

SBE NEWS ALERT

The Uneven U.S. Jobs Recovery Is Even Clearer When Tracked Per Capita

Image credit: <http://www.citylab.com>

By Richard Florida

Today, there's definitely some good news in the U.S. economy. The recovery is, by nearly every definition, well underway, and new jobs are being created across the country. But the bad news is that the recovery remains highly uneven, in terms of both the kinds of jobs that have reappeared and their locations. The economy hasn't replaced many of the once well-paying, mid-skill blue collar jobs it lost, and there's been far greater growth in low-wage jobs and high-wage jobs.

Even more, the recovery has been geographically uneven. We've heard how some states have generated a disproportionate number of new jobs, and how these good and bad jobs are distributed irregularly across the country.

A new analysis from labor market data and research firm EMSI compares state-by-state job growth during the recession to each state's overall population, generating an extremely useful per-capita growth number for the years between 2010 and 2013. EMSI then extended that analysis to examine the per capita growth in good and bad jobs across the states over the same period. (Though do note that the EMSI data cover only salaried employees, so it excludes self-employed workers, which make up about 7 percent of the labor force.)

Looking at job growth on a per capita basis enables us to get a better handle on how states have fared over the recovery. California for example, gained more than 900,000 new jobs, far and away the most of any state between 2010 and 2013. But that overall statistic misses a big part of the picture. California is a huge state, home to 38 million people—more than all of Canada—and based on job growth per capita, California ranks sixth. With 236 new jobs for every 10,000 residents, it comes in behind four states and the District of Columbia.

The map conforms to the pattern of an economy recovering around the twin pillars of energy and knowledge. North Dakota, the center of the natural gas boom, leads the way by a huge margin with 940 new jobs per 10,000 people. Next is D.C., where a thriving knowledge economy is bolstered by a large government presence. Utah, with its booming tech economies in young cities like Provo, comes in third, followed by Texas, which combines an energy economy around Houston with knowledge and tech hubs around Austin and Dallas. Here, the nearly 800,000 total new jobs translate into 299 positions per 10,000 residents. Colorado, itself a hub for knowledge and energy, is in fifth, and California, with its knowledge economies around the Bay Area, San Diego and L.A., is in sixth.

Rounding out the top ten are four states that are pleasant surprises. Michigan's 233 new jobs per 10,000 residents suggest a rebound from the hard-

hitting manufacturing decline, while Minnesota, expensive Hawaii, and the Sunbelt's Arizona follow close behind. This may signal good news for Michigan and Minnesota especially.

At the other end of the spectrum, the states that saw the least job growth per capita are less surprising. These are the places where job growth has been most anemic (below 1.6 percent) over the last few years. Many of these are in the South, including Arkansas, Mississippi, and Alabama. Several Northeastern states are also in the bottom ten: Maine, New Jersey, New Hampshire, Rhode Island, and Pennsylvania. In all, eleven states have seen fewer than 100 new jobs per 10,000 residents since 2010.

M3602/M3623/M2670 (Interior & Façade Stabilization)- WC 5: Miscellaneous Metals | C-51

M3602/M3623/M2670 Interior-WC 6: Framing-Drywall-Insulation-Plaster | B or (C-2, C-9 and C-35)

M3602/M3623/M2670 (Interior & Façade Stabilization)- WC 7: Doors-Frames-Hardware | B or (D-16 and D-28)

M3602/M3623/M2670 (Interior & Façade Stabilization)- WC 8: Paint | C-33

M3602/M3623/M2670 Interior-WC 9: Flooring | C-15

M3602/M3623/M2670 Interior-WC 10: ACT Ceilings | D-50

M3602/M3623/M2670 Interior-WC 11: Window/Glazing | C-17

M3602/M3623/M2670 Interior-WC 12: Mechanical-Plumbing and Controls | B, C-20 and C-36

M3602/M3623/M2670 Interior-WC 13: Electrical-Low Voltage-Security-Tel Data-Fire Alarm, AV | B and C-10

M3602/M3623/M2670 Interior-WC 14: Fire Protection | C-16

A voluntary prebid conference and site visit will be conducted on **September 3 2014 at 10 a. m.** Participants shall meet in Toland Hall (RM U-142) of UC HALL at 533 Parnassus Avenue, San Francisco, California 94143. For further information and directions, contact Kevin Lew with MBC at 415-364-1362 or klew@mccarthy.com.

Bids will only be received using the UC SRS system accessible through <https://suppliers.sciquest.com/UCOP/>.

Bids must be submitted to UC SRS system on or before **September 17th 2014 at 2:00 p. m.**

Bids will be opened after **2:05 p. m.** on the Bid Date.

Prior to the Bid Deadline and after bid opening, the University may establish a new Bid Deadline no earlier than 24 hours from the prior Bid Deadline, if no material changes are made to the bidding documents, and no earlier than 72 hours if material changes are made. In such event the University will, at a minimum, notify all persons or entities known by the University to have received a complete set of

Bidding Documents and who has provided a street address and/or facsimile number for receipt of any written pre-bid communications.

Bid Security in the amount of 10% of the Lump Sum Base Bid, excluding alternates, shall accompany each Bid. The Surety issuing the Bid Bond shall be, on the Bid Deadline, an admitted surety insurer (as defined in the California Code of Civil Procedure Section 995.120).

The successful Bidder will be required to have the California current and active contractor's license listed above at the time of submission of the Bid.

The project will be insured under a University Controlled Insurance Program ("UCIP") providing workers' compensation and employer's liability insurance coverage, commercial general liability insurance coverage, and excess liability insurance coverage for Work performed on or at the Project site ("UCIP Coverages"). All insurance policies required to be obtained by design build and lump sum Subcontractors shall be subject to approval by MBC and University for form and substance. All such policies shall be issued by a company rated by Best as A- or better with a financial classification of VIII or better, or have equivalent rating by Standard and Poor's or Moody's.

Every effort will be made to ensure that all persons have equal access to contracts and other business opportunities with the University within the limits imposed by law or University policy. Each Bidder may be required to show evidence of its equal employment opportunity policy. The successful Bidder and its subcontractors will be required to follow the nondiscrimination requirements set forth in the Bidding Documents and to pay prevailing wage at the location of the work.

The work described in the contract is a public work subject to section 1771 of the California Labor Code.

The estimated values for the following trade bid packages are:

M3602/M3623/M2670 (Interior & Façade Stabilization)- WC 1: General Works-Site Logistics | \$440,000 to \$490,000

M3602/M3623/M2670 Interior-WC 2: Demolition-Hazmat | \$430,000 to \$478,000

The Uneven U.S. Jobs Recovery

Continued from page 1

But looking at the overall growth in jobs provides only part of the picture, as not all jobs are created equal. To get at this, EMSI ran the numbers on per capita job growth for both low-wage jobs (which pay less than about \$14 dollars an hour) and high wage jobs (those which pay around \$21 dollars or more) for the 50 states.

Nationally, slightly less than a third (31 percent) of all jobs generated between 2010 and 2013 were high-wage jobs, while just 26 percent were mid-wage. The greatest share, 43 percent, was low-wage. Nearly a quarter of all new jobs added between 2009 and 2013 were in just five low-skill occupations, including food prep and retail.

Again we see the patterns of a knowledge-energy economy. North Dakota, D.C., and Utah retain their positions at the top of the rankings. North Dakota gained 364 new high-paying jobs per 10,000 people. Colorado and Texas again do well, each with about 100 new high-wage jobs per 10,000 people. Other states that fall slightly lower on the overall rankings, but which have robust knowledge or energy economies, perform well—including Massachusetts, Washington, Alaska, and Oregon.

But several states performed much more poorly. Rhode Island, Louisiana, Maine, Arkansas, Alabama, and West Virginia saw between 10 and 20 new well-paying jobs per 10,000 residents. Mississippi gained just six, while New Mexico actually lost seven high-wage jobs for every 10,000 residents.
