

SBE NEWS ALERT

Contractors Add 19,000 Jobs In March To Hit Highest Level Since June 2009

Residential and Nonresidential Employment Both Increase but Ongoing Exodus of Experienced Workers Raises Urgency of Strengthening Public Measures to Attract and Train Workers, Association Officials Warn

Construction employers added 19,000 workers to payrolls in March, bringing industry employment to the highest level since June 2009, while the industry's unemployment rate dropped to the lowest March level in seven years, according to an analysis of new government data by the Associated General Contractors of America. Association officials warned that the pool of available workers is declining rapidly, raising the prospects for significant labor shortages if demand continues to expand.

"The rate of construction hiring continues to outrun job growth in the overall economy for the past year," said Ken Simonson, the association's chief economist. "Furthermore, the pickup has been well balanced, as both nonresidential and residential construction segments added workers last month and over the past 12 months."

Construction employment totaled 5,964,000 in March, a gain of 151,000 or 2.6 percent from a year earlier, compared with a rise in total nonfarm employment of 1.7 percent over that period, Simonson noted. Residential building and specialty trade contractors added a combined total of 9,100 workers in March and 103,000 (4.8 percent) over 12 months. Nonresidential construction—building, specialty trades and heavy and civil engineer-

ing contractors—grew by 9,900 employees last month and 48,800 (1.3 percent) since March 2013.

"Although most construction employers who need workers have been able to find them so far, increasing numbers of contractors say they are having difficulty hiring," Simonson warned. "Last month, the number of unemployed former construction workers fell to the lowest March level since 2007. More of these experienced workers are leaving the industry than are rejoining it."

The unemployment rate for workers actively looking for jobs and last employed in construction declined from 14.7 percent a year earlier to 11.3 percent last month. Simonson noted that the unemployment rate for construction workers had fallen by more than half since March 2010, when it reached 24.9 percent. During that time, the number of unemployed workers who last worked in construction declined by 1.3 million, but industry employment increased by only 445,000.

"Based on projects that have been announced in recent months, contractors are likely to be seeking workers for many types of construction in most parts of the country this spring," Simonson added. "Multifamily, manufacturing, and oil and gas-related facilities will generate particularly strong demand for workers. It will be a challenge to fill all the openings."

Association officials said that one reason the industry is likely to face labor shortages is because

of the declining number of secondary-level construction training programs. They urged federal, state and local officials to take steps designed to make it easier for schools, construction firms and local trade associations to establish new training programs for future construction workers.

"If elected and appointed officials don't act soon to improve the quantity and quality of training opportunities for future workers, many firms are going to have a hard time keeping up with demand," said Stephen E. Sandherr, the association's chief executive officer. "The last thing the economy needs is to have labor shortages undermine the construction industry's long hoped-for recovery."

March, 2014

CALIFORNIA STATE UNIVERSITY STANISLAUS

CENTRAL PLANT COOLING TOWER REPLACEMENT, PROJECT NUMBER 8408 CSU STANISLAUS ONE UNIVERSITY CIRCLE TURLOCK, CA 95382

The Trustees of the California State University will receive sealed bid proposals in room MSR290 at the above address, for furnishing all labor and materials for construction of the Central Plant Cooling Tower Replacement **Project Number 8408**, for the CSU Stanislaus, campus.

Proposals will be received in the above-mentioned room until 2:00 p.m. on May 1, 2014 in accordance with the contract documents, at which time the proposals will be publicly opened and read.

In general, the work consists of replacing a cooling tower in accordance with the plans and specifications prepared by P2S Engineering, telephone: (818) 585-1796. Plans and specifications may be seen at the office of the University and Plan Rooms. Engineer's construction estimate is \$830,000.

Plans and specifications will be available for review and purchase after April 10th by requesting them from ARC by going to www.e-ARC.com/ca/modesto then clicking on "Public Planroom" or by calling the ARC Modesto location at, (209) 524-2924 asking for the PlanWell Department. Plans and specifications cost approximately \$100.00 per set plus tax and shipping payable to ARC and are non-refundable.

Each bidder offering a proposal must comply with bidding provisions of Article 2.00 et seq. of the Contract General Conditions. The bidder should familiarize himself with all the provisions of the Contract General Conditions and Supplementary General Conditions, especially Article 2.02, regarding the necessity to prequalify with the Trustees ten (10) business days prior to the bid date.

Bidders must be prequalified with the Trustees. Prequalification of Prospective Bidders, Form 703.11 can be downloaded from the internet at http://www.calstate.edu/cpdc/cm/contractor_prequal_bidders.shtml.

This project is a public works project and is subject to prevailing wage rate laws (see Contract General Conditions, Article 4.02-c).

A mandatory pre-bid walkthrough has been scheduled for Thursday, April 17, 2014 at 10:00 am. Interested bidders should assemble at the Mary Stuart Rogers Building, conference room MSR130 on the campus.

The Trustees require the successful bidder to achieve three percent (3%) DVBE participation in contracting construction projects as established in the bidding documents, and this must occur prior to the bid opening.

It will be the responsibility of each bidder to obtain a bid proposal package in sufficient time to fulfill requirements therein. Bid proposal packages are obtainable only by **prequalified** contractors, licensed in the State of California with an C20 license, and the bid packages must be requested from the Trustees, located at CSU Stanislaus, One University Circle, Turlock CA 95382; Attention: Debbie DaRosa, (209) 667-3987.
