

## Going Mobile: The Benefits of Mobile Construction Technology

Photo by [www.constructconnect.com](http://www.constructconnect.com)

*[Article was originally posted on  
[www.constructconnect.com](http://www.constructconnect.com)]*

by Kendall Jones,

“I can pull up by the curb. I can make it on the road. Goin’ mobile. I can stop in any street and talk with people that we meet. Goin’ mobile. Keep me movin’.” – The Who

Walk onto any construction site today and you’re bound to see mobile technology being used. Whether it’s workers clocking in with mobile time cards, a foreman filing daily reports with his smartphone, or a project manager reviewing plans and specs on a tablet during a site visit, mobile technology is making a big impact on the jobsite.

Mobile technology, as we know it today, is a fairly new concept. Modern smartphones have been around for just over a decade with the launch of Apple’s iPhone in 2007 and the first Android device in 2008. This was quickly followed by third-party apps and tablets. A couple of years after that we got 4G broadband cellular with faster internet speeds.

Prior to this, the best things you could count as mobile tech was a laptop equipped with an Air-Card and a cell phone or PDA with limited func-

tionality compared to today’s smartphones and tablets. Mobile technology has certainly come a long way in a short amount of time.

For construction professionals, adopting mobile technology into their workflows makes perfect sense. Between the office, the jobsites, meetings with stakeholders, and attending pre-bid conferences, you’re always on the go. Having the ability to access the tools and information to get the job done from wherever you are is important.

There are mobile solutions to help manage every aspect of a construction project. From preconstruction to scheduling, from project management and field reporting to managing your back office, there’s a solution out there to help streamline your processes and improve productivity.

### **Better Recordkeeping**

Mobile technology allows for real-time data collection and transmission between the jobsite and project managers back at the office. Cloud-based solutions enable employees on the jobsite to submit timecards, daily reports, requests for information (RFIs), work records, change orders, and other verified documentation.

Let’s face it, keeping records on paper is cumbersome and inefficient. Reports can easily get lost or filed incorrectly and it’s a slow way to get critical data and information like daily reports in the hands of decision-makers like project managers who rely on that information to keep a project on schedule and within budget.

Mobile solutions allow information to flow in real-time and documents can be recorded with date and timestamps along with GPS location data and digital signatures to ensure accuracy and authenticity.

Eliminating paperwork with electronic reporting can save hundreds of hours per year in redundant data entry and automatically organizes critical files—no more shuffling through files looking for old reports.

### **Real-Time Collaboration**

Being able to effectively communicate and collaborate is a key component of any successful construction project. When team members and stakeholders have access to the same information in real time, it streamlines the collaboration process and makes conversations more productive.

**ATTENTION PROPERTY OWNERS:**

**60-DAY COURTESY NOTICE**

The Department of Building Inspection (DBI) is reminding property owners to comply with the Accessible Business Entrance (ABE) program, which requires buildings with a place of "public accommodation" to have all primary entrances from the public way accessible for people with disabilities. The ABE helps owners comply with existing Federal and State disability access laws.

If you have property that houses a commercial storefront, your property may fall under the ABE program and may be required to submit documentation to DBI. To comply, you are required to submit one of the following: a Pre-Screening, Waiver or Category Checklist Compliance form by January 1, 2019. To read about the Program's requirements and your next steps, visit [sfdbi.org/businessentrance](http://sfdbi.org/businessentrance).

## AUDIENCE PROFILE Small Business Exchange, Inc.

# 5 Reasons You Need a Business Plan

By *Allen Gutierrez, SBA Official*,

If you are starting a small business, there is no shortage of advice on the steps you should take: registering your business name, getting a Tax ID, deciding on a business structure and applying for the needed permits and licenses. While these are all very important steps to take, a business plan will be central to how you start, grow and develop your business.

Here are 5 reasons why you need a business plan:

## 1. It will help you steer your business as you start and grow.

Think of a business plan as a GPS to get your business going. A good business plan guides you through each stage of starting and managing your business. You'll use your business plan like a GPS for how to structure, run, and grow your new business. It's a way to think through and detail all the key elements of how your business will run.

## 2. It's not as hard as you think.

A business plan is a written tool about your business that projects 3-5 years ahead and outlines the path your business intends to take to make money and grow revenue. Think of it as a living project for your business, and not as a one-time document. Break it down into mini-plans – one for sales and marketing, one for pricing, one for operations, and so on.

## 3. It will help you to reach business milestones.

A well-thought-out business plan helps you to step back and think objectively about the key elements of your business and informs your decision making as you move forward. It is essential whether you need to secure a business loan or not. Keep in mind that the plan does not have to be like an encyclopedia and does not have to have all the answers.

## 4. It can help you get funding.

Business plans can help you get funding or bring on new business partners. Having one in place will help investors feel confident that they will see a return on their investment. Your business plan is the tool you will use to persuade others that working with you (or investing in your business) is a smart decision.

## 5. There's no wrong way to write a business plan.

There is no right or wrong way to write a business plan. You can pick a plan format that works best for you. What's important is that your business plan meets your needs. Most business plans fall into one of two common categories: traditional or lean startup.

Traditional business plans are more common, use a standard structure, and encourage you to go into detail in each section. Traditional plans tend to require more work upfront. Lean startup business plans are less common, but still use a standard

structure. They focus on summarizing only the most important points of the key elements of your plan. They can take as little as one hour to make and are typically just one page.

Because knowing where to start can be challenging, the SBA has tools to help make writing a business plan less intimidating and time consuming. The SBA offers a Business Plan Tool that helps simplify the process. The tool consists of eight easy-to-follow steps to help create a well-prepared plan.

To learn more about putting your business plan together, go to the SBA's online Learning Center and take the self-paced course on How to Write a Business Plan. The course explains the importance of business planning, describes the components of a plan, and provides access to resources and sample plans. You can also take a look at the SBA's Business Planning Guide for more information and to view business plan templates.

If you want a more hands-on approach, you can get assistance from an SBA resource partner to help complete your business plan. Working with a mentor or counselor from SCORE, a Small Business Development Center or a Women's Business Center can help with all aspects of starting, growing or expanding your business.

# Millennial Entrepreneurs are a Force for Change

By *Allen Gutierrez, SBA Official*,

Millennials are believed to be among the largest generation in the United States, even on the cusp of surpassing the great generation of Baby Boomers as the nation's largest living adult generation. There is no doubt that Millennials have made their mark and their inclination for all things digital has sparked an evolution of change in traditional institutions and in the way they do business. For Millennials, technology, innovation, creativity and thinking outside the box are the new norms that will undoubtedly catapult us into the future.

That creative thinking was the spark that propelled Katie Steller on the path of entrepreneurship.

Katie is owner of the Minneapolis-based Steller Hair Company, and she is the SBA's 2018 Minnesota Young Entrepreneur of the Year. At age 11, Katie was diagnosed with an autoimmune disease that dictated much of her childhood, but not her spirit. By age 18, her illness had progressed, and her large intestine was removed. The serious health challenges caused her hair to start falling out. Seeing Katie's distress, her mom took her to a salon for a professional haircut, something she had never had before. After having her hair cut

and styled, she discovered the impact hairstylists could make on their clients. Sitting in the stylist's chair that day, Katie was no longer defined by her illness and she felt like a person again.

That experience led to Katie's desire to help others feel the same way. She enrolled in cosmetology school, then worked as a stylist and an educator helping to train others. Soon after, Katie was able to open her own salon and provide her employees with competitive salaries. Like Katie, many Millennials were born with an innate entrepreneurial spirit – a core desire to connect with the world around them, create their own path, and cultivate a shared sense of purpose. Katie has done just that with her salon. In every aspect of her life, she strives to be an advocate for others, her employees, her clients and her community.

At the SBA, our mission is to help small businesses start, grow, expand and recover from declared disasters. We offer counseling and access to capital among our services, both through our 68 district offices and our resource partner network in communities across the country. We have the proven tools needed to help bridge the gap for young entrepreneurs, providing strong resources to help them grow their businesses, reach new markets and realize their full potential. With the

help of our resource partners, including the Women's Business Centers, the Small Business Development Centers, and SCORE, we reach more than one million small business owners every year through mentoring, counseling and training.

We know that Millennials have a unique way of learning and doing business, and we have evolved in some of the traditional business training methods to be more interactive, dynamic and online. The SBA has an extensive learning center online to help you start and run your business.

From the planning stages of her salon to its operation today, Katie has received mentoring and business development resources from Women-Venture, an SBA Women's Business Center in Minneapolis that helps women entrepreneurs at all stages of business development, from conception to launch and growth. The SBA has helped Katie, and we can help you too.

Have you thought about owning your own business? Are you considering ways to build a financial future for yourself, your family or your community? Let the SBA help guide you on your path to entrepreneurship. Find out how we can help you at [sba.gov](http://sba.gov).

## Going Mobile: The Benefits of Mobile Construction Technology

Continued from page 1

Mobile technology and cloud-based solutions allow everyone on a project to be able to review and update documents, reports, plans, and specifications in real time, keeping everyone on the same page as work progresses.

When issues arise on the jobsite, a worker can easily snap a few photos of the problem, create a report, and immediately send it off to be reviewed and quickly resolved. No more waiting for around for revised plan sheets to be delivered to the site, they can be pushed straight to your smartphone or tablet.

You can also pull that smartphone out of your pocket and use it as a, get this, an actual phone to make a call if a more in-depth conversation needs to be held regarding the project.

### Improved Efficiency, Increased Productivity

Project management has never been easier thanks to the benefits of mobile technology. Workflows and processes can be better managed with the

right cloud-based mobile solutions. Being able to schedule labor and equipment, conduct field inspections, manage change orders, document progress, and review plans and specs from a single device can greatly improve efficiency on a jobsite.

The ability to easily access and analyze all the project data collected from anywhere lets you decrease downtime, make better decisions faster, and improve productivity on your projects. With the right mobile solutions, you can get notified of issues or possible delays as quickly as they arise. This allows you to mitigate risks and avoid costly rework in a way that was wasn't possible just a decade ago.

### Mobile Office

Mobile technology allows you to stay connected and in the know wherever you need to be. This can save you countless trips from the jobsite back to the office to file reports, submit RFIs, or pick up revised drawings.

Your smartphone or tablet can turn anywhere into a mobile office—the jobsite, your truck, the cof-

fee shop, etc. Wherever you are, regardless of the time of day, you can quickly manage your projects to keep them moving.

Mobile technology isn't just limited to apps and software on a smartphone or tablet. Telematics data from heavy equipment, drones, smart hard hats, and virtual and augmented reality are all using mobile technology to improve safety, increase productivity, and improve project management processes on the construction site.

As mobile technology continues to expand to all facets of construction management, being able to adopt, adapt to, and leverage that technology will help you get an edge on your competition and keep you moving.

## **SAN FRANCISCO TRAFFIC COMPANY & FORENSIC SERVICES DIVISION (TCFSD)**

**REQUEST FOR QUALIFICATIONS  
TRADES: FIRE PROTECTION/PILES**

**ISSUED: 12/04/2018**

**DUE: 12/18/2018**

### **GENERAL PROJECT INFORMATION**

The proposed San Francisco Police Department (“SFPD”) Traffic Company and Forensic Services Division (“TC&FSD”) project is a three story building with approximately 90,000 square feet of floor space, plus about 6,300 square feet of unconditioned semi-open motorcycle parking outside of the building’s footprint for the Traffic Company, which occupies roughly 20% of the building program area.

### **Submittal Requirements**

Completed Request For Qualifications (RFQ) submittals shall be due on 12/18/2018 by 5:00 PM. RFQ submittals shall be submitted via building connected or emailed to [rachel.browne@clarkconstruction.com](mailto:rachel.browne@clarkconstruction.com). Email subject line must read “TCFSD RFQ – COMPANY NAME”

### **Availability of RFQ Documents**

All subcontractors can access the RFQ documents at the following Box link, which is synced with Building Connected: <https://clarkconstruction.box.com/v/crimelabrfq>.

### **Requests for Information and Contact**

Subcontractors shall promptly notify Clark in writing of any ambiguity, discrepancy, or omission discovered in the Request for Qualifications documents. All inquiries shall be submitted via e-mail to [rachel.browne@clarkconstruction.com](mailto:rachel.browne@clarkconstruction.com).

# Public Legal Notices

CITY & COUNTY OF SAN FRANCISCO  
DEPARTMENT OF PUBLIC WORKS

**Contract No. 1000010916**  
**ALICE CHALMERS**  
**PLAYGROUND RENOVATION**

Sealed bids will be received at 1155 Market Street, 4th Floor, San Francisco, California 94103 until **2:30:00 p.m. on January 9, 2019**, after which they will be publicly opened and read. Digital files of Bid Documents, Plan Holders Lists, and Addenda may be downloaded at no cost from the Public Works Electronic Bid Documents Download site at [www.sf-publicworks.org/biddocs](http://www.sf-publicworks.org/biddocs). Please visit the Contracts, Bids and Payments webpage at [www.sfpublishworks.org](http://www.sfpublishworks.org) for more information (click on Resources > Contractor Resources). Notices regarding Addenda and other bid changes will be distributed by email to Plan Holders.

The work to be done under this contract is located at Alice Chalmers Playground at 670 Brunswick Street, San Francisco, CA and primarily consists of renovating the children's play area, renovating two clubhouse restrooms, all grading, drainage, and site paving to comply with accessibility requirements and standards. Additional work includes new irrigation and landscaping, lighting, and fencing as shown on the drawings and as specified in the Project Manual. The time allowed for completion is 180 consecutive calendar days. The Engineer's estimate is approximately \$1,450,000. For more information, contact the Project Manager, **Charlene Angsuo** at 415-575-5652.

**On July 1, 2014, the registration program under section 1725.5 of the California Labor Code went into effect. The program requires that all contractors and subcontractors who bid or work on a public works project register and pay an annual fee to the California Department of Industrial Relations ("DIR").**

**No contractor or subcontractor may be listed in a bid or awarded a contract for a public works project unless registered with the DIR as required by Labor Code section 1725.5 [with limited exceptions from this requirement for bid purposes only under Labor Code section 1771.1(a)].**

This Project shall incorporate the required partnering elements for **Partnering Level 1**. Refer to Section 01 31 33 for more details.

Pursuant to San Francisco Administrative Code ("Administrative Code") Section 6.25 and Chapter 25 of the Environment Code, "Clean Construction" is required for the performance of all work.

This Contract is subject to the requirements of Administrative Code Chapter 12X, which prohibits the City from entering into any Contract with a Contractor that has its United States headquarters in a state with laws that perpetuate discrimination against LGBT populations ("Covered State") or where any or all of the work on the contract will be performed in any of those states. A list of states on the Covered State List can be found at: <https://oag.ca.gov/ab1887>.

The Specifications include liquidated damages. Contract will be on a Lump Sum Bid Items basis. Progressive payments will be made.

The Contract will be awarded to the lowest responsible responsive bidder.

A bid may be rejected if the City determines that any of the bid item prices are materially unbalanced to the potential detriment of the City.

Bid discounts may be applied as per Administrative Code Chapter 14B. LBE Subcontracting Participation Requirement is **14%**. Call Ian Fernando at 415-581-2307 for details. In accordance with Administrative Code Chapter 14B requirements, all bidders shall submit documented good faith efforts with their bids, except those who exceed the above stated LBE Subcontracting Participation Requirement by 35%.

Bidders must achieve 80 out of 100 points to be deemed responsive. Bidders will receive 15 points for attending the pre-bid conference, if scheduled. Refer to CMD Form 2B.

A pre-bid conference will be held on **December 13, 2018 at 10:00 a.m.** at Alice Chalmers Playground, 670 Brunswick St, San Francisco, CA.

For information on the City's Surety Bond and Finance Program, call 415-986-3999 or [bond@imwis.com](mailto:bond@imwis.com).

A corporate surety bond or certified check for ten percent (10%) of the amount bid

must accompany each bid. Administrative Code Section 6.22(a) requires all construction greater than \$25,000 to include performance and payment bonds for 100% of the contract award.

**Class "A" license required to bid.**

In accordance with Administrative Code Chapter 6, no bid is accepted and no contract in excess of \$600,000 is awarded by the City and County of San Francisco until such time as the General Manager of the Recreation and Park Department recommends the contract for award, and the Recreation and Park Commission then adopts a resolution awarding the Contract. Pursuant to Charter Section 3.105, all contract awards are subject to certification by the Controller as to the availability of funds.

Minimum wage rates for this project must comply with the current General Prevailing Wage as determined by the State Department of Industrial Relations. Minimum wage rates other than applicable to General Prevailing Wage must comply with Administrative Code Chapter 12P, Minimum Compensation Ordinance.

This Project is subject to the requirements of the San Francisco Local Hiring Policy for Construction ("Policy") as set forth in Administrative Code Section 6.22(g). Bidders are hereby advised that the requirements of the Policy will be incorporated as a material term of any contract awarded for the Project. Refer to Section 00 73 30 of the Project Manual for more information.

Bidders are hereby advised that the Contractor to whom the Contract is awarded must be certified by the Contract Monitoring Division as being in compliance with the Equal Benefits Provisions of Chapter 12B of the Administrative Code within two weeks after notification of award.

If a bidder objects on any ground to any bid specification or legal requirement imposed by this Advertisement for Bids, the bidder shall, no later than the 10th working day prior to the date of Bid opening, provide written notice to the Contract Administration Division, San Francisco Public Works, setting forth with specificity the grounds for the objection.

Right reserved to reject any or all bids and waive any minor irregularities.
