

Augmenting Your Construction Workforce for Success

Image by senivpetro on Freepik

[Article originally appeared in Autodesk Construction Cloud Blog. <https://construction.autodesk.com>]

By **Jadie Fanganello**

Construction companies remain as resilient as ever, but we'd be remiss if we didn't talk about the very real challenges our industry faces. The most pressing one, of course, is the labor shortage.

A survey by the Associated General Contractors of America (AGC) and Autodesk found that 85% of construction firms have open positions they're trying to fill, and 91% struggle to find qualified candidates for available roles.

These challenges are further exacerbated by supply chain issues—such as the 65% of firms reporting that supply chain challenges have delayed their projects.

It's no wonder then that construction companies are experiencing project delays, with 13% of firms saying they've had to postpone projects in 2023.

It's not all doom and gloom, however. While these challenges seem daunting, there are steps you can take to augment your workforce.

Construction technology has come a mighty long way in the past few years, and forward-thinking companies know how to leverage tech to support their teams.

Let's take a closer look at how you can do it, too.

1. Leverage artificial intelligence, machine learning, and deep learning

AI (and its subsets—machine learning and deep learning) can be a touchy subject for people because they're often seen as technologies that can replace humans. A survey by Pew Research found that over a third of workers in the US think AI will hurt the workforce, while just 13% think otherwise.

While AI concerns are valid, it's important to remember that artificial intelligence is a tool, not a replacement. When used in a thoughtful and ethical way, AI in construction empowers your team to work faster, reduce stress, and ultimately drive better decision-making.

This streamlines the process of ensuring safety compliance on-site, making it easier to identify potential risks and rectify them quickly.

Or consider Construction IQ, a built-in AI and machine learning feature in Autodesk Construction Cloud, which helps you predict, prevent, and manage risk. Construction IQ utilizes sophisticated algorithms and natural language processing to highlight higher-risk design, quality, or safety issues. Teams can take action sooner rather than later and prevent costly impacts downstream.

2. Consider augmented reality, virtual reality, and the metaverse

AR, VR, and the metaverse are distinct (but related) technologies that have the potential to redefine how construction teams collaborate.

AR can overlay digital elements—e.g., models or design data—onto the real world. Many teams use AR technology to visualize how a finished project will integrate with its surroundings. Another excellent use case is leveraging augmented reality to spot potential design clashes, thus avoiding costly work down the road.

VR, on the other hand, immerses users in a digital realm. Project stakeholders can operate VR headsets to experience a virtual construction site where they can conduct pre-emptive walk-throughs or safety training without physically being there.

Meanwhile, the metaverse gives teams an opportunity to "meet" and collaborate in a shared virtual space, facilitating real-time discussions on digital models and projects.

Together, these technologies bridge the gap between digital design and physical implementation. They empower teams to visualize, strategize, and execute projects more efficiently—which is a big win, especially for firms struggling with talent shortages.

3. Use robotics

Jobs that require people to be on the construction site are physically demanding. From carrying heavy loads to working from great heights, these jobs strain workers and lead to potential injuries. The labor-intensive nature of construction sites may also deter people from considering a career in construction.

GSA Administrator praises Executive Order on Artificial Intelligence

[Article originally appeared in www.gsa.gov]

U.S. General Services Administration (GSA) Administrator Robin Carnahan issued the following statement in support of the executive order signed by President Biden on Artificial Intelligence:

"This crucial Executive Order on AI is another important example of how the Biden-Harris Administration is leading the way in responsibly using emerging technologies to benefit the American people. Today's action represents a comprehensive approach—grounded in key principles such as safety and privacy—to ensure that we can leverage AI to help government deliver better for the people we serve, while mitigating its risks."

"GSA is proud to play key roles in supporting this Executive Order to help ensure the federal government leads the way in the responsible, effective use of AI. For example, through today's actions, GSA is calling more tech talent to public service through the National AI Talent Surge. We hope to attract many more AI experts to consider working at places like GSA and our Technology Transformation Services as well as through the governmentwide tech programs we coordinate."

"Opportunities are opening up at the new AI.gov for everyone from early-career professionals who can apply to join our U.S. Digital Corps to more seasoned experts who can apply to serve as Presidential Innovation Fellows working closely with top leaders across government. We're looking for talent to help us leverage AI across government as well as to build capacity in key areas such as AI regulation and R&D."

Ann Lewis, director of GSA's Technology Transformation Services (TTS), added:

"We are excited to support this executive order as it is taking important steps to promote the powerful and responsible use of AI in GSA's programs and across the federal government. Through the EO, we will build on GSA's work in AI, including our AI Center of Excellence which will continue to work with agencies to help them understand and responsibly implement AI to support a great digital experience for the public."

"Our FedRAMP program, which ensures cloud services used by the government are secure, will establish strategies to ensure that cloud-based AI products are prioritized into the authorization path so that agencies have the tools they need to more effectively serve the public."

"I look forward to serving on the AI and Technology Talent Task Force to accelerate the hiring of more tech talent in AI across government."

Governor Newsom Signs Assembly Bill 258 into Law

Democratizing State Resources to Empower Minority-Owned Businesses in California

[Article originally appeared in <https://calasiancc.org>]

The California Asian Pacific, African American and Hispanic Chambers of Commerce celebrated a significant legislative win for California's small business community – the Small Business Information Act, Assembly Bill (AB) 258, authored by Assembly Majority Leader Emeritus Eloise Reyes, was signed into law by Governor Gavin Newsom over the weekend.

"I introduced AB 258 after listening to my local small businesses to understand how to best serve them. We heard loud and clear that streamlined access to resources like state grants are a priority, and I'm thrilled that Governor Newsom agreed, signing legislation into law that will create the Small Business Portal to support small businesses in the Inland Empire and across California," said Reyes. "I want to express my gratitude to my colleagues in the Legislature and the

California Asian Pacific, African American, and Hispanic Chambers of Commerce for their unwavering support in this effort."

"Small businesses need to have information easily accessible and know what tools may be available to them – information that can help small business owners make decisions to be successful and grow" said Julian Cañete, President of the California Hispanic Chambers of Commerce. "Creating easier access to these various vital tools is what AB 258 will do. Thank you to Governor Newsom for your signature."

AB 258 will make necessary improvements to support minority-owned businesses and will improve accessibility to state resources for the communities that need it most. Many small businesses in California who are looking to partner with the state do not have the technical expertise to navigate the necessary state processes such as access to technical assistance, the procurement

process, and locating grants. Democratizing and illuminating state processes will provide small businesses more opportunities to grow and ensure public resources are reaching the hardest-hit communities.

"We commend the Governor's approval of AB 258, a crucial step to support small businesses" said Ahmad Holmes, Chief Operating Officer at the California African American Chamber of Commerce (CAACC). "As co-sponsors, CAACC is proud to unite with our partners in creating a more accessible business environment. AB 258's Go-Biz web portal will benefit minority entrepreneurs by streamlining access to essential resources. This legislation highlights our commitment to economic growth and equity in California. We thank Assemblywoman Eloise Reyes for her leadership and look forward to empowering businesses and promoting economic equity."

Pat Fong Kushida, President & CEO of the California Asian Chamber shared, "Our deepest gratitude and appreciation go out to Assembly Majority Leader Emeritus Eloise Reyes, for her commitment in ensuring that California's small businesses have an equal seat at the table. And to our partners at the California African American and Hispanic Chambers of Commerce – our collective voices have truly made a difference and small businesses up and down the state will have unprecedented opportunities."

"We applaud Governor Newsom for signing AB 258 and recognizing the small business owners that play a critical role in our economy" said Kushida. "This bill will bring us one step closer to eliminating the accessibility gap and providing the diverse small business community with equal opportunities."

UCLA Latino Policy and Politics Institute Launches The Economic Recovery and Entrepreneurship Project

[Article originally appeared in <https://calasiancc.org>]

The UCLA Latino Policy and Politics Institute (UCLA LPPi) has launched The Economic Recovery & Entrepreneurship Project (TEREP), a new research portfolio focusing on ethnic entrepreneurship in California, Texas, and Arizona. The first report published today – focusing on California – provides insights on ethnic small business owners' access to capital, use of digital technology and environmentally sustainable practices, and experiences with COVID-19 and climate change.

After conducting over 600 phone surveys with California small business owners and executives, this groundbreaking study has revealed several key findings:

- **Black- and Latino-owned businesses face more barriers than white-owned businesses to accessing financial capital.**

- **Twice as many ethnic-owned businesses reported to have been largely negatively affected by the COVID-19 pandemic than white-owned businesses.**
- **Although engagement in online technology for sales is not high among ethnic-owned businesses, they were more likely to report falling victim to cybersecurity attacks. Asian-owned businesses, especially, reported experiencing cybersecurity attacks at the highest rate.**
- **Black and Asian-owned businesses expect climate change to impact their business's finances and workers.**
- **White- and Latino-owned businesses reported a greater level of understanding of the impacts of environmental sustainability practices on their business than Black and Asian-owned businesses.**

"As ethnic-owned businesses continue to grow, their equitable integration into economic development processes and environmental sustainability planning remains imperative, given their significant contributions to community well-being through job creation, revenue generation, and the promotion of social and cultural diversity," said Silvia R. Gonzalez, Director of Research at the UCLA Latino Policy and Politics Institute. "This research arrives at a crucial time as California policymakers, advocates, and business leaders seek to continue addressing the economic impacts of the pandemic and are hearing calls to foster a more inclusive economy that supports the growth of all communities," said Julia Silver, Research Analyst for the project.

The new research also includes interviews with six California business owners and executives. Interview findings speak to the difficulties that ethnic-owned businesses are currently facing.

Dora Herrera, executive manager at YUCA'S, a family-owned Mexican restaurant and one of the study's interviewees, shared a firsthand account of how the COVID-19 pandemic impacted the vitality of her business. "I told my sister, 'If the money doesn't come in Friday or Saturday, we're gonna have to close on Monday.' And the money, the grant, dropped on Saturday. We were that close to just closing." Herrera's experience is just one of the many accounts captured in the study.

This report was made possible by the generous support of the Wells Fargo Small Business Philanthropy, the JP Morgan Chase Global Philanthropy, and the James Irvine Foundation.

Request for DBE Subcontractors and Suppliers for:
**The OLSD Sewer Collection System Pipeline
Rehabilitation and Replacement Project Phase 7
Job No. 45-14607**

BID DATE: DECEMBER 7TH, 2023 @ 2:00PM

We are soliciting quotes from all qualified and/or Certified Disadvantage Business Enterprise including MBE, WBE to provide bids/quotes for the following (including but not limited to): Trucking, Traffic Control Services, SWPPP, Sweeping, Saw Cutting, Paving, Striping, etc., as well as sewer material suppliers such as HDPE, CIPP, Manholes.

Plans and Specs available via email at no cost to interested firms.

Subcontractors and suppliers are encouraged to submit bid proposals to Projects@andesconst.com by December 6th, 2023.

Brackish Groundwater Reclamation Project Torrance Groundwater Expansion Project
Location: 20500 Madrona Avenue, Torrance, CA 90503
RFP is due December 1st, 2023

The project includes a site make ready package and design and construction of the Brackish Groundwater Reclamation Project Torrance Groundwater Expansion Project; the project will be designed with a focus on Workplace Quality and Safety, Reliability, and Resiliency.

Scope of Services requested at this time in support of this project include associated construction services for the site make ready package, and Stage 1 Preconstruction Services required for the design, permitting, and GMP development of the AWWP Project and ROC pipeline; engineering, architecture, traffic design, geotechnical services, mapping, underground utility location, civil scopes, etc.

Additional outreach requests for statements of qualifications for scopes associated with Phase 2 and the Construction of this project would come at a later date.

We encourage **DBE/DVBE/MBE/WBE/SBE/OBE** subcontractors to submit. We will provide additional information, Request for Proposals and related project documents as required.

We are willing to assist all **DBE/DVBE/MBE/WBE/SBE/OBE** subcontractors in obtaining bonds, lines of credit, and/or insurance.

For additional information about this project or to submit qualifications please contact Hunter Williamson, hcwilliamson@mccarthy.com, (801) 699-5998.

If interested in being considered to provide equipment, supplies, professional or construction services on our team, please submit a line card, capabilities statement, and rate sheets to the **McCarthy | Jacobs team** by **November 21, 2023**.

Sub-Bids Requested from qualified LBE/DBE Subcontractors and Suppliers for:

SUNOL VALLEY WATER TREATMENT PLANT OZONATION
CONTRACT NO. WD-2897

Owner: San Francisco Public Utilities Commission
Location: Sunol, CA

Bid Date: November 30, 2023 @ 2:00 P.M.

667 Brea Canyon Road, Suite 30 • Walnut, CA 91789
Phone: (909) 595-4397, Fax: (909) 444-4268
Contact: Lori Olivas, lori.olivas@jfshea.com

J.F. Shea Construction, Inc. is soliciting your participation in the preparation of this bid.

We are particularly interested in bids from subcontractors/suppliers for the following work items:

Aggregates, Trucking, Drilled Concrete Piers, AC Paving, Chain Link Fencing, Soldier Beam Retaining Walls, Landscaping, Ready-Mix Concrete, Reinforcing Steel, Precast Concrete Vaults, Miscellaneous Metals, Steel Decking, FRP Components, Waterproofing, Insulation, Roofing, Sheet Metal, Sealants, Metal Doors/Frames/Hardware, Floor Doors, Watertight & Gastight Access Doors/Hatches/Frames, Aluminum Storefront, Skylights, Glazing, Louvers, Metal Framing & Drywall, Tiling, Acoustical Ceiling Panels, Resilient Base, Resinous Flooring, Painting & Coatings, Signage, Wire Mesh Partitions, Toilet & Bath Accessories, Fire Protection Specialties, Metal Storage Shelving, Bird Control Devices, Laboratory Casework, Fabricated Canopies, Cathodic Protection, Fire Suppression, HVAC, Lifting Equipment, Monorail Hoist, Equipment, Electrical and Instrumentation.

Plans and Specifications: An electronic version of the bid documents may be obtained by emailing: qbd@sfwater.org with this Contract No. WD-2897, your firm's name, full address, email address, phone number, copy of Contractor's license or business card, and a copy of a government-issued identification.

Note: Prior to receiving these materials, all requestors will be required to complete, sign, and comply with a Confidentiality Agreement. Plans may also be viewed at our Walnut Office. J.F. Shea Construction, Inc. is an equal opportunity employer and intends to negotiate in good faith with interested LBE/DBE firms and intends to utilize the lowest responsive bidder. J.F. Shea expects potential subcontractors to be bondable. J.F. Shea will pay for up to 1% for subcontractor bond costs. Subcontractors and Suppliers are expected to bid per plans and specifications, including requirements for warranties. Standard manufacturer's warranties, if not in conformance with owner's specifications, will not be accepted.

Jacobs

ATTENTION: SUBCONTRACTORS

Jacobs has been selected as the Design-Build Contractor for the **Donald C. Tillman (DCT) Advanced Water Purification Facility (AWPF)**. Jacobs would like to invite all interested businesses including local, disadvantaged, minority, small and women-owned businesses (DBE, MBE, SBE, WBE) with experience including at least two UVAOP installations in California for drinking water or potable reuse applications using the same reactor make/model proposed, to submit a Proposal.

Jacobs is soliciting Proposals for the following supplier package: **UVAOP System** with a due date of **December 1, 2023**.

To learn more about the DCT AWWP project and to gain access to the prequalification documents, we invite you to contact Kelly Vorenkamp at the follow email: Kelly.Vorenkamp@Jacobs.com

SUKUT CONSTRUCTION

Is requesting quotes from certified and qualified DBE (MBE, WBE, SBE, SBRA, LSAF, Hub Zone) Subcontractors, Suppliers, and Service Providers for the following (but not limited to) work:

SUBCONTRACTORS / SERVICE PROVIDERS

Asphalt Paving, Cathodic Protection, Cold Planing, Concrete Flatwork, Dewatering, Electrical, Hydroseed, Manholes, Potholing, Project Scheduler (CPM), Safety Representative, Saw Cutting, Shoring, Signage, Street Sweeping, Striping, Survey, SWPPP, Traffic Control, Trenchless Installation, Trucking, Video Recording of Existing Conditions, Welding, Welding Inspection

SUPPLIERS

Aggregates, Asphalt Concrete, BMP's, Cathodic Protection, Conduit, Diesel Fuel, Equipment Rentals, Erosion Control, Miscellaneous Metals, Pipeline Materials, Precast Concrete Structures, Pump Rentals, Ready Mix Concrete, Shoring, Traffic Control

Harvest Water Central-South Pipelines Project, Elk Grove CA
Contract No. 6024

PLANT

TO ALL POTENTIAL LBE SUBCONTRACTORS

Plant Construction Company, L.P. is requesting bids for the following trade packages for Casa Esperanza project. **Local Business Enterprises (LBE's) certified by Contract Monitoring Division (CMD) are highly encouraged to bid. There will be a 20% LBE goal on the entire project.**

**Casa Esperanza
 Plant Project Number: 2023008
 Address: 3055-3061 16th Street San Francisco, CA 94103
 Owner: Mission Housing Development Corp**

Project Description: The current development consists of 25 studios on floors two and three and a group kitchen, a former retail space on the ground floor, and a basement level with mechanical and electrical equipment. The building does not have an elevator, all levels are accessed by stairs. The rehabilitation scope is limited to the ground floor only to include a new lobby, mail area, small retail area, management and services offices, a new stair to the basement, all gender bathroom, exercise room and staff kitchen, and trash room. The scope includes new mechanical and electrical work in the ground floor. The scope also includes a new deck at the rear yard. The rehabilitation includes one new exterior opening and painting the building. The rehabilitation does not include site work in the public right of way. Construction Type is assumed V-B wood framed with steel seismic braces at the basement and ground floor. The rehabilitation scope also includes adding a fully current code compliant sprinkler system to the ground floor which is a Design Build (Delegated Design) scope. The rehabilitation scope also includes adding any Fire Alarm upgrades to the building which is a Design Build (Delegated Design) scope. The residential floors of the building have sprinkler systems.

Plant is seeking qualified LBE's for the following trade packages, but not limited to the following:

Selective demolition, abatement, concrete, wood framing, finished carpentry, plastic fabrications, roofing, flashing & sheet metal, doors & frames & hardware, windows, plaster, drywall & framing, tiling, resinous flooring, carpet flooring, painting, miscellaneous specialties, signage, toilet partitions & bath accessories, appliances, window coverings, fire protection, plumbing, HVAC, and electrical.

Link to the Bid Documents:

Bid documents are in the attached link below. Please upload your bid onto building connected. Please email Richard Mak below for an invite onto building connected. **Bids are due on 11/15 at noon.**
<https://plantconstructioncompany.box.com/s/5qbg8n5ovs3pshfkkem0kwn24a18h98h>

To be added to our Subcontractor List for this and other project opportunities subcontractors are requested to contact Plant Construction Company, L.P.'s Workforce Development & LBE Liaison: Richard Mak at (415) 550-5952 or by email at Richardm@plantco.com

W.A. Rasic is requesting bids for the following trades and/or material supplies:

Electrical, AC Cold Milling & Asphalt Cap Paving, Sawcutting, Trenchless Crossings, Striping, Welding, Install 14" – 36" Steel & HDPE Pipeline including Appurtenances, Furnish Welded Steel & HDPE Pipe, Furnish Sand & Gravel, Furnish Ready Mix Concrete, Furnish Asphalt, Traffic Control Signs & Equipment, Inspection Services (Compaction / Welding), Cathodic Protection, Trucking & Disposal, Environmental Exclusion Fencing, Survey, Geotechnical Instrumentation & Monitoring, Traffic Control Plans / Engineering, Equipment Rental, Shoring Equipment

NAICS Codes:

212321, 237110, 237310, 237990, 238190, 238210, 238910, 238990, 324121, 326122, 327320, 331110, 484110, 532490, 541330, 541370, 541380, 541990

Plans & Specifications are available at no cost to interested firms by either contacting W.A. Rasic Construction, downloading from the Sacramento Regional County Sanitation District or by utilizing the following FTP link: <https://www.dropbox.com/scl/fo/08ub6xhqwjih4y222lkpg/h?rlkey=ye2q3md5e0biq374isd1cd0c1&dl=0>

W.A. Rasic will assist in obtaining bonds, lines of credit, insurance, equipment, supplies and materials upon request. W.A. Rasic will consider each DBE, MBE, WBE, SBE, SBRA, LSAF, and HUD quotes, including those that are broken down into economically feasible units as well as arrange delivery schedules to facilitate and encourage maximum bidding participation. W.A. Rasic also encourages a consortium of DBE, MBE, WBE, SBE, SBRA, LSAF, and HUD firms when a contract portion is too large to handle individually and to subcontract with DBE, MBE, WBE, SBE, SBRA, LSAF, and HUD firms whenever possible. Subcontractors must have a valid California Contractors License and must be registered with the Department of Industrial Relations (DIR) as required by Section 1725.5 of the Public Contract Code. Subcontractors will be required to execute W.A. Rasic's standard subcontract agreement and general insurance requirements. A copy of our subcontractor agreement and insurance requirements is available in electronic format upon request. W.A. Rasic reserves the right to require each subcontractor to provide payment and performance bonds in the amount of 100% of the subcontractors bid. Bond Premium will be reimbursed up to a cost not to exceed 2.0%. W.A. Rasic is an equal opportunity employer and Union signatory Contractor.

Request for Qualification (RFP)

RFP Period: October 26, 2023 – November 21, 2023

Turner Construction Company (Turner) and the University of California, Berkeley are seeking qualified Bidders for the following project:

**Moffitt Library – University of California, Berkeley
 UCB Project No. 12738A**

Turner Construction Company has been selected as the Construction Manager for this project. The project is designed by BNIM Architects and MEP by Introba. Turner and UCB are facilitating an early release bid package that will be administered through Turner and contracted with UCB directly. This project is located at the heart of the campus, bounded by University Drive to the North, California Hall to the South, and Memorial Pool to the East. The Moffitt Library is a popular hub for undergraduates with the focus to cultivate a welcoming and inclusive environment. This project is an interior renovation of levels 1, 2, & 3 to create new spaces for students to study as well as upgrading aging HVAC and life safety systems within the entire building.

This RFP will be limited to early purchase of Electrical and HVAC equipment only by vendors/ manufacturers.

Turner is currently seeking proposals for the following:

Bid Package #	Trade Package
23.00	HVAC EQUIPMENT
26.00	ELECTRICAL EQUIPMENT

Pre-Bid Meeting will be held on **November 7, 2023**. Pre-Bid RFI's will be due **November 10, 2023 at 3:00pm PST**. Vendor/Manufacturer proposals will be due no later than **November 21, 2023 at 3:00pm PST**.

Turner has a 20% UBE [MBE/WBE/DVBE/LGBTQ+] goal for this project.

University Project Reference: <https://www.lib.berkeley.edu/about/news/moffitt-fall-2022>

Turner

REQUEST FOR QUALIFICATION (RFQ) and RFQ's FROM LBABE/LIABE/SBE/VSBE
RFQ Period: 11/10/2023 – 12/01/2023

Turner Construction Company (Turner) is seeking RFQs for the following Trade Packages for:
Oakland International Airport
T1 Ticket Counters
Approximate Construction Value: \$4,265,041
Owner: Port of Oakland

Project Description:

Replacement of existing ticketing counters in Terminal 1 at the Oakland International Airport. This will involve demolition of the existing ticket counters, abatement/demo of the existing soffit above the ticket counter, demolition of the existing soffit behind the ticketing counter, installation of the new soffit and installation of new ticket counters in Terminal 1. The scope of work includes Electrical work and support from HVAC for new ticket counter installation.

Only those Subcontractors who meet pre-qualification criteria and are deemed pre-qualified to perform work on their respective trades will be invited to submit a bid. Trade Subcontractors who do not submit the prequalification information and are not pre-qualified will not be allowed to bid the project.

PREQUALIFICATION OF PROSPECTIVE TRADE PARTNERS:

Prequalifications are to be submitted online via <https://www.turnerconstruction.com/subcontractors>. In addition to the online Prequalification, the documents listed below will need to be provided by the trade partner. Contact Jose Garcia, jogarcia@tcco.com for more information.

1. Port of Oakland Certifications: Local Business Area Business Enterprise (LBABE), Local Impact Area Business Enterprise (LIABE), Small Business Enterprise (SBE) & Very Small Business Enterprise (VSBE).

2. Include your Department of Industrial Relations Certificate.
(Note: For trades submitting multiple packages, please pre-qualify for each trade package.)

Turner is seeking RFQs for the following trade packages:

BID PKG	TRADE PACKAGE DESCRIPTION	EST VALUE
01.00	General Requirements	\$240,374
02.00	Demolition	\$108,734
06.00	Millwork/Baggage Scales	\$1,437,500
09.00	Temp Barricades/Drywall/Floor Protection	\$161,460
09.91	Painting	\$36,021
23.00	HVAC	\$13,110
26.00	Electrical/Data	\$288,357

Project Small and Local Utilization Commitment: Turner has a 60% overall local participation goal, specifically 30% LBABE/LIABE, 20% SBE and 10% VSBE goal for this project. Persons claiming local business status shall apply to the Social Responsibility Division at least seven (7) business days before the bid or proposal due date for certification as a local business and return the application with documentation evidencing its business location, the length of time its business was located and operated in the LIA or LBA. Applications may be completed at <https://srd.portofoakland.com/index.aspx> by clicking on "Register New Company?", completing all required fields to create a new company, followed by completing all fields (i.e. Main Info, Contacts, Profile, NAICS Codes, Trucking, Doc/Supp D, Site Visit) in the application and submitting to the Port for review.

Local Hiring Goals: Contractors are required to make a good faith effort to reach the following hiring goals.

• Overall: 50% of all hours are to be worked by Local Impact Area (LIA) residents, on a craft-by-craft basis, if workers are available, capable and willing to work on covered projects. The LIA consists of the cities of Oakland, Alameda, San Leandro and Emeryville.

• Failing that, 50% of all hours are to be worked by Local Business Area (LBA) residents, on a craft-by-craft basis, if workers are available, capable and willing to work on covered projects. The LBA includes all cities not mentioned above in Alameda and Contra Costa Counties.

• Apprentices: 20% of all hours, on a craft-by-craft basis, are to be worked by apprentices.

• 100% of all apprentice hours are to be worked by LIA residents, if such apprentices are available, capable and willing to work on covered projects. Failing that, 100% of all the apprentice hours are to be worked by LBA apprentices.

• 25% of apprentice hours shall be worked by Disadvantaged Workers 1, if available.

• New Hire: General contractor and/or its subcontractor must hire at least 1 New Hire Apprentice 2 (NHA) for the first \$1M of construction bid value. For each additional \$5M (beyond the first \$1M), at least 1 additional New Hire Apprentice shall be hired. Each NHA must work at least 500 hours, unless waived by Social Justice Committee.

Contractors can obtain up to half credit towards the above goals by utilizing LIA apprentices "off-site" (i.e., non-MAPLA

projects). Contractors using lower tiered subcontractors are responsible for ensuring their compliance with the local workforce hiring goals. The goals apply to contractors at all tiers who work on MAPLA covered projects.

Social Justice Fund: The Port of Oakland Maritime and Aviation Project Labor Agreement (MAPLA) contains a provision (Section 6.4) that requires contractors to pay into the Social Justice Labor Management Cooperation Trust Fund. Contractors shall pay thirty cents (\$0.30) per hour worked or paid into the Social Justice Trust Fund established.

*Payment and Performance Bonds may be required.

Please direct all questions to Jose Garcia jogarcia@tcco.com

CLEVELAND, OHIO SUB-BID REQUEST AD

Courthouse proposals are on trial

The Centennial has a former bank lobby, once the largest in the world, that looks as if it could double as a courthouse atrium — or be the setting for a fancy restaurant as is proposed here with this rendering (Millennia).

[Article originally appeared in <https://neo-trans.blog>]

Downtown's next 'whale' could net even more
A COMMENTARY

In local real estate parlance, a “whale” is a development project whose total floorspace measures 1 million square feet or more. Not only are they big, they're tough to get. But there are two Cleveland entities who were able to do what Capt. Ahab could not — catch the whale. Two whales are under construction right now — Sherwin-Williams' new headquarters tower downtown and Cleveland Clinic's new Neurological Institute in the Fairfax neighborhood, near University Circle. A third whale is in the early stages of the chase, a stage where things are most fluid and thus, very intriguing.

The whale is the Cuyahoga County's Consolidated Courthouse — a facility that would unite court facilities and related offices that are spread among multiple buildings downtown. It will be a massive project costing \$400 million to \$700 million to build or renovate. NEOtrans spoke with real estate insiders — developers, architects, engineers, construction managers, brokers, lawyers, financiers and county officials — to get their insights into this whale of a challenge that was posed by the county in two requests for proposals (RFP) issued last summer and whose deadlines passed last week, netting seven responses.

First, let's understand that this county initiative really has two basic parts. One is to provide a consolidated courthouse for the future. That could be accomplished by building a new structure somewhere else downtown, away from the current 7-acre Justice Center campus whose jail facilities and police headquarters are departing, respectively, for Garfield Heights and downtown's ArtCraft Building. Or it could involve renovating another, existing building somewhere else downtown. Or it could involve renovating the existing courthouse tower either as part of an

expanded courthouse complex or with new uses.

That might leave standing alone on the Justice Center campus the 1977-built, 420-foot-tall, 26-story courthouse tower at 1300 Ontario St. In the tower are many court offices and hearing rooms that are jammed into every conceivable space — hallways, closets and shared rooms that cause scheduling conflicts and security issues. It's why county officials want to replace or augment the 675,887-square-foot tower (not including its 124,230-square-foot atrium or 318,738-square-foot underground parking garage with 645 spaces) with a consolidated courthouse having 893,120 square feet of space. Again, that doesn't include atriums or parking decks. Those will certainly be provided and push the project well into the whale category.

The second part of the county's initiative is to sell, lease or otherwise put into play the courthouse tower, its surrounding pair of jail blocks, old police headquarters, and the land on which they set. This also includes offering the nearby, historic, county-owned Courthouse Square building, 310 W. Lakeside Ave. But just because county officials want to see what responses they get for both the Justice Center property and for the future courthouse, doesn't mean they are separate issues.

A proposal could involve an investor partnership acquiring the Justice Center site, renovating the poorly built courthouse tower and leasing it back to the county as a courthouse again while developing the rest of the site, plus Courthouse Square, with expanded courthouse offices and other uses like a hotel and/or residential uses. Or the county could pick two proposals — one that builds a new consolidated courthouse away from the Justice Center campus and the other that repurposes the Justice Center campus with new uses.

As noted earlier, there were seven responses to the Courthouse/Justice Center RFP. And the responses appear as varied as the county hoped they would be, giving them and their consultant,

J.F. Shea Construction, Inc.
BIDDING OPPORTUNITY
City of Cleveland with the following certifying authority:
NEORS MBE/WBE/SBE and Ohio EPA WPCLF

Inviting qualified contractors, specifically firms within City of Cleveland, to contact J.F. Shea Construction, Inc. (Prime Contractor listed below) regarding subcontracting services and material supply opportunities in connection with the upcoming tunnel and shafts project.

The Work under this contract is in Village of Cuyahoga Heights, Village of Newburgh Heights and the City of Cleveland, Ohio. The Work consists of:

SOUTHERLY TUNNEL AND CONSOLIDATION (SOTC)
Owner: Northeast Ohio Regional Sewer District
3900 Euclid Ave., Cleveland, OH 44115

667 Brea Canyon Road, Suite 30 • Walnut, CA 91789
Phone: 909-594-0990 • Fax: 909-869-0827

Send Inquiries/Certifications to Aimee Remo: aimee.remo@jfshea.com

Opportunities to participate exist in the following specific areas of soil excavation, hauling, excavation support systems, deep foundation system (slurry walls or secant piles, soldier beams), dewatering systems, structural steel, engineering, survey, geotechnical instrumentation and monitoring services, materials testing, demolition and site preparation, tree removal, aggregates and fill, traffic control, sewer tap and sewer bypass pumping, A/C paving, environmental investigation, utility relocation, paving, fencing and gates, planting and seeding, retaining wall, cured in-place concrete structures, cast-in-place pipe lining, reinforcing steel, ground stabilization, shotcrete, concrete finishing, miscellaneous metals, mechanical steel pipe, ventilation HVAC, precast concrete shaft covers, temporary office buildings/ services, Temporary electricians, waterproofing, service utilities, grouting, electrical/I&C, River bank stabilization, drilled shaft, pest control, IT services, waste disposal, cleaning services, and security.

Any business seeking to participate as an MBE, WBE, SBE, or Ohio EPA WPCLF MBE/WBE in the Contract that is not currently certified as set forth above review **40 CFR 33.204-33.205, certified by EPA Tereeh Henderson at 202-566-2222 or 13 C.F.R. Part 121 Northeast Ohio Regional Sewer District, Business Opportunity Program (BOP) or NEORS/OCC at neorsd.org** to obtain current certification.

J.F. Shea Construction, Inc. has an FTP site where you can view all plans, specifications and addendums for your convenience. Please contact Aimee Remo at (909) 594-0990, aimee.remo@jfshea.com, to receive instructions on accessing the FTP Site.

CBRE Group Inc., a wide variety of choices to compare using its scoring matrix. NEOtrans was unable to secure a copy of the matrix as the county and CBRE cited non-disclosure agreements. There is no timeline for making a decision, a county spokesperson added.

However, several years ago when the county began looking for new sites for its jail and courthouse facilities, a steering committee measured those sites with criteria that anyone might expect in this case. The committee wanted a new courthouse downtown, built as close to the existing one as possible because supportive services are already nearby. That includes many law firms, parking areas, public transportation and restaurants for courthouse employees, jurors and visitors. Obviously cost-effectiveness is a key issue. Major, long-term assets and their cost of capital are measured over a 30-year timeline. Which project costs the least in that term is going to rate highly. And a courthouse plan that could be delivered with confidence more quickly and with fewer disruptions to courthouse operations would have won more points, too.

Plus, at least several acres of clean land that involved as few owners as possible was desired by the steering committee. It should be noted that the committee had preferred a cheaper mid-rise building over a more expensive high-rise building, thus requiring more land. And the committee

preferred to move the courthouse facilities only once. The poor condition of the existing courthouse tower required that it would have to be completely vacated in order to be properly gutted and renovated. Thus, the courthouse offices and staff would have to be moved twice if the current courthouse was renovated to remain as a courthouse. That's why the committee didn't support remaining at the courthouse for the future. But the current RFP included the courthouse anyway to see what ideas the private sector had for it and what those costs might involve.

Two of the RFP responses — by Lincoln Property Company Commercial LLC (dba Lincoln Property Company) of Chicago and by U.S. Realty Advisors of New York City — may involve acquiring the Justice Center campus and leasing some or all of it back to a large, single tenant. Those types of deals are often pursued by these two firms, according to sources who spoke on the condition of anonymity. The question is — if it is a large tenant, who is it? Is it Cuyahoga County? Unfortunately, these are the only two proposals into which NEOtrans has few insights. All parties are under non-disclosure agreements.

Augmenting Your Construction Workforce for Success

Continued from page 1

Industry data shows that many folks still see construction as a blue-collar profession that requires them to get their hands dirty. And it doesn't help that construction jobs are considered more dangerous than many others.

This is where technology can be a game-changer.

Robotics, in particular, assists people in risky situations, ensuring that workers won't have to strain their bodies or put themselves in harm's way when working in confined spaces or hazardous zones.

Take, for example, a UK initiative where robotic machines were employed to lay down cones, sparing workers from the potential danger of being hit by oncoming vehicles during the marking process.

4. Embrace digital transformation

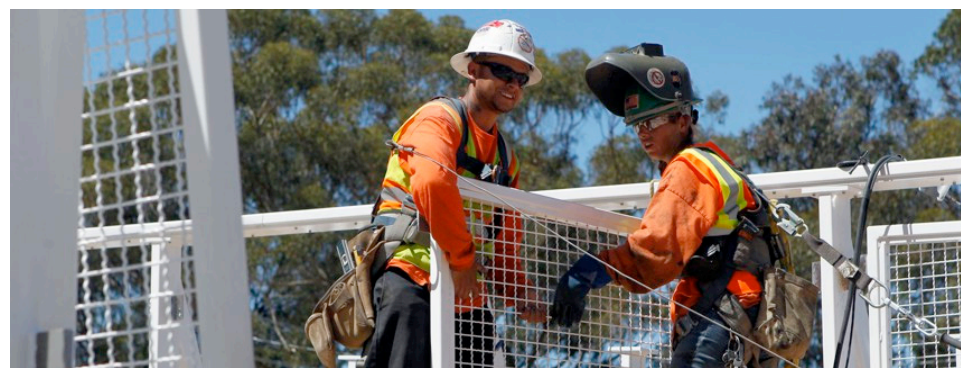

While adopting the technologies mentioned above certainly counts towards digital transformation, it's worth noting that modernizing your construction firm isn't just about implementing new tech. Technology is one part of digitization, but at the true heart of digital transformation are your team and the processes they follow.

When you think about the "transformation" part of digital transformation, don't limit your view to technology. Remember that you must also transform your culture, and you may need to fundamentally change how you do things.

Empower your people

Let's start with the people and culture component. For digital transformation to work, it must be ingrained in your organizational culture. Part of doing this is promoting innovation and rewarding people who try new things (rather than punishing them when something doesn't work).

Beyond that, be sure to invest in training and development. Upskill your team on the tools and software that'll enable them to do their jobs better, and see to it that they have the know-how to adopt and implement construction tech effectively.

Transforming your processes

Adopting technology when you have poor or disconnected processes is like putting a bandaid on a deep and severe wound without actually treating it. Even the most advanced solutions can't function to their full potential without streamlined processes.

That's why before jumping into shiny new tech, you should first evaluate your current workflows. Identify bottlenecks or inefficiencies and see that your technology can eliminate them. You must also be prepared to rebuild processes from the ground up (particularly for outdated or manual procedures).

Will you encounter pushback and resistance to change? Most likely. But remember that enduring short-term discomfort for long-term improvements is the hallmark of progressive and successful organizations.

And if you already have a strong culture, you can trust your team to be adaptable and resilient enough to make hard changes.

Implementing technology

Now, let's talk about the technology side of digital transformation. This stage involves identifying tools and solutions that meet your needs and implementing them across your organization.

Since every firm is different, the nitty gritty of tech implementation will vary from one company to the next. Generally speaking, though, finding success with new solutions or platforms requires a strong foundation (see people and process above), a solid tech solution, and a change management process that ensures clear communication and ongoing support.

For best results, choose a technology provider that serves your partner in success (versus just being a vendor). The best tech companies provide ample resources and collaborate with your team to ensure that your firm not only gets up and running smoothly but can get the most value both in the short and long term.

Augment construction today, win tomorrow

More than ever, the construction industry is striving to attract and retain talent in order to put an end to the labor shortage. Until then, we need to be proactive in bridging the gap with tech-savvy solutions.

Whether it's adopting AI, AR, and VR or implementing a larger digital transformation initiative, it's important to remember that we have several technology solutions at our disposal to help us navigate labor issues.

VETERANS CORNER

Former US marine on how military veterans can build a construction career

[Article originally appeared in www.international-construction.com]

Thousands of former military personnel are benefitting from a move to step up efforts to bring more veterans into the construction industry and to better transition battlefield skills to worksites. Lucy Barnard speaks to one of them.

Craig Knight spent the first years of his career as infantry sergeant in the US Marines, squinting through gun sites at the Middle East dust.

Stationed in some of the most dangerous war zones on the planet, as an MOS 0352, an anti-tank missileman, Knight was responsible for operating shoulder-fired and vehicle-mounted hi-tech weapons systems capable of destroying enemy targets at a range of more than 3,000 metres.

“Actually, being there in combat – you can’t prepare yourself for it,” Knight says slowly. “I’ve

always been in shape so I felt like the physical aspect of it wasn’t as difficult as I thought it might be but the mental and emotional aspect of it all, seeing death and destruction – and being away from family – that was difficult.”

“I originally thought I’d do it for 20 years – go in there full time and then retire. No problem,” says Knight, now 34. “But in the military, the years, they’re like dog years. They really wear on you.”

After two tours of duty – first in Helmand Province, Afghanistan, taking on “disruption operations” against the Taliban and then in Al Anbar province in Iraq, taking part in operations against ISIS – Knight was ready for a less traumatising career.

Having originally signed an eight-year contract comprising four years active duty and four years of inactive service, by 2017, at the age of 28, Knight had had enough.

“My contract was coming to an end, and I had to make that decision – do I want to keep doing this for another four years or should I try a civilian job doing something else,” Knight says.

But eight years in the Marine Corps left no obvious career path.

“I felt I didn’t have a skill. I don’t know how to lay brick or connect steel or something,” says Knight. “For some, military jobs, say a lawyer or mechanic, come with those hard skills which you can transition fairly easily to civilian life,” says Knight. “But being in the infantry, it’s a little bit more difficult to transition those hard skills.”

Despite having had no experience of the construction industry, Knight decided to use his GI Bill education allowance on leaving the army to enrol on a master’s degree course in construction management at Wentworth Institute of Technology.

“Outside of digging in a defence – sandbag huts and some fighting positions and stuff like that, construction was never a part of my job in the

military,” Knight admits. “But I always was intrigued about how things are built and I was good with my hands and building things so I figured I would transition into that.”

The move paid off. While studying at Wentworth, Knight met a friend of a friend who worked for Suffolk Construction, the largest construction contractor in Massachusetts, and who was able to secure him an interview for his job at Suffolk.

Knight is just one of thousands of former military personnel benefitting from a move from recruiters to step up efforts to bring more veterans into the industry and to better transition battlefield skills to construction sites.

PROGRAM SUMMARY

The presentation will discuss ‘Rapid Decarbonization’ for one of our nation’s major community college districts, showcasing innovative approaches to building digital campuses in the cloud. Our scalable and real-time plan comprises three stages: Discovery, Analysis, and Action. This cloud-based strategy uses real-world data, making it accessible to stakeholders such as students, faculty, and the community. It introduces a digital twin (DT) of current and future building assets, serving as a roadmap to climate neutrality. The DT, integrating AI, machine learning, and deep learning, optimizes operational efficiency based on accumulated data. We believe innovation stems from diverse thinking rather than merely refining the current norm. This digital framework maximizes asset value through total ownership cost, linking with other software for real-time operational insights like energy and water usage. It aids in modeling future buildings and renewable energy systems for a clear climate-neutral trajectory. Furthermore, it can predict building responses to variables like weather or population density, bridging the gap between operations and data analytics for both technical and non-technical users.

Oakland Career Fair

**Date and time:
Wednesday, December 13 • 9:30am - 12:30pm PST**

Location

Courtyard by Marriott Hotel - 988 Broadway Oakland, CA 94607

Don’t just look for a job. CONNECT with the right employers.

This career fair is a great recruitment event to connect with top employers in the areas of Government, Sales, Retail, Education, Information Technology, Engineering, Healthcare, Financial Services, Management, Manufacturing, Customer Service as well as other career paths.*

Professional Dress and an updated resume are strongly recommended. Register here!

Advance applications and interview scheduling is available for some positions. Forward your resume to events@careerfairconnection.com today. Our recruitment team can match you to open positions that fit your background and salary requirements.

To inquiry about a specific employer or to research what employers and positions are participating please register on our website (A list is provided to registered attendees the week before the career fair) <https://careerfairconnection.com/applicants/>

Are you an employer looking to hire? Visit our employment page: <http://careerfairconnection.com/employers/>

Career Fair Connection encourages every job seeker to provide your resume prior to attending the career fair. This allows our recruitment team to review your experience and advise you on the best career path available for the attending employers. Thank you. We are looking forward to seeing you there.

* All careers are not present at every recruitment event. Please contact us for an updated employer roster in your city.

Register here: bit.ly/3Qldvtr
