CDFI Fund to Address Needs of Small Businesses and Microenterprises

The Community Development Financial Institutions Fund (CDFI Fund) announced today the launch of two new training series for Community Development Financial Institutions (CDFIs) that provide small business or microfinance loans. The series will be provided under the CDFI Fund's Capacity Building Initiative, which expands the training and technical assistance opportunities available for CDFIs nationwide.

The two series—"Innovations in Small Business Lending" and "Scaling up Microfinance"—both focus their training on financing principles that are designed to assist communities from the grassroots level. By helping entrepreneurs turn a new idea into a business, or to build upon a small business's initial success, CDFIs encourage economic growth in low-income and distressed neighborhoods.

"These two new series are exactly the type of innovative and transformative training we envisioned when we launched our Capacity Building Initiative," said CDFI Fund Director Donna J. Gambrell. "Our efforts will help CDFIs nationwide better serve their clients with the capital, credit, and other critical services they desperately need to build businesses and create jobs. And these trainings come at a time when we cannot afford to take our eye off-the-ball in regards to recovery in our country's most economically challenged communities."

Specifically:

The *Innovations in Small Business Lending* series will provide training and technical assistance to CDFIs interested in expanding their lending services to the small business sector. The series, as part of the CDFI Fund's Capacity Building Initiative, is being developed with Deloitte Financial Advisory Services, LLP (Deloitte) to address the specific needs of CDFIs.

The *Innovations in Small Business Lending* series will significantly boost the ability of CDFIs to identify key strategies for small business lending, such as evaluating new market opportunities and trends, then assessing what businesses in their communities will need support, and building the financial infrastructure and deal flow to finance them. Training sessions will set out a number of new market opportunities Deloitte has identified to be transformative in regional economies. The goals include learning how to quickly filter opportunities and identify promising and timely revenue opportunities.

The *Scaling up Microfinance* series will build the capacity of CDFIs that provide microfinance

services to meet untapped demand, improve organizational capacity, and attract institutional investors. Opportunity Finance Network (OFN) has been selected as the training and technical assistance provider to expand the capacity of CDFIs specializing in microfinance.

Today, microfinance CDFIs play a vital role in providing access to capital and other financial products to entrepreneurs who cannot qualify for traditional bank loans. However, the sector is highly labor-intensive and exhibits elevated costs associated with providing many small loans and technical assistance to borrowers. Gaining efficiencies through technology, implementing sustainable business models, and fostering collaboration between organizations will facilitate the growth and scaling of the sector. To address these needs, OFN, with the support of the CDFI Fund, will offer trainings and technical assistance in three key areas: sustainable and feasible business models, technology, and human capital.

All training opportunities will be posted on the CDFI Fund's website in the coming months.

Those interested in learning more about the *Innovations in Small Business Lending* and *Scaling up Microfinance* series can subscribe to receive free e-mail updates here. More information about the Capacity Building Initiative, and the CDFI Fund in general, is also available on the CDFI Fund's website: www.cdfifund.gov.

About the CDFI Fund

The CDFI Fund invests in and builds the capacity of community-based, private, for-profit and non-profit financial institutions with a primary mission of community development in economically distressed communities. These institutions – certified by the CDFI Fund as Community Development Financial Institutions or CDFIs – are able to respond to gaps in local markets that traditional financial institutions are not adequately serving. CDFIs provide critically needed capital, credit and other financial products in addition to technical assistance to community residents and businesses, service providers, and developers working to meet community needs. The CDFI Fund's vision is an America in which all people have adequate access to affordable capital, credit and financial services.

and advice. With access to the deep intellectual capital of more than 160,000 people worldwide, its member firms deliver services in areas of consulting, assurance and enterprise risk, tax, and financial advisory services. Deloitte Financial Advisory Services brings strong industry experience in financial transaction work – restructuring impaired assets, and developing business models that can attract new capital, and providing technical assistance to troubled institutions.

Deloitte's Financial Services Industry practice is a far-reaching network of practitioners who offer their experience to the world's leading federal and commercial financial services enterprises. This practice serves 83 percent of the financial services companies listed on the Fortune Global 500.

About Opportunity Finance Network

Opportunity Finance Network (OFN) is the national network of Community Development Financial Institutions (CDFIs)—private financial institutions that are 100 percent dedicated

to delivering responsible, affordable lending to help low-income, low-wealth, and other disadvantaged people and communities join the economic mainstream. Through 2010, OFN's network has originated more than \$24.2 billion in financing in urban, rural, and Native communities, and financed 782,907 housing units, 64,391 business and micro-enterprises, 7,674 community facilities, and created or retained 317,052 jobs. More information is available at: www.opportunityfinance.net.

**UNIVERSITY OF CALIFORNIA
SAN FRANCISCO**

ADVERTISEMENT FOR BIDS

Subject to conditions prescribed by the University of California, San Francisco, sealed bids for a lump sum contract are invited for the following Work:

**MISSION BAY ROCK HALL EMERGENCY
DRAIN REMEDIATION**

**BID PACKAGE 1: ELECTRICAL SYSTEMS
VERIFICATION**

Project No.: M1622 / Contract No.: L00431

DESCRIPTION OF WORK:

The University has identified that under-slab plumbing and electrical systems in Rock Hall on the UCSF Campus - Mission Bay have been compromised and require remediation, redesign, and replacement. The scope of this bid package will include both verification of the existing electrical systems throughout the building and the associated coordination required with the building users to minimize all impacts to daily operations. If the alternates are incorporated, the scope will also include installation and the eventual removal of temporary electrical systems and associated pathway to allow existing electrical systems to function without the need for the current underground power distribution network. Support is also to be provided, as necessary, to the University and their representatives while the verification of the electrical systems occurs to determine the extent of the temporary electrical systems necessary.

This scope includes interior renovation work to support temporary electrical utility routes. Coordination with local public utilities servicing the building as well as installation of temporary/permanent utilities may be necessary. The Work must meet building codes, and State and Federal guidelines.

The Work of this Project is divided into 2 Phases. The work of Phase 1 (45 calendar days) consists of providing temporary power arrangements to maintain electric service to the building during shutdown of electrical equipment. Phase 1 also requires the performance of investigation of power cabling and cable terminations at 12kV main switchgear and utility metering structure, switchboards SDP1 and SDP2, emergency generators, and various pull boxes and other electrical equipment.

The work of Phase 2 (Alternates - 35 calendar days) consists of providing a support structure and temporary cabling and connections for any existing permanent power feeders found to be damaged during inspection or as requested by the University. Additional contract time will be allotted for the submission of bonding, insurance and submittal paperwork as well as time to complete the field activities.

BIDDER QUALIFICATIONS: To be eligible for consideration of award, bidders must have the minimum experience set forth in the Supplementary Instructions To Bidders. Bidders must submit qualification documents as an attachment to the Bid Form.

PROCEDURES:

Bidding Documents will be available at 10AM, June 11, 2012 and will be issued only at:

UCSF Documents, Media & Mail (UCSF-DMM)
1855 Folsom Street, Room 135
San Francisco, CA 94103

Bidders must attend a mandatory pre-bid conference at 10:00 AM, June 13, 2012. For details, see <http://www.cpfm.ucsf.edu/contracts/index.htm> (Use the same website above to view complete Advertisement for Bids - Project Bidding Information).

Bids will be received and opened only at Campus Life, Facilities & Administrative Service FAS Finance Service Center, University of California, San Francisco, 654 Minnesota Street, 2nd Floor, San Francisco, CA 94107. Phone: (415) 476-5343. Bid Deadline: Sealed bids must be received on or before 3:00 PM, June 26, 2012.

Every effort will be made to ensure that all persons have equal access to contracts and other business opportunities with the University within the limits imposed by law or University policy. Each Bidder may be required to show evidence of its equal em-

ployment opportunity policy. The successful Bidder and its subcontractors will be required to follow the nondiscrimination requirements set forth in the Bidding Documents and to pay prevailing wage at the location of the work.

The successful Bidder will be required to have the following California current and active contractor's license at the time of submission of the Bid:

LICENSE CLASSIFICATION: Roofing
LICENSE CODE: C39

Estimated Construction Cost:
\$1,300,000 - \$1,500,000
