China Contractor Said to Consider Balfour Beatty Bid

Photo credit: <http://www.telegraph.co.uk>

By Peter Reina, with Debra K. Rubin

Chinese contractors are making waves in the U.K. as speculation spreads from a June 7 media report of a potential Beijing bid for London-based Balfour Beatty PLC. Quoted sources, who were not identified, said the deal could be valued at up to \$3 billion.

Across the Atlantic, a Canadian publication last week said Montreal-based contracting giant SNC-Lavalin is being eyed for acquisition by Spain's Actividades de Construcción y Servicios SA (ACS) and Australia-based WorleyParsons Ltd. The report, which cited "sources familiar with the events," did not reveal a purchase price.

Balfour Beatty declines to comment on stories emanating from a UK newspaper's June 7 report that China Civil Engineering Construction Corp. (CCECC) is pondering the offer. Observers note the lack of any hard information backing the story, but the possibility of such a bid is not being ruled out.

The suggestion comes as the U.K. firm begins to recover from a torrid period of multiple profit warnings related to home market operations and the resignation last year of its CEO, Andrew McNaughton.

In an update last month, new CEO Leo Quinn, who joined in late 2014, reported progress on the company's "Build to Last" transformation program launched in February. "I continue to believe all our operations should achieve industry-standard performance against what appears to be a beneficial market environment," he noted.

With sales exceeding \$13 billion in 2014, Balfour Beatty is more than six times larger than CCECC, which ranks at No. 71 on ENR's Top 250 International Contractors list. Virtually all of its reported sales last year were outside China.

Whether or not CCECC actually buys into the UK market, its compatriot contractor China Harbour Engineering Co. Ltd last week secured a firm foothold by becoming preferred bidder on \$460 million of marine works on the world's first tidal lagoon power plant in Swansea Bay, Wales.

The lagoon contract forms "the cornerstone project in our business development strategy in the U.K. and wider Europe," according to China Harbour President and CEO Lin Yi Chong.

"We will seek to grow our U.K. presence through significant investment into a subsidiary business" and through infrastructure investment and construction there.

As well as clinching work on the lagoon's 9.5-km rock and earth enclosure, China Harbour pencilled a deal with Tidal Lagoon Power Ltd., owner of the Swansea project, to develop similar tidal power projects in Asia.

Tidal aims to start construction in Swansea Bay next spring, but must first secure two final official approvals and power agreements, possibly by this year's end.

The lagoon contract follows the entry into the U.K. of Beijing-based real estate developer Dalian Wanda Group, reportedly making its first foreign foray.

The company is investing in a \$1.4-billion London development, which includes over 100,000

sq m of residential, retail and hotel space. China State Construction Engineering Corp is in the joint venture to build the project.

All these deals, however, would be dwarfed by the potential involvement of China General Nuclear Corp. and China National Nuclear Corp. in the U.K.'s next nuclear power plant at the Hinkley complex.

The companies were chosen in 2013 by lead developer Paris-based EDF Group as partners on the estimated \$21-billion project in Somerset. Negotiations with the U.K. government over electricity pricing continue.

Vying for SNC-Lavalin

Meanwhile, in Canada, SNC-Lavalin remains an acquisition target as it battles to stay competitive amid continuing legal troubles related to alleged bribery of

Pulice Construction, Inc. is committed to ensuring that subcontractors and vendors have the maximum opportunity to successfully perform on this project, and to making good faith efforts to utilize small, minority, HUBZone, and women's business enterprises.

Houston energy contractor to make changes following shareholder vote

Willbros shareholders approved an activist investor proposal at the annual meeting on June 9. Additionally, the company announces earlier that day it would put a business segment up for sale. (Willbros Group Inc.)

By Olivia Pulsinelli

Houston-based energy contractor Willbros Group Inc. (NYSE: WG), which has faced financial struggles in recent months, announced several changes that came out of its annual meeting on June 9.

Most notably, shareholders approved an investor-led proposal that recommended all directors be elected on an annual basis.

The Northern Nevada Laborers' Trust Fund, an affiliated benefits fund of the Laborers' International Union of North America, filed the proposal. The goal of the proposal was to "bring greater accountability to executive management and bring the company's policy more in line with the practices of the majority of S&P 500 corporate boards." LIUNA said in a release, citing Willbros' "troubled history of poor performance and risk-management issues."

Willbros has made many changes in recent months. The company announced an overhaul of its business strategy last fall after major management changes, and it sold some subsidiaries earlier this year after warning it could face credit defaults.

Also on June 9, Willbros announced it would put its Professional Services segment up for sale. Meanwhile, the company will focus on the construction; maintenance; and engineering, procurement and construction services it currently offers through its Oil & Gas, Utility T&D (transmission and distribution), and Canada segments.

"Completion of this transaction will strengthen our balance sheet, reduce the risk in our business model and enhance our ability to win new work," Willbros Chairman and CEO John McNabb II said in a statement. "We expect to effect this transaction and realize the benefits from our stronger financial position by the end of the third quarter. Additionally, we believe the revenue opportunities for Willbros going forward will be driven by construction services."

However, there is no definitive timetable for the completion of a sale, Willbros said.

China Contractor Said to Consider Balfour Beatty Bid

Continued from page 1

officials on projects in Montreal and Libya by long-departed executives, including its former CEO.

Current chief Robert Card is pushing to resolve federal criminal fraud charges that if proven, could result in the firm's debarment as a government contractor for 10 years.

But the April selection of a firm-led team to build a replacement bridge in Montreal appears to signal a settlement of the case brought in February. A trial date start was pushed back to July 3 from April.

That team also includes members with existing ownership ties to ACS.

SNC-Lavalin ranks at No. 7 on ENR's list of the Top 225 Global Design Firms, with \$3.5 billion in 2013 reported design revenue, but it has about \$8.8 billion in total 2014 revenue.

Spokesman Louis-Antoine Paquin has said that SNC-Lavalin "is not engaged in any discussions of this nature with any companies."

The firm told the Financial Post that it is continuing to find a buyer for its Highway 407 privatized assets, which is believed to be worth up to \$2.2 billion.

In a June 3 note, Maxim Sytchev, E&C sector analyst for Toronto-based Dundee Securities, said the "likelihood of a strategic player taking out the entire company is relatively small."

He pointed to the Spanish firm's "very complex corporate structure" and the potential of political controversy in Quebec if ACS acquires a local corporate giant.

Sytchev also believes WorleyParsons is "simply too small and has its own host of issues to deal with." WorleyParsons declined to respond to acquisition-related media inquiries in Australia.

The analyst believes that Canadian pension funds may be a more credible buyer.

"They have the cost of capital advantage for the hard assets and patience to own a turn-around," he said. "The barrier to this scenario is ring-fencing potential legal liabilities from SNC's past transgressions."

But Sytchev sees potential for improved company results in the next 18 months, particularly in the firm's infrastructure division with key backlog growth, and LNG awards gained through new subsidiary Kentz that could add to backlog through 2017.
