

Construction Firms Asked to Donate N95 Respirators to Local Hospitals

Image by www.constructconnect.com

[Article was originally posted on www.constructconnect.com]

By Kendall Jones,

We are currently living in some interesting times.

COVID-19, the novel coronavirus outbreak, was labeled a pandemic by the World Health Organization (WHO) on Wednesday, March 11. In the days following that announcement, we have seen our normal, everyday live upended. Many businesses scuttled to get the resources in place for employees to work from home. Schools, fitness centers, sporting events, and movie theaters have all closed. Restaurant, bars, and breweries have been restricted to drive-thru, curbside pickup, and delivery options for the time being.

Panic buying has left grocery stores' shelves emptied of hand sanitizer, toilet paper, and paper towels as well as meats, bread, canned goods, and other essentials. Many have cut back hours of operation in order to restock and sanitize their stores as well as setting aside special hours for the elderly and other at-risk shoppers to get what they need before opening to the general public.

Impact on Construction Industry

At this point, it's still too early to tell when life will return to normal but the construction industry

is also starting to feel the effects of the coronavirus outbreak and what a long-term shutdown of activity could mean. If county and city building and planning departments start shutting down, it could put a halt to current and upcoming construction projects because permits aren't being issued and inspections aren't being conducted.

At the same time, contractors are looking at how to keep their projects on schedule while also trying to protect their workers and prevent the spread of the coronavirus on the jobsite.

In Boston, Mayor Martin Walsh ordered all construction activity in the city, except for emergency work, to stop starting on March 17. The shelter-in-place order in the San Francisco Bay Area has put a halt to all construction activity, with the exception of housing projects.

The PennDOT ordered all contractors to stop working on federally-aid projects as well as cancelling some upcoming bid lettings. This week, the state offices in South Dakota are closed and only essential employees are allowed to report to work. Since DOT construction inspectors aren't on the list of essential employees, all but two high-priority DOT projects in the state are closed to contractors. Work is expected to resume on all SD DOT projects next week.

A Shortage of Face Masks and Respirators

Another issue many construction companies are facing is a shortage of face masks and respirators, or more specifically N95 respirators.

Respirators are worn, based on the respiratory hazard, to protect construction workers from gases, dusts, vapors, and fumes they come in contact with regularly on the jobsite. Common hazards include asbestos exposure when doing demolition and remediation work, lead dust from welding and cutting, silica dust from grinding and cutting concrete, and vapors from paints, coatings, and spray foam insulation.

In addition to engineering, work practice, and administrative controls that employers must use to protect workers from exposure to respiratory hazards, it is sometimes necessary for respirators to be worn. Employers are required by OSHA to provide workers with the proper respirator based on the specific hazard they are exposed to on the job.

Again, panic buying, along with a higher than expected demand by the healthcare industry across the globe for N95 respirators, has depleted supplies across the country. Without these respirators, construction companies are going to be un-

Small Business Development Centers Go Above and Beyond

By George Koklanaris,

As the American economy has changed over the past 40 years, small business has changed with it. Indeed, small business has been at the forefront of this change.

With the remarkable evolutions in technology, commerce and consumer preferences that we have seen since the Small Business Development Center Act was enacted in 1980, one thing has remained the same: small businesses continue to serve as America's engine of growth and innovation.

Today, small businesses are thriving both virtually and globally on an unprecedented scale, but yet still continues to fill the majority of traditional storefronts across the Nation providing our communities with jobs and vitality.

The Small Business Development Centers (SBDCs) are proud to foster this prosperity and innovation. From its early beginnings of eight pilot SBDCs in the late 1970s, to over 900 today, the SBDC Network has grown and evolved alongside

small businesses providing them with cutting-edge advice on everything from finance and management to technology and intellectual property. Indeed, for 40 years, the SBDCs have remained nimble to their distinct markets by tailoring their counseling and training programs to meet their clients' specific needs. This is why the SBDCs are seen by so many entrepreneurs as both their first and last stop in starting or growing their businesses.

As small businesses are dealing with the impact of the Coronavirus, the SBDCs will continue to be there providing their clients with expert advice on weathering this storm and returning to prosperity.

If you need assistance from your local SBDC or any of the services offered by the SBA, you can find it at SBA Get Local Assistance. If you are looking for specific information on coronavirus-related disaster loans, you can find it at SBA Coronavirus Disaster Assistance.

Construction Firms Asked to Donate N95 Respirators to Local Hospitals

■ **Continued from page 1**

able to complete certain tasks if they don't have the proper personal protective equipment (PPE) to provide their workers with, which they legally must do. At the same time, healthcare workers depend on these respirators to prevent contracting certain diseases and viruses, like the coronavirus, when diagnosing and treating patients.

What Are N95 Respirators?

So, what does N95 mean? N95 is a rating designation from the National Institute for Occupational Safety and Health (NIOSH). The N means that the respirator is not oil resistant and the 95 means it removes 95% of all particles that are at least 0.3 microns in diameter.

There are also R, resistant to oil, and P, oil proof respirators. The rating numbers also include 99, which removes 99% of particles that are at least 0.3 microns in diameter and 100, which removes 99.97% of all particles that are 0.3 microns in diameter or larger. Respirators are selected based on the respiratory hazard present on the construction and employers are responsible for ensuring workers are provided with the correct type and fit along with training on use and safety when wearing them.

There are also surgical N95 masks which in addition to being approved by NIOSH, are also approved by the Food and Drug Administration

(FDA) and are fluid resistant to a certified level measured against a stream of artificial blood directed at the respirator.

A Public Call for Donations

An added twist came on Tuesday, March 17 during a press conference from the White House Coronavirus Task Force. During the briefing, Vice President Pence made the following request:

"We would make one specific request and that is we would urge construction companies to donate their inventory of N95 masks to your local hospital and forgo additional orders of those industrial masks because of what the president asked to be included in legislation moving through the Congress today, those industrial masks that they use on construction sites, are perfectly acceptable for healthcare workers to be protected from a respiratory disease. But we're asking construction companies—that our president knows very well from his background—we're asking them to donate their N95 masks to their local hospitals and also forgo making additional orders."

It's a tough ask. On the one hand, it's vitally important that healthcare workers have the protection they need to diagnose treat patients and prevent themselves from contracting the virus as much as possible. On the other hand, you're asking contractors to put the livelihood of their companies and workers at stake by donating their

N95 respirators.

Obviously, the need for N95 respirators in healthcare is dire, and only expected to get worse as manufacturers try and keep up with demand, with some hospitals like Seattle Children's in Washington and Cambridge Health Alliance and Brigham and Women's Hospital in Massachusetts are putting out the call through social media and local media for donations.

How to Donate

At the time of this writing, the White House has offered no further guidelines on how construction companies can facilitate the Vice President's request, how to prioritize protecting their workers versus donating their stock of N95 respirators, or identified which hospitals and healthcare providers are in need of additional face masks and respirators.

If you are a construction company that has N95 respirators to spare and would like to donate them, your best bet is to reach out to your local hospitals to determine if they are accepting donations and how to make them.

CALIFORNIA SUB-BID REQUEST AD

INVITATION TO BID
 Request for Quotes from Certified DBE
 Subcontractors and Suppliers
 Project: Route 57/60 Separation
 Contract No. 07-304504
Owner: Department of Transportation (CALTRANS)
REVISED BID SUBMITTAL DATE:
April 28, 2020 at 2:00 PM
 Federal-Aid Project ACHSNH-P057 (069) E

Request for quotes from Certified DBE's Subcontractors and Suppliers for the following, but not limited to scopes of work: Aggregate Supply, Asphalt Dike, Asphalt Paving, CIDH Pile, Clear and Grub, Cold Plane AC, Concrete Barrier, Concrete Supply, Construction Area Signs, Drill and Bond Dowel, Electrical, Fencing, Grind Existing Pavement, Guardrail, Hydroseeding, Landscape and Irrigation, Minor Concrete, Misc. Iron and Steel Supply, Misc. Metals Supply, Overhead Signs, PCC Material Supply, Pipe Supply, Pre/Post Construction Survey, QC Testing, Railing, Reinforcing Steel, Ready Mix Concrete Supply, Roadside Signs, Rock Slope Protection, Saw and Seal PCC, Street Sweeping, Striping, Surveys, Underground.

PLEASE SUBMIT QUOTES BY FAX TO
(760) 471-4860 OR
EMAIL TO SoCalBids@FlatironCorp.com

Plans and specifications are available, at no cost from Caltrans website: <http://ppmoe.dot.ca.gov/des/oe/weekly-ads/specs-ntb.php?c=07-304504> (Registration Required). Additionally, plans and specifications are available at Flatiron's San Diego, CA and Chino Hills, CA offices. Please call to make an appointment to view plans and specifications.

This project has a 18% DBE Goal. In addition to request for participation from Certified DBE subcontractors and suppliers, Flatiron requests non-DBE subcontractors to provide lower-tier DBE subcontractor and/or supplier participation. Bidders are required to indicate lower-tier DBE participation, as it will be evaluated as part of their quote.

Flatiron analyzes and considers each DBE quote, including those that are broken down into economically feasible units to facilitate bidding. Assistance in obtaining bonding, lines of credit, insurance, equipment, supplies and materials is available upon request. Additionally, please contact us if you require technical assistance.

Quotations must be valid for same duration as specified by Owner for contract award.

Subcontractors are required to possess and maintain a current contractor's license and must also be registered with the Department of Industrial Relations (DIR) as required by Public Contract Code Section 1725.5. Subcontractors will be required to execute Flatiron's Standard Subcontract Terms and Conditions and insurance requirements. A copy of our Standard Subcontract Terms and Conditions is available in electronic format upon request.

Bond Requirements: Notwithstanding any contrary language in a bid to Flatiron or any prior course of dealing between Flatiron and a bidder, and unless waived in writing by Flatiron, Flatiron reserves the right to require each bidder to provide payment and performance bonds assuring bidder's obligations to Flatiron in the amount of 100 percent of the bid to Flatiron. Flatiron will reimburse the bond premium at actual cost not to exceed 3%. The surety on the bonds must be a California admitted surety. **WE ARE AN EQUAL OPPORTUNITY EMPLOYER.**
