

## 4 Standout U.S. City Labor Markets – Austin, San Jose, Orlando and Salt Lake City

By *Alex Carrick,*

Currently, there are four U.S. large-population cities that are standouts for their strong labor markets – Austin, San Jose, Orlando, and Salt Lake City.

This conclusion is based on rankings of the nation's 51 metropolitan statistical areas (MSAs) with downtown plus suburban populations of a million or more each in two ways: (1) according to year-over-year jobs growth (with fastest to slowest being best); and (2) by unemployment rates (with lower rather than higher being better).

The results appear in accompanying Table 1. A horizontal line separates the Top 12 on both the jobs growth (left) and unemployment rate (right) sides of the table.

Only the shaded cities, – Austin, San Jose, Orlando, and Salt Lake City, – appear in the 'best' dozen for both high employment growth and low jobless rates.

Orlando is number 1 one for jobs growth and number 12 for unemployment rate; Austin is 3 for jobs growth and 5 for unemployment rate; San Jose is 6 for jobs growth and 4 for unemployment rate; and Salt Lake City is ranked 10 for both jobs growth and unemployment rate.

Nashville, which is number 1 for unemployment rate, ranks further down, 21st, for jobs growth. Boston is number 2 for unemployment rate but is only 24th for jobs growth. San Francisco, which is number 3 for unemployment rate is a respectable 16th for jobs growth.

Indianapolis and Oklahoma City also deserve shout-outs. In the table, Indianapolis has relatively high rankings for both jobs growth (13th) and unemployment rate (14th). Oklahoma City is 8th for unemployment rate and a respectable 21st for jobs growth.

Mention should be made, that three of the cities among the Top 12 for jobs growth have been making those strong advances relative to weak levels of employment (i.e., they've been climbing off small bases). Phoenix (2nd for jobs growth), Las Vegas (5th), and Cleveland (11th) are in the bottom three positions

(50, 49, and 51 respectively) among all 51 cities for unemployment rates.

Moving to the 'dark side' of the table, are the cities that are in the Bottom 12 for both jobs growth and unemployment rates? Yes, sad to say, there are five such MSAs – Chicago, Buffalo, Pittsburgh, Los Angeles, and Detroit.

Returning to the hottest labor markets for final commentary, there's evidence that feverish conditions in some local markets are having notable impacts on earnings. For Q4 2018 versus Q4 2017, Orlando's private-sector all-jobs average hourly earnings increased +8.8%, with average weekly earnings even stronger at +10.8%.

Seattle's y/y paychecks in Q4 2018 were +8.3% hourly and +8.8% weekly. Nashville's wages also impressed, with advances of +7.2% hourly and +8.8% weekly.

# 2019 predictions from construction industry leaders

[ Article was originally posted on <https://blog.buildingconnected.com> ]

By *McKenzie Gregory*,

What can you expect for the construction industry in 2019? To find out, we asked some of the experts at top general contractors and sub-

contractors to make their best predictions for the year to come.

These are the top four predictions we gathered, plus why we think they're right on the nose.

Predictions are tough to get just right. However, these four have incredibly strong evidence

in their favor. Keep them in mind as you plan for 2019 to have your most successful year in construction yet.

**SOURCE:**

<https://blog.buildingconnected.com/2019-predictions-from-construction-industry-leaders/>

## 1. Nicole Waits, Construction Analyst at Ryan Companies

**The prediction:** “The industry will take an aggressive turn towards data-driven decision making. The baby boomer generation has a wealth of knowledge in their heads; successful companies will be working hard to bridge the knowledge gap with data.”

**The proof:** With an aging generation of construction leaders soon to retire, continuing to rely on tribal knowledge won't work to get things done anymore. Those who haven't already embraced technology will find it necessary to keep up in an increasingly competitive industry in both 2019 and beyond. That's probably why construction technology spending was up 81% in 2018.

## 3. Keith Poissot, Chief Estimator at Southland Electric

**The prediction:** “I think as far as major projects go, transportation and commercial tenant improvements will be the big winners for construction in 2019.”

**The proof:** Again, this one has clear evidence pointing in its favor. Many of the top megaprojects (projects over \$1 billion) currently under construction in the United States fall in the transportation sector, from the California High-Speed Rail to the Alaskan Way Viaduct replacement tunnel.

## 2. Scott Director, Vice President and Director of Operations at Director Door Industries

**The prediction:** “Material costs will continue to escalate, but distributors have enough backlog heading into the new year to warrant substantial growth in 2019.”

**The proof:** Just take a look at the 2019 Dodge Construction Outlook. Given the political climate and recent steel and aluminum tariffs, material costs will most likely continue to rise this year. However, even that won't be able to stifle growth, especially in sectors like infrastructure and public works.

## 4. Nick Downes, Director of Estimating and Purchasing at Plaza Construction

**The prediction:** “The construction industry is going through some changes right now, especially with all the different software options out there. I see a lot of market consolidation — and major players emerging from the pack because of it.”

**The proof:** In case you didn't hear, both BuildingConnected and PlanGrid were acquired by Autodesk in December! It's huge news for us, our partners, and our customers, of course, but it also points to a larger trend in the construction industry.
