AECOM provides on-the-ground solutions for U.S. Air Force

AECOM's designers and engineers contribute vital services supporting people and missions at major U.S. Air Force installations worldwide, meeting the needs of the Air Force Civil Engineer Center's (AFCEC) programs for the past 25 years.

That help includes program management and contract execution services for programs such as installation master planning, designing and constructing facilities, protecting the environment and establishing energy-management techniques.

AECOM's Sally Macon, vice president, federal programs, government technical services, and client manager for AFCEC, explains, "AECOM has greatly evolved its partnership with the AFCEC — moving from providing environmental services to providing full-spectrum, architectural engineering services in almost every corner of the world.

"These projects are rewarding because they require collaboration across AECOM's capabilities and geographies. The interaction and exchange of ideas encourage innovation and build on our expertise."

Transforming a barren landscape

AECOM's work in Afghanistan for AFCEC began in 2009 out of an office in Camp Bastion and is now nearing completion. The company is providing engineering, planning, design and construction support services.

"When our team arrived at Camp Bastion, which is a main operating base in Afghanistan for U.S. Marines, it was a barren desert landscape," says AECOM's Wayne McDermott, senior project manager. "We helped provide concept designs and construction oversight for more than US\$700 million in new facilities. Our fast-track response was critical to the military mission and our design of the runways, aircraft maintenance and support facilities became the model in the region."

Reducing the demand for resources

Focused on sustainability, AECOM's teams across multiple business lines and geographies identified opportunities to reduce energy and water demand at three air bases in Europe. AECOM also performed sustainable infrastructure assessments at six bases located in the eastern United States — assessing space utilization; water; lighting; heating, ventilation and air conditioning; and process

energy systems.

"AFCEC has to meet energy and water use reduction goals — and extend the life of facilities at bases worldwide," says AECOM's Annika Moman, program manager, energy. "We brought in 20 technical experts, who spent two weeks gathering data and walking more than 2 million square feet [186,000 square meters] on each base. There is a massive need for data to gauge facility conditions and opportunities for savings. When our experts finish an assessment, each facility manager has a checklist of sustainability measures to program and plan for over a seven-year period, and some which can be implemented immediately."

Envisioning a path forward

The AFCEC employed AECOM's master-planning expertise for future development of Joint Base San Antonio (JBSA) in Texas, United States, which encompasses five geographically separate bases in the San Antonio area. The client's vision was to consolidate the planning efforts for the five U.S. Army and Air Force installations, spanning more than 55,000 acres and supporting 53,000 military personnel.

"Our team provided comprehensive site modeling and created a web-based, long-range plan — optimizing land use allocation, improving operational efficiencies, and meeting future transportation and infrastructure needs," says AECOM's Komal Dewan, principal, buildings + places, and principal-in-charge for JBSA. "The master plan encompasses an innovative approach to planning to include Core Mission Districts (CMDs), which create functionally focused areas tied to mission and future growth. These CMDs allow JBSA to make function-based investment decisions regardless of location."

Building homes for Air Force families

AECOM provided Title 2 construction services for two Pacific-region installations, overseeing more than US\$200 million in housing renovations at Misawa and Kadena air bases in Japan.

"The Air Force selected AECOM for its application of leading-edge technology in base housing reconstruction," says AECOM's Bill Wanner, Pacific District construction manager, water. "We combined our construction management and information technology expertise to provide

PUBLIC LEGAL ADVERTISEMENTS

GOLDEN GATE BRIDGE HIGHWAY & TRANSPORTATION DISTRICT

NOTICE INVITING SEALED BIDS

The Golden Gate Bridge, Highway and Transportation District (District) seeks bids for **Contract No. 2013-FT-9, San Francisco Ferry Terminal Gangway and Floats Service Life Extension**. Interested Bidders must submit sealed bids to the Office of the Secretary of the District on **Tuesday, February 26, 2013 by 2:00 p.m., PST**, at which time bids will be publicly opened and read.

The District seeks bids for service life extension to the gangways and floats at the San Francisco Ferry Terminal.

A non-mandatory pre-bid conference will be held at the San Francisco Ferry Terminal, 1 Ferry Plaza, San Francisco, CA on **Friday, February 1, 2013, at**

10:00 a.m. PST.

This is a Public Works Contract. The general prevailing rates of per diem wages and the general prevailing rates for regular (straight) time, holiday and overtime work in San Francisco County for each craft, classification and type of worker needed to execute the Contract shall be set forth in the current General Prevailing Wage Determinations made by the Director of Industrial Relations pursuant to California Labor Code Part 7, Chapter 1, Art. 2, Sections 1770, 1773, and 1773.1 and any amendments thereof. The current General Prevailing Wage Determinations are incorporated into the Contract, and are available at the California Department of Industrial Relations' website (www.dir.ca.gov/dlsr/DPreWageDetermination.htm). Should the general prevailing wage rates not specify a wage determination for a particular craft classification or type of worker, attention is directed to 8 CCR 16202(b) regarding petitioning the Director of the California Department of Industrial Relations for a special wage determination. The District has made no request for such determination as the District does not know the specific craft classifications or type of workers intended by Contractor for

this project. The District has not established a labor compliance program. Responsibility for labor law enforcement remains with the Division of Labor Standards Enforcement.

The successful bidder shall furnish a performance bond and a payment bond.

The Bid Documents are available for download on the District's web site. To download the Bid Documents, go to the District's web site home page at <http://www.goldengate.org>, click on Contract Opportunities, scroll down to Ferry Division and look for Contract No. 2013-FT-9.

To inspect and obtain Bid Documents or for additional information, please contact the Office of the Secretary of the District, by telephone at (415) 923-2223, by email at districtsecretary@goldengate.org, or by facsimile at (415) 923-2013.

/s/ Janet S. Tarantino, Secretary of the District

UC IRVINE

NOTICE INVITING CONTRACTOR PREQUALIFICATION

The **University of California, Irvine (UCI)** requests the qualifications of Contractors with General Building (B) and/or Electrical (C-10) licenses wishing to submit **DESIGN BUILD** proposals for the **MESA COURT HOUSING WALKWAY LIGHTING REPLACEMENT, PROJECT NO. 996265WL**.

Prequalification questionnaires will be accepted from Contractors with General Building (B) and/or Electrical (C-10) licenses teamed with an Electrical Engineer that have completed comparable projects as described in the questionnaire.

DESCRIPTION: Replace 118 existing high-pressure sodium walkway lighting fixtures at the Mesa Court Housing complex with LED lighting including:

- Replace 93 fixtures with new LED fixtures, poles, bases, and wiring
- Retrofit 25 metal halide lamp fixtures with LED fixtures, retaining the existing housings,

poles, and bases

- Replace existing time clocks with new astronomical time clocks with battery backup
- Design the lighting layout to comply with code-mandated light levels while preventing light trespass into dormitory rooms

PROJECT DELIVERY: Design Build

ESTIMATED DESIGN AND CONSTRUCTION COST: \$340,000 - \$600,000

PROCEDURES: Prequalification questionnaires will be available electronically at 2 PM on 2/13/13 from UCI Design & Construction Services.

A **Mandatory Prequalification Conference** will be held at **10:00 AM on 2/20/13** at UCI Student Center, Doheny A Conference Room, Building 113 on Campus Map, corner of West Peltason Drive and Pereira Drive, Irvine, CA 92697.

Prequalification questionnaires must be received by **2 PM on 3/6/13** only at UCI Design & Construction Services, 101 Academy, Suite 200, Irvine, CA 92697.

UCI reserves the right to reject any or all responses to this notice, to waive non-material irregularities, and to deem Contractors prequalified to submit proposals for the project. To prequalify, Contractors must agree to comply with all proposal conditions including state prevailing wages, 10% bid bond, 100% payment and performance bonds, and insurance requirements. A contract will be awarded to the contractor/engineer team ("design builder") who offers UCI the best value.

Every effort will be made to ensure that all persons have equal access to contracts and other business opportunities with the University within the limits imposed by law or University policy. Contractors may be required to show evidence of its equal employment opportunity policy.

Contact David Donovan (949) 824-6582, ddonovan@uci.edu for the questionnaire.

For other opportunities:

www.designandconstruction.uci.edu

U.S. Air Force

online concentric project management tools via customized websites. After brief on-site training, the air base staff, designers and Japanese contractors were 'flying high' with paperless workflow routing and document tracking. The increased efficiency resulted in on-time housing deliveries to Air Force personnel and their families."

Cleaning up our environment

AECOM continues supporting AFCEC environmental programs by leading multi-million dollar, performance-based cleanup efforts across the

United States — including March Air Reserve Base in California and Point Lay Air Station and Clear Air Force Station in Alaska. Work ranges from landfill removal in the remote Arctic to implementing innovative groundwater treatment technologies.

"AECOM's technical approach and expertise in site closure and life cycle cost reduction are primary decision factors in awarding performance-based contracts," says Tim Green, vice president, federal accounts, environment, and program manager. "AECOM has technical experts at the Performance

Based Contracting Center of Excellence, who develop the best technical solutions for the most challenging of sites."

"The AFCEC is an evolving organization that continues to expand its role in managing Air Force engineering and environmental programs," concludes Macon. "As the AFCEC transforms, AECOM will continue to anticipate and meet its changing needs."
