion, such as purchasing or renovating real estate, buying equipment, financing inventory or refinancing debt.

Costs are lower: Traditional banks typically offer the lowest interest rates for businesses with strong finances. For instance, SBA loans — backed by the Small Business Administration but issued by lenders such as banks — are likely to carry lower interest rates than business credit cards. SBA loan rates are set using the current prime rate. An SBA loan of more than \$50,000 and paid off in under seven years, for example, carries an interest rate of 6.5%, while a loan of \$25,000 or less that's paid off in over seven years carries a rate of 9%.

Online lenders may also charge lower rates than business credit cards, with APRs starting at 6% for term loans and 8% for lines of credit — typically if you have strong personal credit and business finances.

Long repayment terms are available: Small-business loan repayment terms vary by lender but can stretch as long as 25 years for some SBA loans. This results in much more affordable monthly payments for businesses looking to

make a major investment in their business.

Let's say a business is approved for a \$30,000 loan. If the loan has a five-year repayment term at 10% APR, the business owner must make 60 monthly payments of \$637.

Check out NerdWallet's business loan calculator to see the cost and payments for business loans.

Cons

You may need collateral: Some small-business loans require collateral — assets such as equipment, inventory or real estate that the lender can seize if you fail to make payments. Collateral and personal guarantees are required as security on all SBA loans.

Although a default could result in forfeiting the asset, putting up collateral is likely to get you a lower interest rate on the loan than what you'd receive with a business credit card or an unsecured online loan.

An Equal Opportunity Employer & Comply with the Standard Federal Equal Employment Specifications

All Qualified AND/OR Certified DBE/DVBE/MBE/WBE Subcontractors and Material/Equipment Suppliers are requested to forward quotes for the above-referenced project.

Caliagua Inc. is seeking qualified subcontractors and suppliers for the following: Demolition, Paving, Striping, Concrete, LPG Fuel and Vaporizer System, FRP Hatches, HVAC, Masonry, Ball Valves and Actuators, Pipe and Fittings.

Project Documents:

https://dpw.lacounty.gov/Contracts/cons/ProjectDetailAdv.aspx?project_id=FCC0001260

Caliagua Inc. is signatory to the Operating Engineers, Laborers, Cement Masons and Carpenters Unions. Subcontractors must possess a current contractor's license, DIR Registration, insurance and workers compensation coverage per project requirements. Subcontractors and Suppliers are expected to bid per plans and specifications. Quotes need to be submitted at a reasonable time prior to the bid date. This project has a 25% CBE (Community Business Enterprise) goal, participation is highly encouraged.

FLATIRON

Project: Contract No. 07-293604 – Construct auxiliary lane and widen on and off ramps – Construction on State Highway in Los Angeles County in Torrance from Western Avenue Undercrossing to 182nd Street.

Owner: Department of Transportation (CALTRANS)

Bid Due Date: April 22, 2021

Federal-Aid Project ACIM-405-2(999)E

Request for quotes from Certified DBE Subcontractors and Suppliers for the following, but not limited to scopes of work: Aggregate Supply, Asphalt Dike, Asphalt Paving, Bridge Bearing Pad Supply, Bridge Deck Drainage System, Bridge Demo, CIDH Pile, Clean and Paint Steel, Clear and Grub, Cold Plane AC, Concrete Barrier, Concrete Supply, Construction Area Signs, Demo, Electrical, Erosion Control, Fencing, Formliner Supply, Geosynthetic Supply, Ground Anchor, Guardrail, Isolation Casing Supply, Joint Seal Assembly Supply, Landscape and Irrigation, Masonry (Soundwall), Minor Concrete, Misc. Iron and Steel Supply, Overhead Signs, PCC Material Supply, Pipe Supply, QC Testing, Railing, Ready Mix Concrete Supply, Reinforcing Steel, Roadside Signs, Rock Slope Protection, Saw and Seal PCC, Soldier Piles, Soldier Piles Supplier, Street Sweeping, Striping.

PLEASE SUBMIT QUOTES BY EMAIL TO SOCALBIDS@FLATIRONCORP.COM OR FAX TO (760) 471-4860

Plans and specifications are available, at no cost, from Caltrans website: <http://ppmoe.dot.ca.gov/des/oe/weekly-ads/specs-ntb.php?c=07-293604> (Registration Required). Additionally, plans and specifications are available at Flatiron's San Diego, CA and Chino Hills, CA offices. Please call to make an appointment to view the documents.

This project has a 14% DBE Goal. In addition to request for participation from DBE subcontractors and suppliers, Flatiron requests non-DBE subcontractors to provide lower-tier DBE participation. Bidders are required to indicate lower-tier DBE participation information to be evaluated as part of their quote.

Quotes must be valid for same duration as specified by Owner for contract award. Quotes will be broken down into comparable packages as reasonably necessary to facilitate participation. Flatiron intends to work cooperatively with all firms for scopes of work you are licensed and qualified to perform. Assistance in obtaining bonding, lines of credit, insurance, equipment, supplies and materials is available upon request. Additionally, please contact us if you require technical assistance.

Subcontractors are required to possess and maintain a current contractor's license and must also be registered with the Department of Industrial Relations (DIR) as required by Public Contract Code Section 1725.5. Subcontractors will be required to execute Flatiron's Standard Subcontract Terms and Conditions and insurance requirements. A copy of the document in electronic format is available upon request.

Bond Requirements: Notwithstanding any contrary language in a bid to Flatiron or any prior course of dealing between Flatiron and a bidder, and unless waived in writing by Flatiron, Flatiron reserves the right to require each bidder to provide payment and performance bonds assuring bidder's obligations to Flatiron in the amount of 100 percent of the bid to Flatiron. Flatiron will reimburse the bond premium at actual cost not to exceed 3%. The surety on the bonds must be a California admitted surety.

REVISED Due Date: May 04, 2021 – 11:00 AM
Community Business Enterprises (CBE) – 25%

Minority/Women/Disadvantaged/Disable Veteran Business Enterprises

Skanska USA Civil West California District Inc. is interested in soliciting in Good Faith all subcontractors as well as certified CBE subcontractors related to the scopes of work below for the

PACOIMA SPREADING GROUNDS BASIN ENHANCEMENT PROJECT
PROJECT ID NO. FCC0001207
IN THE CITY OF LOS ANGELES

The contract documents for this project may be downloaded free of charge by visiting the Los Angeles County Public Works Business Opportunities website:
<http://pw.lacounty.gov/general/contracts/opportunities>
or viewed at <https://app.buildingconnected.com/public/59b1c0096ab4570007e09292>

Requested scopes include, but are not limited to the following and should be based on Contract and its amendments:

SWPPP, Temporary Erosion Control, Fencing & Handrail, Temporary Fencing, Trucking & Hauling, Tire Wash System, Water Truck, Drainage, Utilities, Aggregate Base, Asphalt Paving, Traffic Control, Street Sweeping, Temporary Sound Wall, Sound Monitoring, Structural Concrete, Demolition, Reinforcing Steel, Jack & Boring, Site Electrical & Instrumentation, Mechanical Gate (Weir Intake), Miscellaneous Metals, Steel Catwalk Structure, Rip Rap, Bollards, Pipe Material Supply, Concrete Box Culverts, Excavation, Structure Excavation, Jobs Coordinator, Temporary Hydroseeding

Requirements: Skanska is an Equal Opportunity Employer and is requesting quotes from all qualified subcontractors and suppliers. Skanska will assist qualified subcontractors, vendors, & suppliers in obtaining bonding, lines of credit, insurance, necessary equipment, materials and/or supplies. If you are a CBE Company, please provide your certification letter with your proposal. If you are a non-DBE, please indicate all lower-tier participation on your quotation as it will be evaluated with your price. In order to assist DBE subcontractors and suppliers, we will divide total requirements into smaller packages, tasks or quantities & establish delivery & construction schedules which will permit maximum participation when feasible. Subcontracting Requirements: Skanska's insurance requirements are Commercial General Liability (GL): \$1M ea. occ., \$1M personal injury, \$2M products & completed operations agg. & general agg.; \$1M Auto Liability; \$5M Excess/Umbrella and \$1M Workers Comp. Endorsements and waivers required are the Additional Insured End., Primary Wording End., & a Waiver of Subrogation (GL & WC). Other insurance requirements may be necessary per scope or RFP requirement. Subcontractors may be required to furnish performance & payment bonds in the full amount of their subcontract by an admitted surety & subject to approval by Skanska. Quotations must be valid for the same duration as specified by the Owner for contract award. Conditions or exceptions in Subcontractor's quote are expressly rejected unless accepted in writing. Skanska is signatory to the Operating Engineers, Laborers, Cement Masons, & Carpenters Unions. Subcontractors must provide weekly, one original and one copy of all certified payrolls, including non-performance and fringe benefit statements if required by law or by the Prime Contract. Please note that all Contractors and Subcontractors must register with The DIR (Department of Industrial Relations) in order to bid on public works projects. Include CSLB License Number and DIR Number on All Quotes Submitted.

Requesting Project Assistance from BART Market Area

DBE/MBE/WBE business enterprises:

DMZ Builders is bidding the following project as a Prime Contractor and is seeking BART Market Area DBE/MBE/WBE subcontractors and vendors to assist with the project by submitting quotes for their trades or products. BART Market Area DBE/MBE/WBE business enterprises are those firms that are either located in the nine Bay Area counties (BART Market Area) or have done business or have attempted to do business in the BART Market Area within the past 2 years.

Project: Train Control System Modernization Program Enabling Works
Contract: 49GH-130

Owner: San Francisco Bay Area Rapid Transit District (BART)
Revised Bid Date: May 4, 2021 @ 2:00pm

Services Needed:

Construction Survey, Construction Area Signs, Traffic Control, SWPPP, Temporary Erosion Control, Site Security, Janitorial, Trucking, Earthwork, Clearing & Grubbing, Site-work, Drainage, Underground Utilities, Fencing, Concrete Coring, Concrete Foundations, Reinforcing, AC Paving, Low Voltage Electrical, Train Control, Quality Control, Testing. Plans and specifications are available to interested firms via BART's on-line procurement portal or can be viewed at DMZ Builders Concord, CA office by contacting the DMZ office to make an appointment.

DMZ Builders is a union contractor. Subcontractors must provide their active CSLB license number and DIR registration number with their quote. Subcontractors will be required to execute DMZ Builders standard subcontract terms and conditions or purchase order agreement (for suppliers), both available for review upon request, and meet insurance requirements, including waiver of subrogation. Subcontractors, at DMZ's discretion, may be required to provide payment and performance bonds for 100% of the subcontract value. DMZ will reimburse bond premium at actual cost, not to exceed 2.0%. Project requires paying prevailing wages and submitting certified payrolls. All subcontractors must sign BART's project stabilization agreement prior to participating in the project.

For assistance in obtaining bonding, lines of credit, insurance, equipment, supplies and materials, technical assistance, or any other coordination required for the project, please contact Richard Zito by phone at (925) 826-5387, by fax at (925) 826-5766, or by e-mail at estimating@dmzbuilders.com. DMZ will work with interested subcontractors and suppliers to identify opportunities to divide the work into economically feasible packages and intends to cooperate with all qualified firms seeking work on the project.

Greg Souder (510-809-3430 gsouder@ocjones.com) is the estimator on this project and he is available to provide assistance or answer questions regarding the project scope of work including bid requirements, break out of bid items, plan or spec interpretation, bonding or insurance requirements, and other bid assistance. Plans and specs are available to review at our Berkeley office, or can be sent out via Building Connected. Plans are also available under the Advertisements tab at the Caltrans website at: <http://ppmoe.dot.ca.gov/des/oe/contract-awards-services.html>. PDF format quotes should be emailed to the estimator or faxed to 510-526-0990 prior to 12:00 PM on the date of the bid. Quotes from DBE Subcontractors, Suppliers and Truckers are highly encouraged. OCJ is willing to breakout any portion of work to encourage DBE participation. Subcontractors must possess a current DIR, Contractors License, and insurance and workers compensation coverage including waiver of subrogation. OCJ may require Performance and Payment bonds on subcontracts. OCJ will pay the bond premium up to 2% of the contract value. Please contact OCJ for any assistance required by your firm in obtaining bonding or insurance. The US Small Business Administration may also assist you in obtaining bonding - please see the following site for information: <http://www.sba.gov/content/contractors>. Visit the California Access to Capital Program Financing Solutions website for additional resources for your small business - http://www.calbizfinance.org/cal_cert_biz_program.html. OCJ is available to help obtain necessary equipment, material and/or supplies. All subcontractors are required to execute OC Jones' standard subcontract agreement, comply with all insurance requirements, and name OCJ as additional insured. Copies of our agreement and insurance requirements are available upon request. OCJ is a Union contractor, and we are signatory to the Operating Engineers, Laborers, Teamsters, and Carpenters. OCJ is an Equal Opportunity Employer.

W.A. Rasic Construction Company requesting bids from qualified and certified Community Business Enterprise (CBE) firms, including Minority (MBE) and Disadvantaged Business Enterprise (DBE), Women Business Enterprise (WBE) and Disabled Veteran Business Enterprise (DVBE) Subcontractors and material Vendors / Suppliers for the following project:

Pacoima Spreading Grounds Basin Enhancement Project

Project ID: FCC0001207

Owner: Los Angeles County Public Works

Bid Date: April 20, 2021 at 11:00 AM

Estimated Bid Value: \$66-99M

W.A. Rasic Construction is requesting quotes from certified firms above for subcontractors and suppliers for the following, but not limited to, scopes of work:

Small-Business Loan vs. Business Credit Card: How to Choose

Continued from page 3

Qualifying is harder: Getting approved for a small-business loan likely is tougher than for a business credit card. In September 2017, big banks — those with \$10 billion or more in assets — approved 24.8% of small-business loan applications, while alternative lenders approved 57%, according to Biz2Credit.

To qualify for a traditional bank loan, you'll need good personal or business credit and collateral. For larger loans, you may need a down payment. Traditional banks typically require a lot of

documentation, including personal and business financial statements, profit and loss statements, income tax returns and a detailed business plan to prove you can repay the loan.

Many alternative business lenders also require a solid track record of business finances and an average to good personal credit score.

Time to funding is longer: It can take a few weeks or longer to get funding, depending on the lender, while you can get a business credit card within a week after approval.

Bank loans may require you to apply in person and fill out paperwork. You can complete applications at online lenders entirely online and get funded as fast as 24 hours to a few days. However, rates may be higher than at banks.

Business credit cards: Pros and cons

Pros

You might get rewards or cash back: Just like regular credit cards, business credit cards may offer you rewards or cash back on purchases.

However, the rewards may be for business ex-

penses. For example, some cards offer cash back for spending on internet and cable, phone service, gas and office supplies. If a card offers 3% cash back on office supplies and you spend \$1,000 per month for your business, that's \$30 back in the form of a statement credit or in your bank account.

Redmond, King County, Washington Sub-Bid Request Ad

SKANSKA

Subcontractor/Supplier Bids/Proposals Requested
Owner: Washington State Department of Transportation - WSDOT
Job Number: 20A809
Due Date: April 28, 2021 @ 10:00 am
MSVWBE Participation
MBE 10%/SBE 5%/DVBE 5%/WBE 6%

Skanska USA Civil West California District Inc. is interested in soliciting in Good Faith all subcontractors as well as certified Minority, Small, Veterans and Women's Business Enterprise (M/S/V/WBE) firms for this project.

**SR 520 – 148th Avenue NE Interchange Overlake Access Ramp
In Redmond, King County, WA**

Plans and Specifications are available through registering on our plan site at:
<https://app.buildingconnected.com/projects/605dff4c5eabf900bc4d30c1/bid-packages>

Requested scopes include, but are not limited to the following and should be based on Contract and its amendments:

Aggregate base supply, Asphalt material supply, Asphalt paving, Boring, Bridge drain supply, Clearing, Concrete accessory supply, Concrete barrier, Concrete paving, Concrete pumping, Crack and seat, Demolition, Drainage pipe, Drilled shafts, Electrical/lighting/its, Equipment rentals, Erosion control, Erosion control supply, Falsework, Falsework materials, Fencing, Fire suppression system, Form materials, Geotextile supply, Ground monitoring, Guardrail, Heavy haul, Janitorial, Landscaping, Milling, Miscellaneous concrete, Miscellaneous metals, Miscellaneous Milling, Miscellaneous concrete, Miscellaneous metals, Miscellaneous metals supply, MSE wall supply, MSE walls, Painting & staining, Piling, Pipe cleaning, Pipe material supply, Precast girder erection, Precast girder supply, Precast minor structures, Quality control, Reinforcing steel, Roadway signs, Sawcut, Security guard, Shoring, Signage, Soil nailing, Steel girder erection, Steel girder supply, Striping, Survey, Sweeping, Traffic control, Traffic control supply, Trucking, Underground utilities, Utility adjustments, Vacuum excavating, Welding.

Subcontracting Requirements: Skanska is an Equal Opportunity Employer and is requesting quotes from all qualified subcontractors and suppliers. All interested subcontractors, please indicate all lower tier M/S/V/WBE participation offered on your quotation as it will be evaluated with your price. Skanska will assist qualified subcontractors, vendors, & suppliers in obtaining bonding, lines of credit, insurance, necessary equipment, materials and/or supplies. If you are a M/S/V/WBE firm, please provide your certification letter with your proposal. Skanska will also review breaking out scope packages and adjusting schedules to help permit maximum participation when feasible. **Skanska's insurance requirements** are Commercial General Liability (GL): \$1M ea. occ., \$1M personal injury, \$2M products & completed operations agg. & general agg.; \$1M Auto Liability; \$5M Excess/Umbrella and \$1M Workers Comp. Endorsements and waivers required are the Additional Insured End., Primary Wording End., & a Waiver of Subrogation (GL & WC). Other insurance requirements may be necessary per scope or RFP requirement. Subcontractors may be required to furnish performance & payment bonds in the full amount of their subcontract by an admitted surety & subject to approval by Skanska. Quotations must be valid for the same duration as specified by the Owner for contract award. Conditions or exceptions in Subcontractor's quote are expressly rejected unless accepted in writing. Skanska is signatory to the Operating Engineers, Laborers, Cement Masons, & Carpenters Unions. Subcontractors must provide weekly, one original and one copy of all certified payrolls, including non-performance 2nd fringe benefit statements if required by law or by the Prime Contract.

From art to infrastructure, the New Deal shaped Seattle's future

[Article was originally posted on
<https://crosscut.com>]

By Knute Berger,

Every day is infrastructure week at our place.

In front of our apartment they're building the new State Route 520 bridge. That's right, it's not done yet. Enormous cranes, pile drivers, the removal of massive slabs of concrete, work boats, vehicles that clank like tanks in the night, workers in hard hats shouting to one another. They are working 24/6, with Sundays off. There is no real limit on the amount of noise they can make, day or night.

As I watch, I remember the opening of the old Evergreen Point Bridge in 1963, the last remnants of which are being hauled away now. We called it "the new bridge" for years. It's an odd feeling to outlast "modern infrastructure," something you remember being built. I felt the same about the Kingdome, the massive but ultimately ephemeral sports stadium located in the industrial district. It opened in 1976 and was torn down in 2000, before its bonds were paid off.

The old 520 bridge was outdated for seismic reasons. The new "new" bridge is more robust, and caters to changing needs. There's room now for bikes, pedestrians and, someday perhaps, even light rail. If earthquake faults played a role in

the new design, so too do the work habits of a changing region. Companies such as Microsoft wanted more capacity for cars and transit. Workers used to commute from the Eastside to Seattle for work, but back in the 1990s, the tide changed, with many tech workers living in the city and commuting to Redmond. The bridge was expanded to serve a growing "edge city."

This late 1930s apartment complex I live in is the product of an older infrastructure push. Unlike the 1963 bridge, it is still going strong. Hundreds of units of what we would call today "workforce housing" were put up in the late 1930s with the help of New Deal financing. Press reports when the complex opened touted it as the largest multifamily development west of the Mississippi, the Great Depression having put a major kibosh on growth. Times were tough in Seattle, too. Between 1930 and 1940, the city gained only 2,700 residents, and a series of Hoovervilles for homeless and unemployed people sprang up across the city. By the mid-1930s, Seattle's unemployment rate hit 27%. Still, as part of the recovery, Seattle prepared for the future by building public housing and expanding options for in-city working families.

Coming out of the 1918 flu pandemic, Seattle was already stagnating economically during the previous decade. The combination of increased

racism and division, with the rise of the Ku Klux Klan and anti-immigrant laws in the 1920s, plus Wall Street recklessness resulting in the 1929 crash, put the U.S. into a major hole. Franklin D. Roosevelt's New Deal programs were a massive effort to put the country on a new footing. It wasn't perfect. There was waste, pork and racism mixed in with some of its policies. Many Black workers were left out of the initial design of Social Security, which exempted domestic workers as a way to earn votes from Northern and Southern politicians who did not want Blacks and whites treated equally. But the New Deal is still held up as an impressive model for sweeping change and recovery in a time of need.

In addition to providing public assistance to the unemployed, the New Deal delved into multiple levels of society. From Black theater troupes to mural art in almost every post office, it bolstered the arts and artists. It transformed the energy industry (and hurt the salmon) with massive Columbia River dam projects like Grand Coulee and Bonneville, which laid the groundwork for cheap power, light, irrigation and farming. The Civilian Conservation Corps improved parks; fought wildfires; built lodges, campgrounds and trails; planted trees; and tended forest lands.

New Deal work impacted infrastructure up and down the state. According to the University of

Washington's website on the Depression, the Works Progress — later Projects — Administration funded work for "28,000 miles of road, 1,000 bridges, 26 libraries, 193 parks, 380 miles of sewers, 15,500 traffic signs, 90 stadiums and 760 miles of water mains in Washington." One of those bridges was the innovative first Lake Washington Floating Bridge, connecting Seattle to the Eastside. The feds paid 40% of the bridge's cost. It would be hard to argue that these investments and this building spree weren't transformative.

You can hardly go anywhere in Seattle today without feeling the New Deal's legacy: The Naval Reserve Armory on Lake Union, now the Museum of History and Industry; the reconstruction of the Ballard Bridge; neighborhood playfields from Georgetown to Camp Long to Cowen Park; replacement of the Pioneer Square "totem" pole; the Washington Park Arboretum; improvements to the University to Washington campus; and Woodland Park Zoo are just a sampling of contributions. Thousands of workers were employed in the process of physical and social improvement.

Top Sustainable Construction Materials to Build a Better Future

■ Continued from page 1

Bendable concrete is also more sustainable. It can be infused with carbon dioxide, which strengthens the concrete while using less cement and lowering carbon emissions.

ECC's ductility also decreases the financial and environmental costs of buildings. Whereas traditional concrete breaks easily and typically require repairs, bendable concrete can withstand higher amounts of pressure. This means it doesn't have to be maintained or repaired as much, so builders spend less time, resources, and carbon output when using it.

Bendable concrete has been around for decades and has proven to be durable and effective. For instance, the ECC link slab that was used to replace a conventional expansion joint on a Michigan bridge deck has lasted over 10 years without maintenance or repairs.

2. Mass Timber

Photo courtesy of Kattera

Mass timber products are created by mechanically bonding various types of softwood to form large prefabricated wood components. It can come in several forms, including cross-laminated timber (CLT), laminated strand lumber (LSL), laminated veneer lumber (LVL), nail-laminated timber (NLT), and glue-laminated timber (GLT).

Mass timber has been gaining traction in the United States, and builders are increasingly using it for things like roofs, floors, beams, columns, and more.

On the sustainability side, mass timber serves as a viable substitute for traditional construction materials like steel and concrete, which have a higher carbon footprint. Using mass timber instead of conventional building materials can significantly reduce emissions.

A study published in the *Journal of Building Engineering* compared the environmental impact between a reinforced concrete building and a hybrid CLT commercial building and found that "an average of 26.5% reduction in the global warming potential is achieved in the hybrid CLT building compared to the concrete building, excluding biogenic carbon emissions."

What's more, buildings made with mass timber can be constructed faster and with less waste, further reducing the environmental impact of projects.

You can see mass timber in action at T3 (Timber, Technology, Transit), an office building in Minneapolis. The structure is built with mass timber and is designed to be a high-performing building that can "respond to Minneapolis' ever changing climate."

3. Salvage Materials

Image credit by www.archdaily.com

Reusing and recycling materials have long been key tenets of sustainability. Construction pros can apply these green principles by opting to use salvaged materials in their projects. Doing so gives construction materials a second life and helps keep waste out of landfills.

In some cases, purchasing recycled materials can also lower costs and improve the aesthetics and functionality of a building.

The Kendeda Building for Innovative Sustainable Design at Georgia Tech is one example of a project that involved salvaged materials. Skanska USA Project Manager Jimmy Mitchell used several materials to construct the building.

Jimmy recycled old slate shingles from the roof of the Georgia Tech Alumni Association building and used them on the walls and floors of the new building's shower rooms and restrooms. He also made use of lumber from storm-felled trees on the campus, and leveraged them to make counters and benches inside the Kendeda building. Meanwhile, the heart pine joists, which were originally part of Tech Tower, were converted to threads used in the new building's staircase.

4. Bamboo

Another sustainable alternative to conventional construction materials, bamboo is highly flexible, allowing builders to use it for both structural and decorative purposes. It's easy to find and source bamboo, as the tree grows in various parts of the world.

What's more, bamboo produces very little waste. A whole stem of a bamboo tree can be used in construction, and any pieces left over are compostable, which means they naturally break down back to the earth.

The Tiing hotel in Bali used bamboo together with concrete to build textured walls that blended well with the location's natural surroundings.

In an interview with Dezeen, hotel architect Nic Brunson said, "The materiality of this project aims to work within the local context, construction techniques, resources and climate – a rugged regionalism... In a tropical climate, a clean finish would require much maintenance; here, the material will weather in, enhancing the character of the architecture and place."

5. Mycelium

The words "mushrooms" and "construction" don't typically belong in the same sentence, but mycelium fungi may start to change that.

Mycelium is the vegetative structure of a fungus and when dried, it is highly durable and resistant to mold, water, and fire. Like bamboo, mycelium is organic and compostable, so it leaves little waste and has virtually no negative impact on the environment.

When combined with materials like timber, sawdust, and demolition waste, mycelium can be molded into bricks used for constructing buildings and their parts.

Mycelium isn't used at a massive scale yet, but there are a few notable examples. In 2014, an organic brick structure known as Hy-Fi was built in Queens, New York. Created as part of MoMA's Young Architects Program, the building used organic, biodegradable bricks made out of mycelium.

6. Precast Concrete

Precast concrete is created offsite before being transported to the job site. Unlike site cast concrete, which is poured, molded, and cured onsite, precast concrete is cured in the manufacturer's facility and shipped to the construction site.

Precast concrete slabs are more sustainable because they take less energy and materials to produce. You can also reuse construction processes such as molds and forms, thereby reducing waste.

Some of the world's most famous structures use this material. For instance, the shells on the roof of the Sydney Opera house are made out of precast concrete.

7. 3D Printed Concrete

3D printing can have a major impact on construction productivity and sustainability. 3D concrete printing allows you to digitally design any shape and bring — or rather print — it to life in the real world.

Unlike traditional construction, which uses up plenty of energy due to having to transport materials and go through supply chain complexities, 3D printing allows builders to design and construct faster, thus saving time, money, and energy. And because the formwork is reusable, 3D printed concrete produces less waste.

This method is being used to construct the longest 3D printed bridge in the world. Located in the city of Nijmegen in The Netherlands, the bridge is being constructed at Europe's first industrial and commercial 3D printing factory established by Royal BAM Group nv (BAM) and materials company Saint-Gobain Weber Beamix (Saint-Gobain).

Let's Build a More Sustainable Future

There are several paths towards sustainability and the best course of action depends on your business.

A good way to get started is to do your research. Figure out what's right for you by exploring the different construction materials in the market and testing them in your projects.

5 Organizations Empowering Marginalized Communities In California

■ Continued from page 1

Founded in 2009 by CPA youth leaders, Youth MOJO is a leadership development program for high school students with a focus on low-income Chinese American young adults. Through the program, participants meet weekly and can develop and strengthen their leadership, public speaking, communication, advocacy, and organizing skills.

The #3 entry is **AbilityFirst**. Operating in the greater Los Angeles area, it has over two dozen facilities that support individuals with physical and developmental disabilities through after-school enrichment programs, job training, community employment, and affordable and accessible housing.

AbilityFirst runs one of the first fully accessible camps in the United States, Camp Paivika. Located in the San Bernardino National Forest, it offers overnight summer programs for children and adults with mild to severe developmental and physical disabilities such as autism, ADHD, cerebral palsy, epilepsy, and Down syndrome.

Coming in at #4 is **Grantmakers Concerned with Immigrants and Refugees**, an immigrant-focused philanthropy-supporting organization. It works with its member institutions, individual grantmakers in its network, partners in the field, and others to mobilize funder resources on the most pressing issues facing these marginalized populations.

The organization uses briefings, publications, and consultations to inform funders about policy developments and help them make the connection between their priorities and immigration. It connects funders from around the country to one another, with the hopes of catalyzing coordinated and collaborative grantmaking for maximum impact.

To close our list at #5 we have the **Greenlining Institute**, a policy, research, organizing, and leadership organization fighting for racial and economic justice. It works on various major legislative issues, such as environmental policy, health care, and more.

Headquartered in Oakland, California, Greenlining runs a Leadership Academy that works to train and empower the next generation of multi-ethnic leaders to create positive social change. It offers three programs designed for young leaders seeking to reach their full potential.

California Sub-Bid Request Ads

nibbi

Project Name: Mission Bay Block 9A Design-Build Fire Protection & Photovoltaic Panels
Location: San Francisco, California
Bid Date: May 5, 2021 @2:00pm
Pre-Bid: April 21, 2021 @10:30am (Web Ex Call)
Labor Requirements: Prevailing Wage
Project Schedule: Est. Start February 2022

Nibbi Brothers has been selected as the General Contractor for the Mission Bay Block 9A housing project in San Francisco. We are in receipt of the 100% DD set and are currently requesting bid proposals from qualified subcontractors and suppliers including those certified with the Office of Community Investment and Infrastructure (OCII)/Successor to SFRA for Design-Build Fire Protection & Photovoltaic Panels. The Office of Community Investment and Infrastructure (OCII) has established a 50% SBE participation goal for this project, with first consideration to San Francisco-based LBEs located in zip code areas 94124, 94134 and 94107, followed by all other San Francisco-based LBEs. Non-San Francisco based SBEs should only be used to satisfy participation goals where San Francisco-based firms are not available, qualified, or if their bids or fees are significantly higher than those of non-San Francisco-based firms. We strongly encourage LBE/MBE/WBE to participate. Please contact Maria Pecot, OCII Contract Compliance Specialist for additional information at maria.pecot@sfgov.org. The 350 China Basin Street project consists of approximately 179,937 GSF sprinklered Type I-B (concrete superstructure + misc steel posts and beams at rooftop structures & misc. other locations), eight-story mid-rise residential building, 148 affordable for sale condo units including 1, 2, and 3-bedroom configurations. The project will be approximately 89'-4" to the roof structure, as measured from the lowest entry point on the site (along China Basin Street). The proposed project would include new sidewalks & street trees, utility infrastructure and landscaping as well as common, landscaped open space for residents at levels 02 and 09 Roof. The building design will incorporate sustainable building strategies to achieve LEED Silver or Green Point Rated.

For any questions on accessing the bidding documents, please contact Jacqueline Leiva, Precon & Estimating Coordinator via email, JacquelineL@nibbi.com

For project specific questions please contact Anastasia Scorsone, Assistant Project Manager via email, anastasias@nibbi.com.

nibbi

Project Name: 4200 Geary Design Build Elevators
Location: San Francisco, California
Bid Date: Wednesday, May 12, 2021 @2:00pm
Pre-Bid: Monday, April 26, 2021 @10:00AM
Labor Requirements: Prevailing Wage
Project Schedule: Est. Start: September 2022

Nibbi Brothers has been selected as the General Contractor for the 4200 Geary Blvd project in San Francisco. We are in receipt of the 65% CD Set and are currently requesting bid proposals from qualified subcontractors including those certified as SBE's for Design Build Elevators. The Contract Monitoring Division (CMD) has set the SBE participation goal for this project at 20%. For more information about the San Francisco SBE program as it relates to this solicitation please contact Mr. Selormey Dzikunu at the City and County of San Francisco Contract Monitoring Division via email, selormey.dzikunu@sfdpw.org. Proposals are due no later than 2:00 PM on Wednesday, May 12, 2021 online via the Building Connected website

Project Description: Demolition of existing structure, construction of new Building to include ground floor commercial (retail), 98 Senior residential units, two 7th floor terraces. All Dwelling units are adaptable or mobility.

For any questions on accessing this bidding software, please contact Jacqueline Leiva, Precon & Estimating Coordinator via email, jacquelineL@nibbi.com. For specific questions regarding this project, please contact Mackenzie Courtney, Preconstruction Manager via email, mackenziec@nibbi.com.

DESILVA GATES CONSTRUCTION

11555 Dublin Boulevard • P.O. Box 2909
 Dublin, CA 94568-2909
 (925) 829-9220 / FAX (925) 803-4263
 Website: www.desilvagates.com
 Estimator: TROY SNYDER
 An Equal Opportunity/Affirmative Action Employer

DeSilva Gates Construction (DGC) is preparing a bid as a Prime Contractor for the project listed below:

POTRERO POWER STATION - SITEWIDE DEMOLITION
420 23rd Street, San Francisco, CA 94107
Local Business Enterprise Goal Assigned is 17%

OWNER:
CALIFORNIA BARREL COMPANY, LLC
 1201 Illinois Street #A, San Francisco, CA 94107
BID DATE: MAY 14, 2021 @ 2:00 P.M.

We hereby encourage responsible participation of local Small Business Enterprises/Local Business Enterprises, and solicit their contractor or materials and/or suppliers quotation for the following types of work including but not limited to:

SITWIDE DEMOLITION.
 Plans and specifications may be reviewed and downloaded from the ftp site at <ftp://ftp%25desilvagates.com:f7pa55wd@pub.desilvagates.com> (if prompted the username is ftp@desilvagates.com and password is f7pa55wd).

A Pre-Bid Coordination Meeting and Job Walk will be held on April 23, 2021 at 8:00 AM located at 420 23rd Street, San Francisco, CA 94107.

Fax your bid to (925) 803-4263 or email it to tsnyder@desilvagates.com to the attention of Estimator Troy Snyder. If you have questions, please email.

If you need SBE/LBE support services and assistance in obtaining bonding, lines of credit, insurance, necessary equipment, materials and/or supplies or related assistance or services for this project call the Estimator at (925) 829-9220. DGC is willing to breakout portions of work to increase the expectation of meeting the SBE/LBE goal.

At our discretion, 100% Payment and 100% Performance bonds may be required as a subcontract condition. This will be a PREVAILING WAGE JOB. DGC is an Equal Opportunity/Affirmative Action Employer.

Public Legal Notices

CITY & COUNTY OF SAN FRANCISCO DEPARTMENT OF PUBLIC WORKS

SAN FRANCISCO PUBLIC WORKS MICRO-LBE SET-ASIDE PROGRAM
Sourcing Event ID No. 000004295
MLBE CR #14 VL
CURB RAMPS #14 VARIOUS LOCATIONS

Quotations shall be submitted online via ShareFile until 2:30:00 p.m. on April 14, 2021.

Digital files of Bid Documents, Plan Holders Lists, and Addenda may be downloaded at no cost from the Public Works Electronic Bid Documents Download site at <https://bsm.sfdpw.org/ContractAdmin/Login.aspx>. Please visit the Contracts, Bids and Payments webpage at <https://bidopportunities.apps.sfdpw.org> for more information. Notices regarding Addenda and other bid changes will be distributed by email to Plan Holders.

The Work is located at various intersections in San Francisco, California and consists of curb ramp construction, traffic routing, and all related work.

The time allowed for completion is 180 calendar days. The Engineer's estimate is approximately \$478,000. For more information, contact the Proj-

ect Manager, Marcia Camacho at 628-271-2405 or Marcia.Camacho@sfdpw.org.

On July 1, 2014, the registration program under section 1725.5 of the California Labor Code went into effect. The program requires that all contractors and subcontractors who bid or work on a public works project register and pay an annual fee to the California Department of Industrial Relations ("DIR").

No contractor or subcontractor may be listed in a bid or awarded a contract for a public works project unless registered with the DIR as required by Labor Code section 1725.5 [with limited exceptions from this requirement for bid purposes only under Labor Code section 1771.1(a)].

Pursuant to San Francisco Administrative Code ("Administrative Code") Section 6.25 and Chapter 25 of the Environment Code, "Clean Construction" is required for the performance of all work.

This Contract is subject to the requirements of Administrative Code Chapter 12X, which prohibits contracting in states with laws that allow discrimination. The City is prohibited from entering into any Contract with a Contractor that has its United States headquarters in a state on the Covered State List or where any or all of the work on the contract will be performed in any of those states on the Covered State List. Administrative Code Chapter 12X and a list of states on the Covered State List can be found at:

<http://sfgsa.org/chapter-12x-anti-lgbt-state-ban-list>.

The Specifications include liquidated damages. Contract will be on a Lump Sum Bid Items With Unit Prices basis. Progressive payments will be made.

A bid may be rejected if the City determines that any of the bid item prices are materially unbalanced to the potential detriment of the City.

The Contract will be awarded to the lowest responsible responsive bidder.

Only San Francisco Contract Monitoring Division certified Micro-LBE contractors are eligible to bid on this Set-Aside Contract in accordance with San Francisco Administrative Code Chapter 14B. Bid discounts, LBE Subcontracting Participation Requirement, and Good Faith Efforts are not applicable to this contract. Other CMD requirements shall apply. Certified Micro-LBE prime bidders must perform at least 25% of the contract work. Contact Dalmar Ismail at 415-581-2322 or Dalmar.Ismail@sfgov.org for details.

This project will not have a pre-bid conference.

A corporate surety bond or certified check for ten percent (10%) of the amount bid must accompany each bid. Administrative Code Section 6.22(a) requires all construction contracts in excess of \$25,000 to include performance and payment bonds for 100% of the contract award. For information on the City's Contractor Development Program, call 415-986-3999 or cdp@imwis.com.

Class "A" license required to bid.

Minimum requirements of San Francisco Administrative Code Chapter 6 Sections 6.21 and 6.22 requires bidders to include with their quotes information concerning their experience and financial qualifications, San Francisco Business Tax Registration Certificate, participation in an apprenticeship program and compliance with subcontractor listing laws.

Pursuant to Charter Section 3.105, all contract awards are subject to certification by the Controller as to the availability of funds.

Minimum wage rates for this project must comply with the current General Prevailing Wage as determined by the State Department of Industrial Relations. Minimum wage rates other than applicable to General Prevailing Wage must comply with San Francisco Administrative Code, Chapter 12P, Minimum Compensation Ordinance.

Bidders are hereby advised that the Contractor to whom the Contract is awarded must be certified by the Contract Monitoring Division as being in compliance with the Equal Benefits Provisions of Chapter 12B of the Administrative Code within two weeks after notification of award.

Right reserved to reject any or all bids and waive any minor irregularities.

ABLE: Asian Black Latino Enterprises

CEO of Northern California's Lucy Hernandez Consulting wins North Bay Latino business leadership award

[Article was originally posted on www.northbaybusinessjournal.com]

Aligning your business model to your core beliefs is key says, Lucy Hernandez, a 2020 winner of the Business Journal's Latino Business Leadership Awards.

Education: Bachelor of Arts degree in social science from California State University Chico; Masters degree in business administration from Sonoma State University.

Staff: 3

Tell us your story and that of your organization: I was a teen mother facing homelessness and was served by a local community action agency. My caseworker provided me services such as food, housing can child care so I can could continue attending school and graduate. I lost my child to Child Welfare during this time and the agency staff helped me get back on my feet and get my daughter back.

At this moment, I knew I wanted to do this type of work and help others like me with key services to help them get back on their feet and keep their children.

I have spent over 22 years in social services and community-based as staff promoted to director for small and large organizations. In 2016, I launched my consulting firm to support agencies in maximizing their performance & services for vulnerable residents in their communities.

Is there a major accomplishment in the past year or so that you would like to share?

My business has been instrumental in supporting agencies and organizations in responding to COVID-19 community needs and developing community needs assessments to assess the community priorities and allocate CARES Act funding for the most impacted.

Our team has grown and I have been able to increase our team members, as we have expanded to Southern California counties.

What is the achievement you are most proud of?

Recognized as the Latina Entrepreneur of the Year by the California Hispanic Chambers of Commerce, recipient of Congressman Mike Thompson's Congressional Recognition for my business work in the community and attaining my master's degree in business administration from Sonoma State University last year.

My clients increased from 10 counties and agencies to 22 counties and clients in the last 12 months and I have reached \$1M goal in my five year anniversary as a business owner.

What is your biggest challenge today?

Building internal capacity to respond to the increase in client demands, new contracts and state-wide projects and work. Hiring team members that have the skill set necessary to meet the needs of our evolving industry.

What are you most proud of regarding the achievements of the area Latino business community and what are the greatest challenges faced by that community?

I am proud to see our Latino's growing in the field of human, social and community-based services through public agencies and nonprofits in our state. They are being promoted to management and administrative level positions and I get to work with them on their executive professional development to assist them in leading their agencies and organizations to respond to community-based programs and services for their communities (serving low-income/vulnerable populations).

I am proud to see our Latino professionals obtaining their degrees and taking the step towards being in executive-level positions, which impact the way we reduce disparities in our communities.

Words that best describe you:

Over-achiever, passionate and innovative thinker.

I love taking a complex issue and problem and helping my clients to think of a strategic approach to lead and manage their agencies and organizations to better serve our communities. I am a one-stop consulting firm that specializes in organizational change management, strategic planning and practices and building internal capacity to endure the shifts in the environment.

As a successful professional, what were the biggest obstacles you faced and how did you overcome them?

Since I started as a staff member in human, social and community-based services in 1998, I always was the minority in the workforce that advocated for our minority groups.

Through my career I always needed to work extra hard to ensure people took me serious and deflected the racist systemic attacks that were present in my field.

Today, I work on reducing these barriers for other professionals and love that I have the opportunity to support my clients (agencies and organizations) to be more culturally-responsive and reduce barriers for other minority professionals.

This is a huge accomplishment, because I am in a position to influence executives and boards and commissions to take a deep dive in their agency and organization culture and help them shift to a strength-based approach, inclusive and culturally responsive entity.

As of today, I am the only Latina consultant and trainer that focuses on my work. There is a demand for my expertise in organizational management, strategic planning and training to build our new generation of workers in this field.

How do you think your profession will change in the next five years?

I hope there are more Latinx consultants in my field, as there is a need to assist counties, agencies and organizations to be more responsive to our community needs. We need to ensure we can be a change agent that helps them navigate to develop responsive services for the most vulnerable residents in their communities, develop a culturally competent workforce and develop a strategic framework for sustainability.

Who was your most important mentor?

I have had the opportunity to have several women mentors, who saw potential in me and took me under their wing. They share with me that their 'generation' has worked hard to lay out a pathway for my generation to be the best version of myself and to reduce barriers as a woman to succeed in the governmental field.

They are my inspiration every day and today I pay it forward to help other women in their journey and career.

My most special mentor is Christine Zoppi, director of Glenn Co. Health & Human Services. She was one of my first boss's and even though we were from different backgrounds she always saw my potential and believed in me.

She gave me the opportunity to grow from a line staff member to an assistant director for a multi-county organization. She on-going coaching, advice and opportunities laid a framework to who I am today... I want to do the same for other women as she did for me for 14 years.

Tell us about your community involvement: I am responsible to assess multiple counties (clients) community needs and I develop assessment modalities to capture the residents priorities and gaps in services for their families.

I develop Spanish town halls (or e-town halls), Spanish surveys, interview Spanish residents and help bridge their needs to my clients, so they can implement responsive services.
