## Contractors, Unions Say OSHA Confined-Space Rule Will Save Lives

By Pam Hunter

A long-awaited federal Occupational Safety and Health Administration final rule for working in confined spaces on construction sites has received general support from industry and labor unions, which see the regulation as a positive development that will protect workers.

The rule, which OSHA released on May 1 and published in the Federal Register on May 4, establishes new requirements for working safely in confined spaces, such as pits, sewers, crawl spaces and tanks. The rule's requirements take effect on Aug. 3.

Assistant Secretary of Labor for Occupational Safety and Health David Michaels says the final version of the regulation is "substantially different" from the proposal OSHA released in 2007. "We listened to our stakeholders," he told reporters on May 1.

The changes align the requirements more closely to OSHA's confined-space standard for general industry, with some differences tailored to construction sites, Michaels said.

"Unlike most general industry worksites, construction sites are continuing evolving with the number and characteristics of confined spaces changing as work progresses," he said.

The final rule emphasizes training, continuous worksite evaluation and monitoring, and better communication on multi-employer jobsites. Employers are also required to provide training in a language and vocabulary that workers understand.

Brad Sant, American Road and Transportation Builders Association senior vice president of safety and education, says that the earlier proposal, released during the George W. Bush administration, was almost "universally viewed as a problem" by both unions and industry groups.

Most construction companies already were using the general industry standard at least as a guide, if not to the letter, Sant notes.

Still, avoidable fatalities continued to occur, OSHA says. In 2014, two workers in Georgetown, Idaho, were asphyxiated while repairing leaks in a manhole, the second worker when he went down to save the first, Michaels said.

OSHA estimates that the new rule will prevent up to five construction fatalities and 780 serious

injuries each year. "This new rule will afford construction workers the same level of protection of workers in other industries who work in confined spaces," the OSHA chief said.

Kevin Cannon, Associated General Contractors of America's senior director of safety and health services, acknowledges that the new regulation will protect workers, but says that some of its requirements could prove challenging for contractors.

For example, the rule places more responsibility on the controlling contractor for coordinating activities on multi-employer construction sites. That means if a subcontractor or other visitor on the site somehow introduces a hazard, the controlling contractor could be held liable, Cannon says.

## BGI nibbi

**Project Name: Alice Griffith Block 1: DB MEPF & Solar Hot Water**

**Location: San Francisco, California**

**Bid Date: May 20, 2015 @2:00 PM**

**Pre-Bid Meeting: May 7, 2015 @10am**

**Location: Nibbi Office: 1000 Brannan St. #102, San Francisco, CA**

Baines Group and Nibbi Brothers Joint Venture team has been selected as the General Contractor for the Alice Griffith Block 1 housing project in San Francisco, CA. We are in receipt of the 100% Design Development documents and are currently requesting bid proposals from qualified subcontractors and suppliers including those certified with the Office of Community Investment and Infrastructure (OCII)/Successor to SFRA for Design Build MEPF and Solar Hot Water. OCII has established a subcontracting participation goal for this project at 50% SBE/LBE goal with first consideration for San Francisco-based MBEs, WBEs and SBEs. New construction of a multi-family residential building located in the Candlestick Point Area. The project will consist of four levels of type V-A wood-frame construction over one level of concrete podium with parking. There will be a total of 122 units with an open space courtyard on the 2nd floor.

To be added to Nibbi's new bidding software (Building Connected) in order to access/download documents and provide a bid to Nibbi electronically online, please email Kristin Medwick in the Precon & Estimating Department, kristinn@nibbi.com.

Bid proposals shall be submitted no later than 2:00 PM on Wednesday, May 20, 2015 online via Building Connected.com, or faxed to (415) 241-2951.

For specific questions regarding this project, please email Tom Giarrusso, Project Executive, tomg@nibbi.com.

### C.C. MYERS, INC. IS REQUESTING BIDS FROM QUALIFIED DBE SUBCONTRACTORS AND SUPPLIERS FOR THE FOLLOWING PROJECT:

**Road 224 Bridge Over Deer Creek Project**
