

Construction Employment Rises In 35 States and D.C.

Thirty-five states and the District of Columbia added construction jobs between February 2017 and February 2018, while 38 states added construction jobs between January and February, according to an analysis by the Associated General Contractors of America of Labor Department data released March 23. Association officials praised the latest Congressional spending bill for funding career and technical education to help young workers get into the industry.

“The construction industry continues to add employees in most of the nation, despite a shortage of workers with construction experience,” said chief economist Ken Simonson. “But job openings are growing, as contractors encounter a shrinking pool of experienced jobseekers.”

California added the most construction jobs (74,000 jobs, 9.8 percent) during the past year. Other states adding a high number of new construction jobs for the past 12 months include Texas (33,900 jobs, 4.8 percent) and Florida (31,700 jobs, 6.3 percent). West Virginia added the highest percentage of new construction jobs during the past year (14.3 percent, 4,300 jobs), followed by Nevada (10.9 percent, 8,900 jobs), California, Idaho (9.3 percent, 4,100 jobs), Arizona (9.2 percent, 13,000 jobs) and New Mexico (9.0 percent, 4,000 jobs).

Fourteen states shed construction jobs between February 2017 and February 2018, while construction employment was unchanged in Vermont. North Dakota lost the highest percentage of construction jobs, by far (minus 16.3 percent, minus 4,800 jobs), followed by Iowa minus 8.5 percent, minus 6,700 jobs), Kansas (minus 5.3 percent, minus 3,300 jobs) and Nebraska (minus 4.2 percent, minus 2,200 jobs). Iowa lost the largest number of jobs, followed by North Dakota, Missouri (minus 4,000 jobs, minus 3.2 percent) and Kansas.

“The states with the largest job gains were all recovering from natural disasters, while losses were concentrated in the Plains states,” Simonson said. “The Plains states have been hurt by a downturn in farm-related income.”

Thirty-eight states added construction jobs between January and February. New York added the most (7,700 jobs, 2.0 percent), followed by Florida (7,100 jobs, 1.4 percent) and California (6,800 jobs, 0.8 percent). Connecticut added the highest percentage of construction jobs for the month (2.6 percent, 1,500 jobs), followed by Mississippi (2.0 percent, 900 jobs), Indiana (2.0 percent, 2,800 jobs) and New York.

Construction Employment Rises In 35 States and D.C.

Continued from page 1

Eleven states lost construction jobs between January and February, while construction employment was unchanged in Alabama and D.C. Washington state lost the most construction jobs for the month (minus 1,500 jobs, minus 0.7 percent), followed by Alaska (minus 800 jobs, minus 5.0 percent) and Kansas (minus 700 jobs, minus 1.2 percent). Alaska lost the highest percentage of construction jobs, followed by Montana (minus 2.1 percent, minus 600 jobs) and Kansas.

Association officials said the widespread job gains show that construction offers good career opportunities and that public agencies at all levels of government should do more to improve the career and technical education pipeline. They praised the

funding increases passed by Congress on Thursday for programs to assist students and underemployed adults gain the skills needed for jobs in construction.

"Rebuilding career and technical education programs is essential for helping the economy expand and assure a supply of qualified construction workers," said Stephen E. Sandherr, the association's chief executive officer. "The funding bill that Congress approved on [March 22] is a good step in that direction."
