

The Building Blocks of Local Government Innovation

There's a lot more to it than a light bulb moment. It won't happen without the basic foundations in place.

By Jerry Newfarmer

From open-data projects to predictive policing, everyone in local government wants to innovate right now. Ours is a golden age for innovation, with technology enabling government leaders to radically change the way they do business and share their success stories with the world.

But achieving true innovation requires more than a light-bulb moment. Innovation sits atop the pyramid of developmental stages that nearly all local governments go through, and each level in the pyramid is foundational to others. Any organization wishing to achieve transformational innovation -- which should include all governments -- must first master the lower levels, because breakdowns at those levels will hinder or prevent breakthroughs at the highest level. As Thomas Edison said, "Genius is 1 percent inspiration and 99 percent perspiration."

At the base is strong support at the departmental level, providing employees with the elements they need to accomplish their missions. This requires leaders to put people, technology, policies and procedures in place that will foster stable financial management, accountability, compliance with policies, teamwork and demonstrated values, including high ethical standards and professional practices. Breakdowns at this level can affect the

legitimacy of government in the eyes of the public and create barriers to providing good service.

After all, the primary purpose of municipal operations is to ensure excellent service-delivery operations for police, fire, public works, utilities, health and human services, parks and more. This is the most visible part of the any local government. Excellence in service delivery involves having the right people in the right places, along with the tools, policies and practices they need.

Having these elements in place also sets the stage for the top level of innovation. With the organization running well, people in it are empowered to think beyond day-to-day problems and turn their attention to emerging issues, needs, problems and opportunities, and they can work to develop the strategies needed to address them.

This includes trying new ideas, with the recognition that needs change and approaches need to change as well. This is not a risk-free process. But if the first two building blocks -- departmental support and service-delivery system -- are mastered, employees understand that they can afford to take risks without jeopardizing the organization's mission. If leaders fail to provide these two foundational blocks, the risk for error in innovation increases greatly and may lead to disappointing results. Leaders must have the backs of the innovators.

Most local-government leaders want to be innovative; they want to solve the most pressing needs of their communities and foster ideas that improve their constituents' quality of life. But innovation is almost always the culmination of careful processes that uncover needs and point to solutions.

By paying attention to the basic functions of government -- by making sure our organizations have the necessary people, policies and practices in place and can competently deliver the services that residents expect -- leaders set the stage for true innovations that have the power to transform.

Subcontractors and Suppliers are expected to bid per plans and specifications, including requirements for warranties. Standard manufacturer's warranties, if not in conformance with owner's specifications, will not be accepted.

Gensler Selected as ENR California Design Firm of the Year

By Scott Blair

The June edition of ENR California will feature the top-ranked design firms based on 2014 revenue. It was a stand-out year for most design firms, with nine of the top 10 ranked firms seeing large revenue increases.

One of those firms experiencing exceptional growth, Gensler, has been selected as ENR California's 2015 Design Firm of the Year. But it isn't just revenue growth that spurred the award. Gensler's current slate of projects demonstrates a deep commitment to innovation, collaboration and sustainability. From the \$1-billion Metropolis mixed-use development currently under construction in downtown Los Angeles to the \$250-million San Francisco International Airport Terminal 3 East project, Gensler is reshaping the built landscape throughout the state. Other projects include the collaborative design-build \$961-million LAX Midfield Satellite Concourse project, Nvidia's futuristic headquarters in Santa Clara, the LEED-Gold-targeting 222 Second Street office tower in San Francisco and the recently announced \$500-million expansion to L.A. Live and J.W. Marriott.

The Design Firm of the Year is selected based on a variety of factors, including revenue performance, sustainability, community involvement and quality of work. Two firms from among those participating in the top design firms survey are selected as nominees, and ENR's regional and national editors vote to select the winning firm.

Read more about the firm and its projects in the June issue of ENR California, along with rankings of all the top design firms in a variety of categories, from green revenue to water supply.

May 16, 2015 @ 2:00 PM (PST).

Public Legal Advertisers: The Small Business Exchange gives you more coverage and better results

The best way to reach the African American, Chinese and Hispanic communities

Resolution 242-12: On June 28, 2012 San Francisco Board of Supervisors designated the Small Business Exchange newspaper as a minority outreach newspaper for the following communities for FY 12-13: African American, Chinese, Hispanic.

And the best return on your advertising dollar

The Small Business Exchange assists public agencies in buying goods and services through economic downturns and budget cuts by offering lower advertising rates and cost-efficient value-added services.

Advertise in the Small Business Exchange and receive these benefits:

- Targeted distribution by industry, location, focus group(s) from our comprehensive and constantly updated 1.5 million business-to-business database.
- Our multi-channel distribution system delivers your message via print, email and online for maximum exposure.
- More bidders, which reduces the cost of goods and services to purchase.
- Wider and more diverse business participation.

California Sub-Bid Request Ads

REQUEST FOR CERTIFIED DBE SUBS AND SUPPLIERS FOR:

Road 224 Bridge over Deer Creek
EE: \$3,730,000
County of Tulare
Federal Aid Project No. BR-NBIL(523)
BID DATE: May 7, 2015 at 2:00 PM
DBE GOAL: 2%

We are soliciting and encourage participation of DBE firms to provide quotes for the types of work and materials. This is a highway project with typical items of work associated to, but not limited to: Traffic Control, Joint Seal, SWPP Plan, SWPPP Materials, CAS/Roadside Signage, Clear & Grub, Erosion Control, Striping & Markings, AC Paving, CIDH, Rebar, Post Tensioning, MBGR, Bridge Concrete Barrier, Type 3 Barriades, Construction Material Suppliers, Steel Pipe Pile, Trucking, Street Sweeping, Concrete Pumping, Ready Mix Concrete, Aggregates Supply including: Class 2 AB, Structural Backfill, Rockslope Protection), Surveying and Asbestos Monitoring.

Non-DBE Subs/Suppliers: You will be expected to carry a proportionate percentage of 2nd-tier participation with your quote. 2nd-tier participation will be evaluated with your price.

100% performance and payment bonds will be required for the full amount of the subcontract price. Please contact Flatiron for any assistance to this solicitation, including obtaining bonding, insurance, equipment, materials and/or supplies. Provide subcontractor and supplier quotes as early as possible to enable estimators to perform a thorough evaluation of all quotes received. Quotes will be broken down into comparable packages as reasonably necessary to facilitate participation. Quotes must be valid for the same duration as specified by the Owner for Contract Award. We are signatory to Operating Engineers, Laborers, Ironworkers, Cement Masons, Carpenters and Pile Drivers Unions. Non-signatory subs will be required to sign an agreement for trades covered under our union agreements. Flatiron intends to work cooperatively with subcontractors and suppliers for all bid items you are licensed and qualified to perform. Bid items can be split to facilitate participation from all certified firms. Flatiron West will reimburse for bond premium up to 2%. Subs must possess current contractors license, insurance and workers compensation coverage meeting our requirements. Waiver of Subrogation is required. Please contact Flatiron for any assistance required by your firm. Subcontractors will be required to execute our standard subcontract agreement and agree to the standard general terms & conditions. Please contact me if you would like copies for review prior to bid day.

Unofficial plans and specs and associated project documents and reports are available for free download on the County of Tulare Public Works Website at the following link <http://tularecounty.ca.gov/rma/index.cfm/public-works/public-works-projects/request-for-bid-proposals-for-construction-projects/road-224-deer-creek-bridge-replacement/> An official hard copy is available for purchase for \$25 at the Resource Management Agency Permit Center at 5961 South Mooney Blvd Visalia, CA 93277 Phone 559-624-7000. Contact me for assistance with the plans and specs. Project documents may also be viewed in our office by appointment only. Email: LiSimon@flatironcorp.com for appointment to view/access plans and specs in our office.
