

How AECOM is positioning itself to lead the next generation of infrastructure

By Laurie Cowin,

AECOM is among the biggest players in the AEC space. In the past year it has made a strategic acquisition with Shimmick Construction, has launched a federal contracting division and is preparing itself to be a leader in infrastructure, in part by announcing an initiative to hire 3,000 workers throughout a six-month timeframe.

Its success can be attributed to its diverse portfolio and saturation through many markets, including commercial, infrastructure, power plants, stadiums, government and more. But its the people behind the company who are at the core of its accomplishments. One such company leader is 30-year AECOM veteran Dan McQuade, president of the company's construction services business.

McQuade recently spoke with Construction Dive about AECOM's project load, how it hopes to maintain its positive trajectory and the direction it's headed next.

This interview has been shortened and condensed.

AECOM seems to be setting itself up to lead what could be an eventual \$1 trillion federal infrastructure spending plan. What role do

you see the company playing in a national public works program?

MCQUADE: We are absolutely positioning ourselves to be a leader in the next generation of infrastructure. We're the largest transportation engineer in the world.

I think no matter what happens in Washington, DC, there's going to be an increased amount of infrastructure projects and more design-build. Our country's infrastructure is aging. I can't comment about the timing of federal legislation, but I'm convinced there will be more infrastructure work.

The company has recently come into a couple of notable acquisitions. Where construction services are concerned, how does AECOM decide which deals are going to pay off?

MCQUADE: Acquisitions are always a strategy; it's not like something becomes available and we make an offer. We look at the company, at our project strategy and where we think we don't have the right resources.

In the western U.S., we have great capacity, great clients, and a lot of infrastructure and transportation projects. We needed the right construction expertise [there] so we acquired Shimmick Construction. We're focusing on the West Coast for the next six months or so and then we'll start thinking about geographic expansion.

Last month, we announced a capital allocation policy focusing on near-term debt reduction and stock buybacks. We're continuing to look at targets and acquisitions, but with the capital allocation policy now. We'll continue to make acquisitions, but they'll be niche acquisitions in the next year or so.

The company's Q3 reports note that construction was a leader in revenue growth during the period. What kinds of projects or services have stood out in that category?

MCQUADE: The things really driving revenue are mega-projects. We have at least a dozen projects over \$1 billion right now. That's just mind boggling.

Some are upwards of \$2 billion and approaching \$3 billion. That's what really drives the revenue for the construction business: One Vanderbilt and Hudson Yards, new stadiums. We have a skill set for really big, complicated projects.

In what markets are you seeing the strongest growth?

MCQUADE: We have projects across the country and we're seeing a lot of growth and opportunity in California, Florida, New England, Texas and the Gulf Coast. I think it's a combination of areas with particularly strong economies and places where we have strong capabilities where those match up best. Those are also big population centers.

The company's Construction Services unit added a federal contracting division this year. Why was now the time to do that?

Get construction news like this in your inbox daily. Subscribe to Construction Dive:

MCQUADE: AECOM has a very large business outside of construction that designs, operates and maintains federal facilities. We do very little federal construction currently, but felt we could leverage relationships and existing contacts, particularly as the federal government moves toward design-build.

Guy F. Atkinson is a union contractor and an Equal Opportunity Employer. Atkinson is signatory to the Carpenters, Cement Masons, Laborers and Operating Engineers Unions. 100% Performance & Payment Bonds from an approved surety company will be required for subcontractors with contract value greater than \$100,000. Atkinson will pay the cost of bonds up to 2.0%. We will assist in obtaining necessary equipment, supplies, materials or related services. We will split items of work (see project specs for full list of bid items) and provide assistance for bonding, LOC and insurance where needed. Prices must stay firm for 120 days per Bid Notice. Subcontractors will be expected to sign Atkinson's standard subcontract and to comply with our company's standard insurance requirements which include a waiver of subrogation. Please provide your contractor's license #, DBE cert # and DIR # with your quote. Atkinson requests that subs and vendors register and prequalify in our online system at <https://www.atknextranet.com> prior to bidding.

Plans and specs are available from the Riverside County Transportation Department.

The Supplemental Project Info and **Addenda 1 & 2** are available online at

DeSilva Gates Construction locates their assets and big savings

In searching for their assets, a construction company uncovers big savings

When you've been in business for more than 80 years you'd think there wasn't much new to learn. Construction company DeSilva Gates has shown that you're never too old to master the newest tricks.

Started in 1932 and based in Dublin, California, DeSilva Gates has utilized new mobile enterprise management (MEM) software to improve efficiency, saving time locating equipment and scheduling maintenance.

Rich Poppoff, Equipment Superintendent at DeSilva Gates explains the hide and seek' struggle the company was dealing with.

"We had a general idea where an asset was. Problem was that we'd go out there and couldn't find it so we would end up renting a piece of equipment instead."

"Verizon Connect has allowed us to accurately pinpoint where an asset is and not wander around looking for it."

Locating assets quickly has proved to be a major cost-saver in more ways than one.

Breakdowns can cost up to \$20,000 an hour, so delays in getting assets fixed can represent a major hit to the bottom line. With accurate location information and commercial navigation solutions, runners are delivering replacement parts faster

than ever before, meaning equipment is up and running again much sooner.

Reduced over-maintenance: Saving dollars, saving the environment

DeSilva Gates is not just saving money by reducing downtime; they've also eliminated unnecessary servicing, switching from standard intervals to using engine data to only service when the equipment actually needs it.

One example is the drain interval on their pickup trucks, which used to be the industry standard of 3,000 miles. With actual engine data, they can minimize waste.

"Now that we're tracking the life expectancy of our oil, we've extended the oil change on a lot of our vehicles to eight or 10,000 miles."

Management is also making better, faster decisions about reported defects. Electronic inspections (including paperless DVIRs) have significantly improved the speed at which defects are managed and resolved.

"Vehicle inspection reports were three days old by the time we were getting them. Now with real-time data, we get an alert that lets us know someone has checked a box to say 'hey I have this condition' and we get to make the choice about whether it's an out of service condition or whether

it's something that can wait until the next scheduled service."

The data's changing how we drive

Unsafe driving habits used to go unnoticed but sharing the data with drivers directly through the Verizon Connect Coach app has yielded some surprising results.

"Once we started sharing that with all the employees we noticed a marked drop in the occurrence of people speeding."

Jeff Workman, Safety Director, DeSilva Gates

"Verizon Connect has given us a clear window into driver behavior," notes Jeff Workman, Safety Director at DeSilva Gates. "We're actually able to describe to someone, look at the number of rough starts ... the number of times you were over seventy miles [per hour]."

DeSilva Gates also use Verizon Connect Coach, a scorecarding solution that uses gamification, to reward and motivate drivers for meeting their safety goals.

"It's a really strong motivation for people to improve their driving behavior."

How AECOM is positioning itself to lead the next generation of infrastructure

■ **Continued from page 1**

On the construction side, what would make for a smooth transition from 2017 to 2018?

MCQUADE: We have had tremendous growth over the past few years. I think we have an advantage with the size and notoriety of the projects we have. I'm in Los Angeles now where we're building the new Rams stadium. We're also commissioning a power plant and building a bridge in Long Beach.

We have really smart, ambitious people in our business, especially younger people who want to work on those projects — they're top talent. Our ability to win those [big] projects helps us personnel-wise as much as anything because they're magnets for top people.

That's how I got into this 30-something years ago. I was working in New York for a small contractor and used to walk by the JP Morgan headquarters on Wall Street and thought, 'That's what I wanted to be doing.' It felt like the big leagues. That was true 30-something years ago and it's true today for AECOM.

In 2018, we're looking at technology more to support and control projects. We're on a growth curve, we just have to make sure we keep delivering the quality our clients expect.

DBE/MBE/WBE/SBE

Subcontractors and Vendors

Project: Traction Power Substation Replacement ASL Installation Project Oakland, CA

Reference #: 15EK-140

Owner: San Francisco Bay Area Rapid Transit District, Purchasing, CA

Bid date: May 8, 2018 @ 2:00 pm

DMZ Builders is bidding the above referenced project as a Prime Contractor. We are requesting bids from the following trades/vendors/suppliers:

Site Security, Project Schedule (CPM), Quality Control, Construction Area Signs, Traffic Control Systems, Water Pollution Control Program, Sitework, Drainage, Underground Utilities, Fencing, Metal Doors, Metal Fabrications, HVAC, Louvers & Vents, Painting, Cast-in-Place Concrete, Concrete Flatwork, Electrical and Traction Power, Low Voltage Electrical, Communication, Lighting, AC Paving, Planting & Irrigation

For Plans and Specifications please register on the BART Procurement Portal on line at <https://suppliers.bart.gov> in order to download the Contract Documents, Drawings and Specifications. Specifications are available for viewing at the Office of DMZ Builders by calling to make an appointment.

Please send quotes to: estimating@dmzbuilders.com or fax to 925-826-5766 at least by close of business on 5/7/2018 and include any certification you may have. Subcontractors must be certified under the CUCP Uniform Certification as a DBE. DMZ Builders is a union signatory contractor. Subcontractors must provide their contractor's active license number and Department of Industrial Relations (DIR) registration number with their quote. Subcontractors will be required to execute DMZ Builders Standard Subcontract Terms and Conditions and meet insurance requirements, including Worker's Compensation Waiver of Subrogation. A copy of our Standard Subcontract Terms and Conditions and Purchase Order Agreement (for suppliers) are available for review in electronic format, upon request. Subcontractors will be required to provide payment and performance bonds in the amount of 100 percent of Subcontract value. DMZ Builders will reimburse Subcontractors for bond premium at actual cost, not to exceed 2.0%. For any assistance in obtaining bonding, lines of credit, insurance, equipment, supplies and materials, technical assistance, and/or any other coordination required for the project, please contact Aravind Duvvuru: Phone # 925-826-5387, Fax # 925-826-5766, or e-mail estimating@dmzbuilders.com. DMZ will work with interested subcontractors and suppliers to identify opportunities to divide items/work into economically feasible packages. DMZ Builders intends to work cooperatively with all qualified firms seeking work on this project.
