

Toolbox Talk: Protecting Workers From COVID-19 on the Jobsite

[Article was originally posted on www.constructconnect.com]

By Kendall Jones.

The coronavirus (COVID-19) pandemic continues to wreak havoc on our normal, everyday lives in what is expected to be one of the worst weeks in the U.S., with over 400,000 confirmed cases and nearly 13,000 deaths. Forty-two states and the District of Columbia have now issued a “stay at home” or “shelter in place” order for all but essential activities and businesses. Essential activities typically include things like getting groceries or picking up medications or going to work.

The list of essential businesses that requires employees to physically show up for work, rather than working from home, varies by each jurisdiction but generally covers grocery stores, pharmacies, hospitals and healthcare facilities, banks, hardware store, gas stations, and restaurants providing delivery or curbside pickup. All but four states, Michigan, New York, Pennsylvania, and Washington, and a handful of counties and municipalities have deemed construction nonessential.

For many construction workers, where working from home is not an option, this is both a blessing and a curse. They want to continue working but are also struggling with the fear and threat of

contracting the coronavirus on the jobsite. This is especially concerning for workers who are immunocompromised or have family members at home who are at high-risk, like the elderly.

Safety is supposed to be the top priority on every construction site. The General Duty Clause of the Occupational Safety and Health (OSH) Act of 1970 states that “Each employer shall furnish to each of his employees employment and a place of employment which are free from recognized hazards that are causing or are likely to cause death or serious physical harm to his employees.”

On a construction site, this is as true whether it’s a slip and fall hazard, an electrocution hazard, or the coronavirus. In order to protect workers and prevent the spread of the coronavirus, both OSHA and the CDC have provided resources and guidelines for businesses and employers to follow.

Here are some tips on the most effective ways to protect your workers, slow the spread, and flatten the curve:

Have a Plan of Action

OSHA recommends creating an infectious disease and preparedness and response plan, for employers that don’t already have one in place. This should be incorporated into your site-specific safety plan and include identifying where and how

workers could be exposed on the jobsite, including their commute for those that are carpooling or using public transportation, and what measures you are taking to reduce exposure through engineering controls, administrative controls, and the use of personal protective equipment (PPE).

Your plan should also include what measures will be taken should an employee test positive for the coronavirus. Have a dedicated COVID-19 point person that is responsible for executing the response plan, overseeing safety measures and screening procedures and keep up on the latest guidance from federal, state, and local health agencies on how best to protect workers. This person(s) should be on the jobsite every day.

Practice Social Distancing

Because the coronavirus is believed to spread by person-to-person it is important to maintain a social distance of six feet apart from other workers. Each construction site is unique and maintaining six feet of separation might be easy for some tasks and jobsites, it’s extremely difficult for others, like on larger construction projects or when multiple trades are all working at the same time.

This may require shuffling around the project schedule and staggering work shifts and trades

California Sub-Bid Request Ads

Manson Construction Co.
1401 Marina Way South Ste. 330
Richmond, CA 94804
TEL: 510-232-6319 • FAX: 510-232-4528

REQUEST FOR CITY AND COUNTY OF SAN FRANCISCO QUALIFIED AND CERTIFIED MICRO-LBEs (MBE/WBE/OBE) and CERTIFIED SMALL-LBEs (MBE/WBE/OBE) SUBCONTRACTORS AND SUPPLIERS FOR:

MISSION BAY FERRY LANDING DREDGING AND SITE PREPARATION

Contract No. 2830

PROJECT BID DATE: APRIL 14, 2020 AT 2 P.M.

Quotes are requested for various items of work including but not limited to: Construction Traffic Control Services, Temp. Fencing, Water Trucks - Dust Control, Trucking and Hauling, Construction Equipment - Rental, Material Re-handling, Fuel Supply - Diesel, Hydro-graphic Surveying

Project Description: The Port of San Francisco (the "Port") announces an Invitation for Bids ("IFB") for construction on MISSION BAY FERRY LANDING DREDGING AND SITE PREPARATION of the Mission Bay Ferry Landing (Site) located southeast of the intersection at 16th Street and Terry A. Francois Boulevard in San Francisco, CA. The Work is to perform demolition and disposal of marine debris; dredging and ocean disposal of approximately 80% of the site dredge materials; dredging, rehandling and landfill disposal of approximately 20% of the site dredge materials; and import and placement of a Sand Cap on a portion of the Site. Contract documents can be found here: <https://sfport.com/node/14851>

Manson construction is willing to break out items of work into economically feasible units to encourage LBE participation. 100% payment and performance bonds are required but can be waived with prior approval for special cases. Manson will pay bond premium up to 1.5%.

This Contract has a labor agreement wherein Manson is signatory to the Operating Engineers Local Union No. 3 and the Inlandboatmen's Union of the Pacific. Current insurance and workers compensation coverage including USL&H (as required) and waiver of subrogation are required.

The following must be submitted with Quote by **COB 4/10/2020**: LBE subconsultants and subcontractors must be CMD certified by the bid due date and must be certified in the scopes of work/trade(s) listed on the bid documents (<https://sfgov.org/cmd>). Provide the LBE# and NAICS code with the Quote. Quotes must be valid for 120 days.

For scope clarifications, to view plans and specifications, or to submit quotes contact **James McGuire** at jmcguire@mansonconstruction.com or 904-821-0211.

Work slows down at LaGuardia's \$8 billion project despite COVID-19 "essential project" status

Wile LaGuardia Airport's \$8 billion rebuilding project has been deemed an "essential project" despite the state-wide COVID-19 shutdown, the pandemic has still drastically slowed down work there, The New York Post reports.

At least 26 people who work at or have passed through the construction area at the airport's Terminal B — which accounts for \$4 billion of the project — have tested positive for the illness, a source told the newspaper.

"A Port Authority spokeswoman confirmed 22 worker exposures," The Post has reported. "An untold number of workers were directed to quarantine after potential exposure, the sources said."

Skanska is leading the project in more than 12 separate work areas. Work at one part of the work, a job site at Terminal B's western concourse, halted last month after an employee there tested positive for COVID-19, Skanska spokesman John Schiumo was quoted as saying.

The company disinfected the job site and directed all employees to self-quarantine for two weeks if they were in contact with the infected employee, Schiumo said. There were also problems at the site for Terminal B's main ticketing area.

The workforce at the site for Terminal B's main ticketing area was also hit hard by the outbreak, and work halted on a part of that project as well.

Many workers have elected to stay home even though the work can continue on the site.

Gov. Andrew Cuomo said on April 2 it was vital that construction at LaGuardia carry on.

"A lot of these projects, once you start you can't just stop," said Cuomo. "Those airports are still functioning, planes are still coming in. LaGuardia is a whole configuration of physical barriers and alternate routes pending construction, so a project like that would be very, very difficult to freeze and then unfreeze."

An Entrepreneur's Checklist for Starting a Business at Home

By Entrepreneur Partner Studio Staff,

Once you have an idea and a passion, starting a business can feel like a whirlwind. While it might feel like you have to dive in head-first right away, taking a step back to plan and organize can set you up for long term growth.

Before you begin your business journey, here are a few tasks and helpful reminders to check off your list.

Create a business plan. You may think business plans are only for large organizations, but every startup needs to have one. The Small Business Administration has a guide to help you write one yourself. Business plans are meant to serve you, the entrepreneur, so there is no wrong way to write yours.

Most business plans include an executive summary, company description, market research, organization, service or product summary, marketing and sales strategy, funding requests and financial projections. You want to outline what you're offering, where there's a need for it, how you're going to show people that you can fill the need and how you're going to financially support the venture.

Taking time to think through these points can help you set your long and short-term goals and create a more compelling case for financial backers when it's time to seek out capital.

Don't overlook this essential first step. Set yourself up for success with a detailed plan that can get you organized and moving forward.

Identify your target market. It's important to know who you're selling your product or service to and what they want. Think about who your customer is, what they need and where you'll find them. It may be helpful to create customer profiles or personas to better understand who you're trying to reach.

Toolbox Talk: Protecting Workers From COVID-19 on the Jobsite

Continued from page 1

to avoid having large groups of workers in the same area on the jobsite. Provide workers with bottled water instead of a communal water cooler and don't allow workers to congregate on breaks or during lunch. Workers should be discouraged from carpooling or using public transportation whenever feasible.

Screen Employees

Common symptoms of the coronavirus include fever, cough, and shortness of breath and can present anywhere from 2 to 14 days after exposure. You need to be screening everyone coming on to the jobsite and taking each person's temperature with a contactless thermometer. Workers should be encouraged to report any symptoms that they or a coworker may be exhibiting.

If a worker is showing symptoms, they should be sent home immediately and not allowed to return to work until they have been tested and have a negative result. Many people who contract COVID-19 are asymptomatic, meaning they show no signs of illness, which means screening workers is not guaranteed to prevent the spread of the disease on the jobsite.

If a worker has tested positive, you need to inform all your employers as well as any subs, suppliers, inspectors, etc. who may have visited the jobsite. Have workers self-monitor and self-report if they develop any of the symptoms. Workers should also inform you before coming to the jobsite if they have a family member at home who is sick or symptomatic.

Wash Your Hands

Set up temporary handwashing and sanitizing stations throughout the jobsite. Encourage workers to wash their hand frequently throughout the day, especially if they aren't wearing gloves, and after handling tools, equipment, and materials. They should also be washing before and after eating, before and after treating any cut or wound, and after using the toilet.

Put signs up on the handwashing stations instructing workers that they should be scrubbing for at

least 20 seconds before rinsing them off under running water. There are a number of songs, poems, or monologues that people have suggested to sing or recite that lasts 20 seconds to use as a timer while washing your hands.

If soap and/or running water is not feasible on the jobsite, hand sanitizer that contain at least 60% alcohol can be used instead.

Don't Share Tools

A recent study from scientists with the National Institute of Health, CDC, UCLA, and Princeton University shows that COVID-19 can remain active in aerosols for up to three hours, on copper for up to four hours, on cardboard for up to 24 hours, and on stainless steel and plastic for up to two or three days.

It's important that workers refrain from sharing tools or equipment whenever possible. When items like ladders, scaffolding, heavy equipment, etc. have to be share, workers should be wearing gloves and other PPE or cleaning and disinfecting surfaces.

Clean & Disinfect the Jobsite

Construction sites aren't exactly known for their cleanliness. Any surface that a worker touches or comes into contact with should be cleaned and disinfected regularly. Be sure to use a disinfectant that has an EPA-approved disinfectant label with claims against emerging viral pathogens. Always pick a disinfectant based on the type of surface you are cleaning and follow the label directions and contact time for effective disinfecting.

Wear Your PPE

Construction workers are used to having to wear PPE whether it's hard hats, gloves, safety goggles, steel-toed boots, or even N95 respirators depending on the type of work they do. Typically, PPE is the last line of defense and should not be relied upon as the primary protection of workers and used in conjunction with engineered safety systems, machine guards, and safe working practices, not as replacement for these things.

With the coronavirus, workers should be wearing appropriate gloves and face masks, respirators, or face shields based on the work being performed and if social distancing is an issue. Because of the N95 respirators shortage, OSHA has advised that "all employers should reassess their engineering controls, work practices, and administrative controls to identify any changes they can make to decrease the need for N95 respirators." They also issued guidance on other respirators that are permissible alternatives as well extended and re-use of N95 respirators.

The CDC just last week started recommending that the general public begin wearing cloth face coverings when going out in public (like the grocery store) or in situations where social distancing is tough to maintain.

Toolbox Talks & Safety Meetings

Toolbox talks, or short safety meetings, are a great way to keep all your workers informed of what's going on and reinforce safe working practice, safety basics, and focus on high-risk scenarios. Be sure to remind workers about social distancing, handwashing practices and locations of handwashing stations, not sharing tools, etc.

The Associated General Contractors of America (AGC) is asking all of its members to participate in a nationwide coronavirus safety stand down tomorrow, April 9 and has provided some documents for holding toolbox talks around coronavirus and keeping workers safe.

You may have to get creative when hosting toolbox talks and safety meetings to maintain social distancing by either meeting in smaller groups or using something like Zoom meetings with workers on their phones or by sending out safety messages and tips via text or email to your workers.

As always, if you are on the jobsite: Work Smart, Stay Safe.

We Are An Equal Opportunity Employer

nibbi

Project Name: 4840 Mission Street

Location: San Francisco, CA

Pre-Bid Call: April 22, 2020 @10:00am

Bid Date: May, 07, 2020 @2:00pm

Labor Reqs: Prevailing Wage

Project Schedule: Est. Start: Feb/March 2021

Nibbi Brothers has been selected as the General Contractor for the 4840 Mission Street project in San Francisco. We are in receipt of the 100% DD Set and are currently requesting bid proposals from qualified subcontractors including those certified as SBE's for Design Build Fire Protection, PV Panels, Solar Hot Water and Soil Improvements. The Contract Monitoring Division (CMD) has set the SBE participation goal for this project at 20%. For more information about the San Francisco SBE program as it relates to this solicitation please contact Mr. Romulus Asenloo at the City and County of San Francisco Contract Monitoring Division via email or by phone, Romulus. asenloo@sfgov.org / (415)581-2310. 4840 Mission Street will be one of the first major developments in the Excelsior District in nearly 25 years. This unique mixed-use development will extend from Mission Street, the Excelsior's commercial "Main Street," through to Alemany Boulevard, a major residential boulevard. The plus/minus 1.5 acre project site is currently occupied by the Valenti Marini Perata Funeral home. This large site provides a unique opportunity to establish a mixed-use, affordable housing development that includes quality public spaces, commercial spaces as well as providing a new home for the community based Mission Neighborhood Health Clinic. The overall development site is plus/minus acres and includes up to 137 below market rate affordable rental units over a new plus/minus 10,000 square foot Clinic and a plus/minus 6,000 square commercial space. 100% of the units are affordable. The development includes 39 residential parking stalls that are not visible from the street that are located partially below grade and accessed from Alemany Blvd at the lowest end of the site. Mission Street, being the high quality transit corridor, supports the proposal for providing minimal parking for the affordable housing, prioritizing residents who do not own or require individual vehicles, as San Francisco's transit first policy.

For any questions on accessing bid documents and pre-bid call-in information, please contact Kristin Medwick, Sr. Precon & Estimating Coordinator via email, kristinm@nibbi.com.

Plans are also available under the Advertised Projects tab at the Caltrans website at: <http://ppmoe.dot.ca.gov/des/oe/contract-awards-services.html>. PDF format quotes should be emailed to the estimator or faxed to 510-526-0990 prior to noon on the date of the bid. Quotes from DVBE & SBE Subcontractors, Suppliers and Truckers are highly encouraged. OCJ is willing to breakout any portion of work to encourage DVBE & SBE participation. Subcontractors must possess a current DIR, Contractors License, and insurance and workers compensation coverage including waiver of subrogation. OCJ may require Performance and Payment bonds on subcontracts. OCJ will pay the bond premium up to 2% of the contract value. All subcontractors are required to execute OC Jones' standard subcontract agreement, comply with all insurance requirements, and name OCJ as additional insured. Copies of our agreement and insurance requirements are available upon request. OCJ is a Union contractor, and we are signatory to the Operating Engineers, Laborers, Teamsters, and Carpenters. OCJ is an Equal Opportunity Employer.
