High speed rail became a boondoggle when politicians changed it to low speed rail

[Article was originally posted on www.calmatters.org]

By *Quentin L. Kopp, CalMatters*,
Quentin L. Kopp is a retired judge and former state senator.

My 1994 state Senate legislation established the California High-Speed Rail Project. It's not inherently a "boondoggle"; it's been made a boondoggle by politicians transforming it from high-speed to low-speed.

Functionally, high-speed rail requires a dedicated track and electrification. Almost a decade ago, legislative predecessors of state Sens. Jim Beall and Scott Wiener prohibited dedicated track to prevent the High-Speed Rail Authority from acquiring its own right-of-way from San Francisco to Gilroy. Thus, high-speed rail must use the Caltrain tracks, which limits no more than four trains hourly in primetime, because Caltrain, the right-of-way owner, will run six trains per hour.

Spending billions, the authority decided eight years ago to begin construction from Merced to Bakersfield in the Central Valley, using funds from the 2008 voter-approved general obligation bond and from the Federal Railroad Administration. But the plan for the track is actually non-electrified, and it's conventional diesel train operation will compete with nearby Amtrak service.

Of the \$9 billion bond approved for high-speed rail, approximately \$5 billion has not been spent, according to the California Controller. It behooves our legislators either to demand the High-Speed Rail Authority restore dedicated track and electrification or ask voters in November to authorize dividing unspent bond funds between Metrolink in Southern California and Caltrain in the Bay Area for needed improvements. Otherwise, high-speed rail will never be a Golden Gate Bridge or even a BART system.

Building for Manufacturing: Construction Leaders Share Winning Strategies

[Article was originally posted on Autodesk Construction Cloud Blog. <https://construction.autodesk.com/>]

By *Alyssa Jaber,*

Well before we can try on a new pair of shoes, drive home a brand new car, or pop open an ice cold beverage, the everyday products we rely on originated somewhere. And while assembly lines and manufacturing machinery physically produce these goods, the reason they exist in the first place starts with construction.

Building facilities for manufacturing is critical and complex work for construction firms. In order to meet high demands, today's leaders in the manufacturing construction space deploy cutting edge technology and strategies. Recently, we spoke with Emily Rech, Program Manager at Pond & Company and Travis Voss, Leader of Innovative Technology at the Helm Mechanical, formerly known as Mechanical Incorporated, to learn more about how these leading firms excel in the industrial building sector. Below, they share some of the key challenges of building manufacturing facilities and how innovation can be used to improve collaboration and transparency.

What are some major challenges in building for manufacturing?

Emily: Manufacturing plans are heavy on mechanical, electrical, plumbing (MEP) scopes. To approach these large mechanical and electrical systems, plans get a lot more detailed. There's a higher likelihood that you're going to have more RFIs and submittals because there are much more complicated systems in play.

Travis: Manufacturing projects involve a lot more communication with the end user. It's a completely different level of involvement. In

most construction projects, we don't get to talk to the end user as much. We work on completing the project and then hand it over. When building for a manufacturing facility, you have to ensure everything is operational. If a certain part of their manufacturing line or system that we've set up does not work for them, it's costing them a lot of money and energy.

How can technology alleviate some of these challenges?

Emily: The ability to have one tool to centralize all of your communications whether from the field teams, the project managers, or the owner and the engineers is crucial for success in the fast paced design-build environment that manufacturing and major industrial projects live. In PlanGrid, we can communicate with the project stakeholders in a matter of seconds.

Technology is also critical to the buyout process on manufacturing projects. As soon as we select our contractors, we can import that information from BuildingConnected into PlanGrid to get our shop drawings started and submittals uploaded. There's a long list of equipment when it comes to these mechanical and electrical systems that we need to be on top of. When technology can easily connect, it's crucial for streamlining the procurement process.

Travis: The main benefit is transparency. When we are building a manufacturing facility, we want the end user to feel comfortable and understand what we are building for them. With technology, we can show them and walk them

through the models easily. This saves a lot of time on rework.

"What works on a model in theory, might not work in reality. The earlier you bring in those end users with real manufacturing backgrounds, the more time and money you can save down the road."

When you use technology that connects your data and workflows in the construction phase, everyone has access to the latest and greatest information and you spend less time searching. It also opens the door for more standardization. We can start to apply learnings moving forward and we just continue to improve.

How do you work with owners successfully in the manufacturing space?

Emily: Owners love to know what's going on their job sites, but a lot of them are not even in the same state or sometimes the same country as some of these projects. We like to keep the owners informed about all aspects of the project. For instance, even if it's not an owner RFI, we give them access to all our RFIs through PlanGrid so they feel connected and know what questions are being asked in the field. They also get to see photos being uploaded and can check out daily logs on a regular basis. For example, an owner that is remote will not know if something happens like it rained that day or week and caused a delay. We want to empower them with information and give them the transparency to understand and see for themselves that we may

5 Tips for Increasing Your Specification Rate

[Article was originally posted on www.constructconnect.com]

By Kendall Jones,

As a building product manufacturer, getting your products specified is key to getting them sold. You need to understand how architects are researching and selecting the products they specify. To get inside the mind of an architect, you need to answer these questions:

- What role do architects expect BPMs to have in the design and specification process?
- What resources and information are architects looking at when specifying products?
- What drives the decision-making process for specifying building products?
- What expectations are there when it comes to advising about products and writing specifications?

In the American Institute of Architects' report, The Architect's Journey to Specification 2019, members were surveyed to answer those questions and more regarding how architects select the products they specify. Based on the responses to this study, we've put together five tips for increasing your specification rate and building better relationships with architects.

Key Takeaways

Since the last Architect's Journey to Specification in 2016, there have been some notable trend shifts in how and why architects go about specifying products, including who they are getting advice from, where they are learning about new products, and changing digital needs.

Key takeaways from the 2019 report include:

- Consultants are seeing their role as an architect's trusted advisor rise while BPM's role is decreasing.
- Architects are using social media more to learn about new products.
- Architects are becoming more willing to experiment with what products they specify rather than just relying on brands they are familiar with from past projects.
- Architects are copying and pasting specs from past projects more than they were three years ago.
- Architects feel that BPMs are not meeting their needs during the specification stage.
- Architects are most likely to specify a manufacturer brand even when specs aren't closed.
- Younger architects are relying more on digital product libraries and less on digital product descriptions and product specifications.

Update & Optimize Your Website

Architects are still primarily responsible when it comes to researching new products and building materials at their firms. The top sources of information they turn to for researching products are your website, continuing education offering, and your reps. It's important you make it easy for them to navigate and search your website to conduct research. Your site should be optimized for search so architects can quickly find your site when doing web searches.

Make your website easy to navigate, architects don't want to spend hours on your site trying to find the info they need. If they can't find what they are looking for quickly, chances are they'll go somewhere else. Contact information should be located on every page of your website, either in the footer or header.

Each product you offer should have its own page. At the very least, your product pages should have downloadable product specifications, high-quality images or video of the product, product descriptions, downloadable digital models and digital libraries of your products such as CAD and BIM, and CSI formatted specifications.

Warranty information, environmental ratings, technical product descriptions, installation instructions, availability and lead time, pricing information, design guides, and case studies are also pieces of information architects feel BPMs should do a better job of providing.

Other information that might help architects select your products include product comparison charts, building product declarations such as environmental product declarations (EPDs) and health product declarations (HPDs), quantity calculators, and online tools.

Promote Your Products on Social Media

While still not a primary source of learning about new products, architects are turning more to social media for design information and to research new building materials. Use images and videos to showcase your products on social media, highlight projects using your building materials, and focus on key selling points when describing your products. Make sure you include links back to your website or product pages so architects can do further research.

The AIA report doesn't mention what social media sites architects are using, the top seven in 2020 according to Search Engine Journal are Facebook, Twitter, LinkedIn, Instagram, Snapchat, Pinterest, and Reddit. This doesn't mean you have to be on all of them. Do some research and find out where your competitors are and where the architects you are trying to reach are and focus on those to start with. Facebook might have the most users, but LinkedIn will probably put you in front of more decision makers. With a little experimentation, you'll find the best mix for your company and your products.

Providing Continuing Education

Architects are required to obtain a certain number of continuing education units to maintain their licenses or fulfill (AIA) membership requirements. Architects are turning to continuing education less to learn about a specific BPM but are using them increasingly more to do product research.

Webinars, lunch and learns and other continuing education offerings are a great way to get in front of architects and build brand awareness. These presentations should help educate architects about your product category or provide other information to expand their knowledge base. They should not be glorified commercials about your specific product offerings.

Again, the goal is to establish your company as an expert and be a go-to resource of information for your product category, not just your products. This keeps you top of mind when decision makers are choosing who gets specified on a project. Make

Ready to Grow Your Business?

Business Loans for Women Entrepreneurs

[Article was originally posted on www.fundbox.com]

A Guide to Business Financing & Loans for Women Entrepreneurs

Starting and running a successful business takes grit, determination, confidence, and skill. It also takes money. In today's competitive business climate, it's hard enough for anyone to start and operate a successful business. For many women, it's harder than average.

There are many reasons for this, including bias (both unconscious and overt) in the world of venture capital funding and in conventional business lending. Another reason may be that women business owners don't always have access to the information and tools they need to get the funds they require.

At Fundbox, we support business owners of all kinds. We believe that everyone should get a fair opportunity to achieve their dreams. Data-driven credit is one way that technological innovation can help us remove biases from the system that might otherwise make it harder for female entrepreneurs to succeed. One day, we hope those biases will be a thing of the past. Until then, we want to help female entrepreneurs to take advantage of every available opportunity that's out there.

In this guide, we'll look at the lending landscape for women business owners, the best business loans for women, alternative business funding sources for women, top business grants for women, and other organizations where women business owners can find more help and information.

Today: The State of Funding for Women-owned Businesses

Today, the 11.6 million businesses women own account for 39% of all U.S. companies. Together, these businesses employ 9 million people and generate \$1.7 trillion in revenue each year. Over the last two decades, the number of women-owned U.S. businesses has increased at the impressive rate of 114%, compared to the national growth rate of 44%, according to the American Express 7th annual State of Women-Owned Businesses in the United States report.

Despite those tremendous numbers, there's still a lot of room for improvement and growth toward equality between female and male business owners. While more and more women-owned businesses have emerged in recent years, these

companies only employ 8% of all workers and are responsible for just 4.2% of revenues generated by U.S. businesses, according to the same report.

Why is that?

For starters, running a successful business is incredibly hard work. Not only do you need to provide beneficial products and services to your customers and deliver exemplary service in each interaction, you need to manage cash flow to pay for recurring expenses—and absorb unexpected ones.

This, of course, is much easier to do when there's money in the bank. Unfortunately for many women entrepreneurs, securing small business financing is much harder than it needs to be.

California Sub-Bid Request Ad

Columbus, Ohio Sub-Bid Request Ad

Subconsultant Proposals Requested from qualified **DBE** Subconsultants/Subcontractors for Phase 1 Services for:

**THE EAST COUNTY ADVANCED WATER PURIFICATION PROJECT
PACKAGE 3 (PROGRESSIVE DESIGN BUILD)**

Owner: East County Advanced Water Purification Joint Powers Authority
Location: Santee, CA

Proposal Date: October 14, 2020 @ 3:00 P.M.
Subconsultant Proposals Due: October 7, 2020 @ 3:00 P.M.

J.F. Shea Construction, Inc.
667 Brea Canyon Road, Suite 30 • Walnut, CA 91789
Phone: (909) 595-4397, Fax: (909) 444-4268
Contact: Lori Olivas, lori.olivas@jfshea.com

J.F. Shea Construction, Inc. is soliciting your participation in the preparation of this Proposal. We are particularly interested in proposals from Subconsultants/Subcontractors for the following work areas:
Survey, Geotechnical Consultant, Surge Analysis, Corrosion Assessment, Traffic Control, and Potholing

Project Documents: Email your request to elizabeth.schmid@jfshea.com. You will be required to execute a Confidentiality Agreement prior to being sent a link to the Project Documents.

J.F. Shea Construction, Inc. is an equal opportunity employer and intends to negotiate in good faith with interested DBE firms and intends to utilize the lowest responsive bidder. J.F. Shea expects potential Subconsultants/Subcontractors to be bondable. J.F. Shea will pay for up to 1% for Subconsultant/Subcontractor bond costs.

**SHEA- TRAYLOR JV
BIDDING OPPORTUNITY**

City of Columbus, Ohio Certified DBE (MBE and WBE) with the following certifying authority: Participation of Minority-and Women -Owned Business Enterprises ("MWBE") and Equal Employment Opportunities ("EEO"). Participation by Disadvantaged Business Enterprises ("DBE") in United States Environmental Protection Agency ("EPA") Programs pursuant to 40 Code of Federal Regulations (CFR) Part 33; DBE is a Disadvantaged, Minority, or Woman Business Enterprise that has been certified by an entity from which EPA accepts certifications as described in 40 CFR 33.204-33.205 or certified by EPA. EPA accepts certifications from entities that meet or exceed EPA certification standards as described in 40 CFR 33.202. USDOT DBE certifications accepted. See: City of Columbus, Office of Diversity and Inclusion, 614-645-4764 and www.columbus.gov/odi/.

Inviting qualified contractors, specifically **MBE and WBE firms certified/eligible as listed above**, to contact Shea-Traylor JV (Prime Contractor listed below) regarding subcontracting services and material supply opportunities in connection with the upcoming tunnel and shafts project.
The Work under this contract is in Columbus, Ohio. The Work consists of:

Construction of Tunnel & Shafts: Lower Olentangy Tunnel, Contract 135-2016
Owner: City of Columbus Dept. of Public Utilities
910 Dublin Road - 3rd Floor, Columbus, OH 43215
BID DATE: October 14, 2020 at 3:00 PM EDT (Electronic Bid Only)

Opportunities to participate exist in the following specific areas of soil and rock excavation, hauling, excavation support systems, ground freezing, deep foundation system(secant-piles), underground blasting, structural steel, engineering, survey, instrumentation and monitoring services, materials testing, demolition and site preparation, traffic control, sewer tap and sewer bypass pumping, A/C paving, environmental investigation, utility relocation, paving, fencing and gates, planting and seeding, retaining wall, geotechnical and structural instrumentation, secant piles, cast-in-place concrete structures, reinforcing steel, ground stabilization, rock-bolts, steel dowels, shotcrete, concrete finishing, mechanical steel pipe, ventilation HVAC, precast concrete shaft covers, temporary office buildings/services, Temporary electrical substation, waterproofing, service utilities, grouting, electrical services, pest control, IT services, waste disposal, cleaning services, and security services.

Any business seeking to participate as a MBE or WBE in the Contract that is not currently certified DBE by the EPA and the requirements set forth above should review **40 CFR 33.204-33.205, certified by EPA or City of Columbus, Office of Diversity and Inclusion at <https://www.columbus.gov/odi/>** as shown above to obtain current certification.

Shea-Traylor JV set up an FTP site where you can view all plans, specifications and addendums for your convenience. Please contact Steve Fiori at (909) 595-4397, Steven.Fiori@jfshea.com, to receive instructions on accessing the FTP Site.

Shea-Traylor JV, (An EEO Employer)
(J.F. Shea Construction, Inc. - Traylor Bros., Inc.)
667 Brea Canyon Road, Suite 22
Walnut, CA 91789
Phone: 909-594-0990 fax: 909-869-0827
Send Inquiries/Certifications to: **Steven Fiori: Steven.Fiori@jfshea.com**

REQUESTING SUB BIDS FOR ALL TRADES INCLUDING QUALIFIED SBE & DVBE SUBCONTRACTORS & SUPPLIERS ON THE FOLLOWING PROJECT

**LAUSD Belvedere Middle School
Comprehensive Modernization Project
Los Angeles, California**

Bid due dates will vary, inquire for details

HENSEL PHELPS
Plan. Build. Manage.
(An Equal Opportunity Employer)
18850 Von Karman Avenue, Suite 100, Irvine, CA
(949) 852-0111 • (949) 852-0218 (FAX)
Michelle Keyser, mkeyser@henselphelps.com

Subcontracts awarded on this project will be on the Hensel Phelps Construction Co. standard form subcontract and may include a requirement to provide payment & performance bonds from a T-Listed surety at the subcontractor's expense. HPCC will assist in obtaining bonds, lines of credit or insurances required.

California Sub-Bid Request Ads

Kiewit Infrastructure West Co.

SMALL
BUSINESS
EXCHANGE

California Sub-Bid Request Ads

W.A. Rasic Construction Company

Our firm is preparing a bid for the following project as a prime contractor and we are interested in receiving subcontractor quotations for items of work or materials required below from interested Disadvantaged Business Enterprise (DBE), Minority Business Enterprise (MBE) and Women Business Enterprise (WBE).

**City of San Diego
Morena Conveyance North
Bid No. K21-1848-DBB-3**

Bid Date: October 6, 2020 @ 2:00 PM

Engineer's Estimate: \$ 99 Million

Outreach: DBE/ MBE/WBE

Senior Estimator: Mark Setzer

Phone: (562) 928-6111 | Email: msetzer@warasic.com

W.A. Rasic is requesting bids for the following trades and/or material supplies:

Electrical, AC Cold Milling / Demolition, Asphalt Cap Paving & Crack Seal, Traffic Signals & Loop Detectors, Slurry Seal (Type 1,2,3), Minor Concrete, Tunneling, Pre-Construction Video, Landscaping, Street Sweeping, Sawcutting, Potholing, Striping, Welding, Install 30" & 48" WSP, Install Plug Valves, Install Air Vacs and Blow-Offs, Furnish Steel Pipe, Furnish Valves & Appurtenances, Furnish Sand & Gravel, Furnish CSLM / PCC & Asphalt, Traffic Control Signs & Equipment, Cathodic Protection, Trucking, SWPPP Development, Scheduling, Survey, De-watering, Contaminated Soils (Monitoring, Hauling & Disposal), Geotechnical Instrumentation & Monitoring, Traffic Control Plans, Munitions Survey & UXO Identification, Training & Reporting, Equipment Rental, Shoring Equipment

Plans and Specifications are available at no cost to interested firms by either contacting W.A. Rasic Construction, downloading from the City of San Diego's Planet Bids Portal or by utilizing the following FTP link <https://www.dropbox.com/sh/ynefq3bj4en-kxgx/AAA0VkmDXIE3fxiB7R4PHCt0a?dl=0>

W.A. Rasic will assist in obtaining bonds, lines of credit, insurance, equipment, supplies and materials upon request. W.A. Rasic will consider each DBE, MBE, and WBE quote, including those that are broken down into economically feasible units as well as arrange delivery schedules to facilitate and encourage maximum bidding participation. W.A. Rasic also encourages a consortium of DBE / MBE / WBE firms when a contract portion is too large to handle individually. Subcontractors must have a valid California Contractors License and must be registered with the Department of Industrial Relations (DIR) as required by Section 1725.5 of the Public Contract Code. Subcontractors will be required to execute W.A. Rasic's standard subcontract agreement and general insurance requirements. A copy of our subcontractor agreement and insurance requirements is available in electronic format upon request. W.A. Rasic reserves the right to require each subcontractor to provide payment and performance bonds in the amount of 100% of the subcontractors bid. Bond Premium will be reimbursed up to a cost not to exceed 2.5%. W.A. Rasic is an equal opportunity employer and Union signatory Contractor.

We are soliciting quotes for (including but not limited to):

Trucking, Temporary and Permanent Erosion Control Measures, QC/QA Testing, Lead Compliance Plan, Progress Schedule (Critical Path Method), Construction Area Signs, Traffic Control System, Type III Barricade, Portable Radar Speed Feedback Sign, Portable Changeable Message Sign, SWPPP, Rain Event Action Plan, Storm Water Sampling, Analysis & Annual Report, Sweeping, Asbestos Compliance Plan, Treated Wood Waste, Clearing & Grubbing, Structure Excavation, Structure Backfill, Soil Amendment, Planting & Irrigation, AC Dike, Tack Coat, Cold Plane AC, Raise Bridge, CIDH Concrete Piling, Structural Concrete, Paving Notch Extension, Drill & Bond Dowel, Joint Seal, Bar Reinforcing Steel, Sign Structure, Bridge Removal, Concrete Backfill, Reinforced Concrete Pipe, Geocomposite Drain, Precast Concrete Pipe Manhole, Abandon Culvert, Adjust Utilities to Grade, Slope Paving, Minor Concrete, Detectable Warning Surface, Pre/Post construction Surveys, Misc. Iron & Steel, Water Main, City Water Manhole, Obliterate Surfacing, Fencing, Delineator, Pavement Marker, Object Marker, Roadside Signs, Midwest Guardrail System, Chain Link Railing, Single Thrie Beam Barrier, Cable Railing, Transition Railing, Alternative In-Line System, Concrete Barrier, Salvage Metal Bridge Railing, Striping & Marking, Rumble Strip, Traffic Monitoring Station System, Modify Lighting Systems, Modify Traffic Monitoring Stations, and Construction Materials

Jean Sicard (510-809-3411 jsicard@ocjones.com) is the estimator on this project and he is available to provide assistance or answer questions regarding the project scope of work including bid requirements, break out of bid items, plan or spec interpretation, bonding or insurance requirements, and other bid assistance. Plans and specs are available to review at our Berkeley office, or can be sent out via Building Connected. Plans are also available under the Advertised Projects tab at the Caltrans website at: <http://ppmoe.dot.ca.gov/des/oe/contract-awards-services.html>. PDF format quotes should be emailed to the estimator or faxed to 510-526-0990 prior to noon on the date of the bid. Quotes from DBE Subcontractors, Suppliers and Truckers are highly encouraged. OCJ is willing to breakout any portion of work to encourage DBE participation. Subcontractors must possess a current DIR, Contractors License, and insurance and workers compensation coverage including waiver of subrogation. OCJ may require Performance and Payment bonds on subcontractors. OCJ will pay the bond premium up to 2% of the contract value. All subcontractors are required to execute OC Jones' standard subcontract agreement, comply with all insurance requirements, and name OCJ as additional insured. Copies of our agreement and insurance requirements are available upon request. OCJ is a Union contractor, and we are signatory to the Operating Engineers, Laborers, Teamsters, and Carpenters. OCJ is an Equal Opportunity Employer.

Zuckerberg San Francisco General Building 5 Seismic Upgrade & Renovation Project

Pankow Builders is seeking subcontractors to participate in a prequalification process to identify Trade Subcontractors interested in bidding on the below listed trade scopes for the **Zuckerberg San Francisco General (ZSFG) Building 5 Seismic Upgrade & Renovation Project** located in San Francisco, California. All Trade Subcontractors who are interested in bidding on the listed trade scopes must be prequalified by Pankow Builders and San Francisco Public Works by successfully completing the Request for Qualifications (RFQ).

Pankow Builders is seeking to pre-qualify Subcontractors for the following Trade Scopes: Scaffolding; Construction Surveying; Demolition; Hazardous Material Abatement; Fiber Reinforced Polymer; Structural/Misc. Steel/Metal Decking; Architectural Woodwork; Waterproofing; Roofing and Insulation; Sheet Metal & Flashings; Fireproofing; Joint Sealants; Expansion Control; Doors, Frames & Hardware; Coiling Doors & Grilles; Fire Doors & Smoke Curtains; Storefronts & Curtain Walls; Interior Glass & Glazing; Metal Stud, Gypsum Board, & Plaster; Tile & Terrazzo; Ceilings; Flooring; Epoxy Flooring; Painting & Wall Coverings; Signage; Toilet Partitions & Accessories; Fire Extinguisher Cabinets; Window Blinds; Pneumatic Tube; Fire Sprinklers; Plumbing; HVAC; Building Automation Systems; Electrical; Communications and Security; Fire Alarm; Landscaping & Irrigation; Underground Site Utilities; Final Cleaning; Cold & Warm Room; Structural Excavation; Temporary Shoring & Underpinning; Asphalt Paving; Site Concrete; Paving Specialties; Fences & Gates; Elevators; Concrete Saw Cutting; Scanning Services; Wall & Corner Guards; Food Service Equipment.

RFQ's can be obtained from Pankow by contacting Laurie Kaminski at LKaminski@Pankow.com, or (415) 271-7012. Subcontractors that are interested in bidding on the project will be provided access to the **Request for Qualifications (RFQ) Application, and Drawings, Specifications, etc.** thru Building Connected. RFQ responses are due to Pankow by **October 9, 2020.**

General Contractor - Charles Pankow Builders Ltd., 1111 Broadway, #200, Oakland, CA 94607 (510) 893-5170.

5 Tips for Increasing Your Specification Rate

Continued from page 2

sure your continuing education offerings have been registered and approved by the AIA through their Continuing Education System (CES).

Become a Trusted Advisor

Manufacturers are facing an uphill battle when it comes to having influence over architects during the design and specification stages. Consultants have greater influence over architects when it comes to product selection than they did just three years ago, according to the report. BPM influence is declining as a result of not meeting expectations of architects.

Architects are expecting more from BPMs than they have in the past. In addition to providing ad-

vice about products and whole product categories, architects increasingly want BPMs to write specifications for them. There is also a growing demand for BPMs to review and edit specifications for architects.

With architects becoming more experimental and more likely to research products before they specify, BPMs need to take advantage of this opportunity to reestablish themselves as trusted advisors to gain more influence over what products architects specify.

Be Responsive to Architects

We've already covered two of the main areas where architects feel BPMs could improve, websites and support with specifications. Improving rep responsiveness is the third way that BPMs

can improve architect satisfaction.

Reps should be experts on their products and product categories. Your reps don't have to know every technical detail about every product, but they should be knowledgeable enough to speak confidently about your product offerings when meeting with architects. If a rep doesn't have the required information when meeting with architects, they should be able to produce it in a timely fashion. Better yet, they should be able to quickly navigate your website and provide that information.

Final Thoughts on Getting Specified

Trends are changing rapidly at architecture firms when it comes to specifying products. With more architects copying and pasting specifications

from past projects, consultants having greater influence, and architects relying heavily on products they are familiar with, it's harder than ever for manufacturers to get their foot in the door to get their products specified.

BPMs need to take advantage of the fact firms are growing more open minded and experimental. Staying on top of these changing trends and improving the areas that architects feel BPMs are falling short of expectations is going to be vital going forward to ensure your products get specified.

A Blueprint for Revamping the Minority Business Development Agency

[Article was originally posted on www.americanprogress.org]

By Connor Maxwell, Darrick Hamilton, Andre M. Perry, and Danyelle Solomon

Across the United States, small businesses are a significant source of employment and provide a variety of goods and services. For those who are fortunate enough to own a small business, they can also offer a pathway to wealth building and prosperity. Unfortunately, the ownership, profitability, and even presence of small businesses are grounded in differences in capital finance and unevenly distributed by race—especially when comparing Black and white communities.

While Black Americans make up 13 percent of the U.S. population, they own less than 2 percent of small businesses with employees. By contrast, white Americans make up 60 percent of the U.S. population but own 82 percent of small employer firms. If financial capital were more evenly distributed and Black Americans enjoyed the same business ownership and success rates as their white counterparts, there would be approximately 860,000 additional Black-owned firms employing more than 10 million people.³

Small business disparities are caused by stark and persistent inequities in wealth and access to capital. While the federal government has largely perpetuated rather than mitigated these challenges, it nonetheless has an important role to play in creating a more equitable business environment.

A future presidential administration could meaningfully reduce small business disparities by revamping a long-neglected agency housed within the U.S. Department of Commerce: the Minority Business Development Agency (MBDA). As the only federal agency created specifically to foster the establishment and growth of minority-owned businesses in the United States, the MBDA has a 50-year record of working in and for communities of color. While the MBDA's effectiveness is currently limited by narrow authority and meager funding, its unique history and structure would allow a future administration that is dedicated to addressing racial inequality to expand

the agency's activities without new authorizing legislation. Under the current congressional appropriations, the president need only include language in his annual budget proposal asking for a significant increase in funding, which then could be used to:

1. Initiate an economic equity grant program that would fund municipal projects that foster wealth creation, opportunity, and minority business development in Black communities.
2. Launch a minority-serving institution (MSI) business center initiative within the MBDA, located in historically Black colleges and universities, tribal colleges and universities, and other MSIs, that would provide substantial grants to operate business incubators and accelerators at every MSI in the country. These business centers would provide startup capital, technical and legal assistance, and other support for current students and community members interested in starting or expanding their own businesses.
3. Create an office of research and evaluation charged with studying barriers to wealth and business development in Black, Indigenous, and other communities of color and providing other MBDA offices and initiatives with technical assistance. Research activities would include conducting pilot and demonstration projects grounded with capital finance based on new and proven program concepts, such as baby bonds or debt-free college, to evaluate their effect on racial disparities in business development.
4. Allow the MBDA to lend low-cost, government-backed capital to licensed minority business investment companies to invest in brown- and Black-owned businesses.
5. Establish an office of advocacy and inter-governmental affairs to score the effects of proposed legislation and regulations on barriers to minority-owned small business creation and success; advance the economic concerns of Black, Indigenous, and other

communities of color in front of various government bodies; and coordinate inter-agency efforts to support minority-owned businesses.

The effectiveness of these and other similar programs will ultimately depend on the amount and sustainability of federal funding. However, if crafted the right way—and if well-funded—revamping and reimagining the MBDA could help meaningfully reduce the racial wealth gap and increase the creation and success of Black-owned businesses over the coming years.

This issue brief provides an overview of the relationship between wealth, access to capital, and the Black-white business ownership gap; background on the MBDA; and a blueprint for reimagining and revamping the MBDA without the need of new authorizing legislation.

The business ownership gap is fueled by racial disparities in wealth and access to capital

The United States is home to inseparable racial disparities in wealth, access to capital, and business ownership. Wealth and capital are a prerequisite rather than just a product of entrepreneurship, and Black Americans have been systematically prevented from accumulating wealth and accessing capital for centuries. Despite this reality, lawmakers have consistently suggested that entrepreneurship seminars, technical assistance, and tax breaks for wealthy investors are all that are needed to produce wealth and opportunity in Black communities. It is more than clear that the United States cannot hope to close the business ownership gap without first addressing racial disparities in wealth and access to capital.

Starting, expanding, and sustaining a business almost always requires existing wealth. In fact, a business owner's personal or family savings is the most commonly relied-upon source of startup capital. However, the typical Black household has just one-tenth of the wealth of their white counterparts—\$17,600 compared with \$171,000.⁶ (see Table 1) Without wealth, would-be Black entrepreneurs can neither invest directly in their companies nor secure col-

lateralized business loans. Perhaps as a result, Black-owned firms are seven times less likely than white-owned firms to obtain business loans in their founding year. Even when Black-owned businesses do obtain loans, they are frequently much smaller in amount than those obtained by their white counterparts. The average Black-owned firm obtains just \$35,205 in total startup capital during its first year compared with \$106,720 for the average white-owned firm.⁸ While the Small Business Administration (SBA) is charged with helping all “Americans start, build, and grow businesses,” its efforts have fallen woefully short in Black communities.⁹ Black Americans make up approximately 13 percent of the U.S. population but receive just 3 percent of SBA loans. If these programs were equitably administered, Black firms would have received an additional \$2.5 billion in loans in fiscal year 2019. Wealth disparities, combined with persistent racial discrimination in the credit system and neglect from federal agencies, play a critical role in maintaining the business ownership gap.

Efforts to foster, promote, and develop Black-owned businesses must go beyond a focus on household wealth and access to capital for Black entrepreneurs. Without wealth at the community level, existing Black-owned businesses may also struggle to maintain their financial footing during sustained economic downturns. During such periods, regular clients and customers may have fewer resources to support their local veterinarian, mechanic, or contractor, even if their services are needed. For example, just 49 percent of Black-owned firms that existed in 2002 survived through the Great Recession compared with 60 percent of white-owned firms. The coronavirus crisis is producing similar results: The number of active Black-owned businesses plummeted by 41 percent between February 2020 and April 2020.

Public Legal Notices

CITY & COUNTY OF SAN FRANCISCO DEPARTMENT OF PUBLIC WORKS

Sourcing Event ID No. 0000002265
(PW HARRISON ST IMPR)
Contract ID No. 100007916

PW HARRISON STREET INFRASTRUCTURE IMPROVEMENTS

Bids will be received online via file upload until **2:30:00 p.m. on October 14, 2020**, after which they will be publicly opened and read online. Refer to Project Manual for further details regarding submission of Bids and Bid opening. Bid Documents, Plan Holders Lists, and Addenda may be downloaded at no cost from the Public Works Electronic Bid Documents Download site at <https://bsm.sfdpw.org/ContractAdmin>. Please visit the Contracts, Bids and Payments webpage at www.sfpublishworks.org for more information (click on Resources > Contractor Resources). Notices regarding Addenda and other bid changes will be distributed by email to Plan Holders.

The Work is located along Harrison Street from Essex Street to the Embarcadero and along Fremont Street from Harrison Street to Folsom Street in San Francisco, California and consists of pavement renovation, curb ramp and bulbout construction, sewer replacement and lining work, water work, structural work, environmental work, traffic signal and electrical conduit work, street and pedestrian lights, landscaping, streetscaping, traffic control and all associated work. The time allowed for completion is 458 consecutive calendar days. The Engineer's estimate is approximately \$8,600,000. For more information, contact the Project Manager, **Arun Bhatia** at 415-987-4872 or Arun.Bhatia@sfdpw.org.

On July 1, 2014, the registration program under section 1725.5 of the California Labor Code went into effect. The program requires that all contrac-

tors and subcontractors who bid or work on a public works project register and pay an annual fee to the California Department of Industrial Relations ("DIR").

No contractor or subcontractor may be listed in a bid or awarded a contract for a public works project unless registered with the DIR as required by Labor Code section 1725.5 [with limited exceptions from this requirement for bid purposes only under Labor Code section 1771.1(a)].

This Project shall incorporate the required partnering elements for **Partnering Level 2**. Refer to Section 01 31 33 for more details.

Pursuant to San Francisco Administrative Code ("Administrative Code") Section 6.25 and Chapter 25 of the Environment Code, "Clean Construction" is required for the performance of all work.

This Contract is subject to the requirements of Administrative Code Chapter 12X, which prohibits contracting in states with laws that allow discrimination. The City is prohibited from entering into any Contract with a Contractor that has its United States headquarters in a state on the Covered State List or where any or all of the work on the contract will be performed in any of those states on the Covered State List. Administrative Code Chapter 12X and a list of states on the Covered State List can be found at: <http://sfgsa.org/chapter-12x-anti-lgbt-state-ban-list>.

The Specifications include liquidated damages. Contract will be on a Unit Price basis. Progressive payments will be made.

The Contract will be awarded to the lowest responsible responsive bidder.

A bid may be rejected if the City determines that any of the bid item prices are materially unbalanced to the potential detriment of the City.

Bid discounts may be applied as per Administrative Code Chapter 14B. LBE Subcontracting Participation Requirement is **25%**. Call Selormey Dzikunu at 415-939-9339 or Selormey.Dzikunu@sfdpw.org for

details. In accordance with Administrative Code Chapter 14B requirements, all bidders shall submit documented good faith efforts with their bids, except those who exceed the above stated LBE Subcontracting Participation Requirement by 35%. Bidders must achieve 80 out of 100 points to be deemed responsive. Bidders will receive 15 points for attending the pre-bid conference, if scheduled. Refer to CMD Form 2B.

A pre-bid meeting will be held by conference call on Thursday, September 17, 2020 starting at 11:00 am

Refer to Section 00 21 13 Appendix B for a guide to joining a Microsoft Teams meeting. Join Microsoft Teams Meeting

https://teams.microsoft.com/dl/launcher/launcher.html?type=meetup-join&deeplinkId=e7c182c8-daa8-486a-b6a0-98c424de0c80&directDl=true&msLaunch=true&enableMobilePage=true&url=%2F_%23%2F1%2Fmeetup-join%2F19%3Ameeting_NmY4ZWIw-MGYtNGU3OS00ZDc5LW13YWYtZjAzMGMyYT-MxY2Zl@thread.v2%2F0%3Fcontext%3D%257b%2522id%2522%253a%25222d5c2cf-ce3e-443d-9a7f-dfcc0231f73f%2522%252c%2522Oid%2522%253a%2522e1fb2aff-3c64-447a-9384-4c720c114518%2522%257d%26anon%3Dtrue&suppressPrompt=true&promptSuccess=true +1 415-906-4659 United States, San Francisco (Toll)

Conference ID: 286 881 653#

For information on the City's Contractor Development Program, call 415-986-3999 or bond@imwis.com.

A corporate surety bond or certified check for ten percent (10%) of the amount bid must accompany each bid. Refer to the Project Manual for further instructions regarding submission requirements for bid security.

Administrative Code Section 6.22(a) requires all construction greater than \$25,000 to include performance and payment bonds for 100% of the contract award.

Class "A" license required to bid.

In accordance with Administrative Code Chapter 6, no bid is accepted and no contract in excess of Threshold

is awarded by the City and County of San Francisco until such time as the Mayor or the Mayor's designee approves the contract for award, and the Director of Public Works then issues an order of award. Pursuant to Charter Section 3.105, all contract awards are subject to certification by the Controller as to the availability of funds.

Minimum wage rates for this project must comply with the current General Prevailing Wage as determined by the State Department of Industrial Relations. Minimum wage rates other than applicable to General Prevailing Wage must comply with Administrative Code Chapter 12P, Minimum Compensation Ordinance.

This Project is subject to the requirements of the San Francisco Local Hiring Policy for Construction ("Policy") as set forth in Administrative Code Section 6.22(g). Bidders are hereby advised that the requirements of the Policy will be incorporated as a material term of any contract awarded for the Project. Refer to Section 00 73 30 of the Project Manual for more information.

Bidders are hereby advised that the Contractor to whom the Contract is awarded must be certified by the Contract Monitoring Division as being in compliance with the Equal Benefits Provisions of Chapter 12B of the Administrative Code within two weeks after notification of award.

If a bidder objects on any ground to any bid specification or legal requirement imposed by this Advertisement for Bids, the bidder shall, no later than the 10th working day prior to the date of Bid opening, provide written notice to the Contract Administration Division, San Francisco Public Works, setting forth with specificity the grounds for the objection.

Right reserved to reject any or all bids and waive any minor irregularities.

SMALL BUSINESS EXCHANGE**

Business Loans for Women Entrepreneurs

Continued from page 3

In 2017, for example, all-female teams received only 2.2% of venture capital dollars; all-men teams received 16x as much money as women did. The numbers are even more discouraging for minority women-owned businesses, which were part of just 0.2% of VC deals that year.

While the percentage of VC money flowing to women is moving in the right direction—the figure was 1.9% in 2016—it's still abysmally low.

The same holds true with traditional bank loans. Men have a better chance of qualifying for small business financing from a bank than women do. According to one study, men are 15%–20% more likely to be approved for a small business loan. Overall, women are less likely to receive any kind of business financing compared to men.

Suffice it to say there's a lot of room to grow.

What Are the Best Business Loans for Women Entrepreneurs?

Though the current state of small business financing for women leaves much to be desired—and many banks and venture capitalists, statistically, may not be a viable option—there are still a number of small business loans for women. Here are five of them.

1. Loans From the Small Business Administration (SBA)

The SBA, through partnerships with financial firms, offers a number of small business loans for women. These loans—which are available to

businesses that might not qualify for other forms of funding and are relatively hard to get—tend to have lower interest rates because the SBA puts a ceiling on how much money approved lenders can make off each loan.

For example, 7(a) loans that are over \$50,000 with terms shorter than seven years can have a 2.25% maximum interest rate tacked on top of the prime rate. Loans that are over \$50,000 but longer than seven years can have a 2.75% maximum interest rate added to the prime rate.

The Office of Women's Business Ownership suggests successful applicants will need to submit:

- A solid business plan
- A detailed credit report
- A plan for how you'll use the money you're requesting
- A forecast of your financial projections
- A personal guarantee or collateral (in most cases)

Because a government entity is involved in the process, SBA loans can take quite a while to secure. If you need money quickly, this option probably isn't for you.

Pros of Applying for SBA Loans:

- Financing for businesses that struggle to get funding
- Relatively low interest rates
- Flexible loan sizes and terms

- Cons of Applying for SBA Loans:
- May take a long time to secure
- Difficult to qualify for
- Collateral or personal guarantee is required

2. Loans from a Local Female-centered Group in Your Region

Many states have local groups that are dedicated to supporting women-owned businesses. For example, Women's Economic Ventures funds qualifying businesses based out of Ventura and Santa Barbara Counties in California.

Under this program, new businesses can secure between \$250 and \$25,000 if they're approved while businesses that have been open for at least 18 months can qualify for up to \$50,000 in financing. Money obtained through this program can be used to buy assets, make improvements to your office or store, and cover your operating expenses. It cannot be used to refinance unrelated debts, pay back taxes, buy real estate, or consolidate loans.

Applicants will need to pay a \$35 or \$50 application fee and, if approved, pay a 2% loan fee when the contract is signed. Interest will be assessed at a 10%–15% fixed rate. The average loan term is 3.5 years and there aren't any penalties for repaying the loan in full ahead of its due date.

If you're requesting more than \$5,000, you'll need to submit the following information:

- Business plan

- Loan application
- Credit check authorization
- Personal financial statements
- Cash flow projections
- Income tax information
- Additional documentation

If you're requesting less than \$5,000, you'll need to submit everything but the business plan.

Don't live in California? Not a problem. A quick Google search should help you track down similar groups that fund businesses in your area.

Pros of Working With Local Groups:

- Financing for women-owned businesses
- Can use the funds several ways
- No early repayment penalties
- You have enough time to pay it back

Cons of Working With Local Groups:

- Dependent on location
- There may be several fees tacked on
- Loans might not be big enough
- You'll have to submit a lot of documents and information

Public Legal Notices

UNIVERSITY OF CALIFORNIA, IRVINE MEDICAL CENTER

ADVERTISEMENT FOR DESIGN BUILDER PREQUALIFICATION

Subject to conditions prescribed by the University of California, Irvine Medical Center (“UCIMC”), responses to the University’s prequalification documents for a Design Build contract are sought from proposers for the following project:

B63 Energy Efficiency Retrofit, Project No. 997605

PREQUALIFICATION OF PROSPECTIVE PROPOSERS: The University’s primary objective in utilizing the design build approach is to bring the best available integrated design and construction experience to this project. The University has determined that proposers who submit proposals on this project must be prequalified. Prequalified proposers will be required to have the following California contractor’s license:

C-10 - Electrical Contractor &

C-20 - Warm-Air Heating, Ventilating and Air Conditioning Contractor

DESCRIPTION OF WORK: UCIMC is soliciting proposals from qualified Design Build (DB) teams for the execution of the Building 63 Energy Efficiency Retrofit project. This project will be delivered as an energy brief design-build (EBDB) project. The DB team should anticipate participating in the full project timeline, with responsibilities to include compiling a complete project design package that meets the performance parameters outlined for each energy efficiency measure. The energy efficiency measures include chiller replacement, installation of a dedicated HVAC system, interior/exterior lighting improvements, retro-commissioning, new variable speed motors, and controls upgrade.

PROCEDURES: The prequalification process will result in the selection of finalists who will be prequalified and will be issued proposal documents for this Project. The prequalified proposers will submit price and technical proposals. The technical proposals will be scored according to an established scoring system. The price will be divided by the score to determine a price per technical point. The prequalified proposer submitting the lowest price per technical point will be the apparent low proposer for the Project.

After receipt of the prequalification documents, the University will review and determine a preliminary point score for each submittal. Requests for clarifying information and additional data will be made at this time, if required. After receipt and review of the clarifications and additional data each prequalification submittal will receive a final point score.

Scoring of proposers will be determined by the application of an established rating system, requirements of which are contained in the Prequalification Questionnaire.

A proposer who receives 70 or more points out of a possible 100 points based on the established rating system will be invited to participate in the Request for Proposal step

Proposers will be notified whether or not they have been prequalified after the University evaluates the prequalification submittals.

PREQUALIFICATION SCHEDULE

QUESTIONNAIRE AVAILABLE: On Wednesday, September 16, 2020 @ 2:00pm, prequalification questionnaires will be available upon request. Contact Kim Kerwin @ khau@uci.edu.

QUESTIONNAIRE DUE: On September 30, 2020 @2:00pm, completed prequalification documents will be received at: UCIMC, Planning Administration, Building 27, Room 136, 101 The City Drive

South, Orange, CA 92868. No prequalification documents will be accepted after 2:00pm on 9/30/2020. However, the University reserves the right to request, receive, and evaluate supplemental information after the above time and date at its sole determination.

PROPOSAL SCHEDULE

Following is the anticipated proposal schedule:

1. Proposal Documents available to the prequalified proposers – 10/07/2020.
2. Proposals received – 10/30/2020.
3. Proposals evaluated and the apparent low proposal determined – 11/13/2020.

The exact dates, times, and location will be set forth in an “Announcement To Prequalified Proposers.”

The University reserves the right to reject any or all responses to Prequalification Questionnaires and any or all proposals and to waive non-material irregularities in any response or proposal received.

Proposal Security in the amount of 10% of the lump sum price proposal, excluding alternates, shall accompany each proposal. The surety issuing the Bid Bond shall be, on the proposal deadline, listed in the latest published State of California, Department of Insurance, list of “Insurers Admitted to Transact Surety Insurance in this State.”

All insurance policies required to be obtained by Proposer shall be subject to approval by University for form and substance. All such policies shall be issued by a company rated by Best as A- or better with a financial classification of VIII or better, or have equivalent ratings by Standard and Poor’s or Moody’s. The Certificate of Insurance shall be issued on the University’s form.

Prospective proposers desiring to be prequalified are informed that they will be subject to and must fully comply with all of the proposal conditions including

100% payment and 100% performance bonds.

All information submitted for prequalification evaluation will be considered official information acquired in confidence, and the University will maintain its confidentiality to the extent permitted by law.

Every effort will be made to ensure that all persons have equal access to contracts and other business opportunities with the University within the limits imposed by law or University policy. Each Proposer may be required to show evidence of its equal employment opportunity policy. The successful Proposer and its subcontractors will be required to follow the nondiscrimination requirements set forth in the Proposal Documents and to pay prevailing wage at the location of the work.

The work described in the contract is a public work subject to section 1771 of the California Labor Code.

No contractor or subcontractor, regardless of tier, may be listed on a Proposal for, or engage in the performance of, any portion of this project, unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5 and 1771.1.

This project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

The successful Prequalified Proposer shall pay all persons providing construction services and/or any labor on site, including any University location, no less than the UC Fair Wage (defined \$15 per hour as of 10/1/17) and shall comply with all applicable federal, state and local working condition requirements.

Building for Manufacturing: Construction Leaders Share Winning Strategies

Continued from page 1

experience a schedule impact. When everything is documented with logs and photos, they can go into the software and see it first hand.

Overall, this makes our communications with owners better. It helps us substantiate some of those special situations that may result in changes to their project.

How do you think about rolling out technology in your company?

Travis: The Helm Group is a very technology forward company. We’ve taken a very deliberate and patient approach to creating a tech stack to the way we want it. Autodesk helped us build out that strategy initially which we had started on a handful of pilot projects. But, all of a sudden, we’ve had to deploy it rapidly. Once the pandemic started, we had to ramp up and proceed with roll out on any new projects that we could go on. We have a template in place from a technology standpoint. Although each project is unique and specific, the template allows us to start up much easier.

However, the biggest challenges we have been with dealing with is change itself. You’re going to have a certain percentage of people who are resistant or hesitant to change. We’ve had detailers that have been with our company for

20 years. We have to change their mindset that while it’s the same work in theory, new technology will make them more productive and efficient. We are definitely a company that is not afraid to try new things so they’re pretty used to having to adapt. But at the same time, we don’t want to overwhelm them. We like to roll out changes in reasonable bite size buckets so we’re not throwing a bunch of new stuff to people all at once.

As companies look to scale in the manufacturing space with the help of technology, what advice would you give them?

Travis: I’d stress that we need to embrace the idea of being collaborative and getting things up front. This is something that I’ve been trying to

evangelize for in the last couple of years and I even spoke at Autodesk University about this.

In an ideal world, firms need to get involved in the project early enough where they can facilitate key conversations ahead of time digitally before they become an issue. We really need to have these conversations sooner. As we move towards producing more modular buildings or fabricated systems to build safer and faster, we can’t just start having these conversations three months after the contract has been signed.

Emily: Standardization is key and can only be achieved through technology support. Anyone in a growing firm knows that the right processes need to be in place to support growth. Tools like PlanGrid force you to start looking at standard

processes. When projects fall under the category or industrial or manufacturing, they are all so different and complex from your standard construction project. For Pond we have a variety of project types in this space including existing buildings renovations, greenfield construction, and building enhancements or additions.

“When a standard process is in place, a project manager can be transitioned from one project to the next and they’re going to have the tools to execute that project in almost exactly the same way.”
