Advocacy Research Asks, "Do Entrepreneurs Invest in Retirement?"

by Kathryn Tobias, Senior Editor

As they start and grow their business plans, do small business owners invest in their own retirement? Two new Advocacy reports compare the retirement holdings of small business owners and workers. They focus on different databases and subgroups, but both find that small business owners continue to be significantly less likely to have traditional retirement plans than workers. The studies also show that small business owners' individual retirement accounts remain stable, despite the recession.

Research by Advocacy Economist Jules Lichtenstein finds that having an underwater mortgage does not have a significant effect on the likelihood that a small business owner invested in retirement assets or on the amount accumulated.

Lichtenstein uses 2009 Census data from the Survey of Income and Program Participation to compare retirement assets of small business owners and private sector workers. A key focus is the influence of wealth holdings on retirement assets. He finds that smaller and more financially vulnerable business owners have less invested in retirement assets than

their larger or financially stronger counterparts. His study, *Financial Viability and Retirement Assets: A Look at Small Business Owners and Private Sector Workers*, is online at www.sba.gov/advocacy/7540/372811

A second report compares how well small business owners and workers who are nearing retirement age are prepared for retirement. *Retirement, Recessions, and Older Small Business Owners* by Tami Gurley-Calvez, Kandice Kapinos, and Donald Bruce, uses the 1992-2010 Health and Retirement Study conducted by the University of Michigan. It finds that small business owners are less likely to have retirement plans, but those with IRAs and Keogh accounts are likely to have larger amounts of assets in them than workers do. It also finds that older small business owners report thinking about retirement less frequently than workers in the same age group.

This study also finds both the probability of having a retirement plan and the value of IRA or Keogh accounts to be unchanged through recessions. The report is online at www.sba.gov/advocacy/7540/372751.
