

Construction Sector Adds 84,000 Workers In October, But Growing Number Of Project Cancellations Risks Undermining Future Industry Job Gains

[Article was originally posted on www.agc.org]

Both Residential and Nonresidential Contractors Added Jobs in October, but Total Construction Employment Remains 3.9 Percent Below February Peak as Pandemic Continues to Depress Demand

Construction employment increased by 84,000 jobs in October, with jobs added in both nonresidential and residential categories, according to an analysis by the Associated General Contractors of America of government data released today. Association officials cautioned, however, that the pandemic is causing a growing number of construction projects to be canceled or delayed, according to a survey the association released in late October.

“The employment data for October is good news, but our latest survey found that only a minority of contractors expect to add to their workforce in the next 12 months,” said Ken Simonson, the association’s chief economist. “As project cancellations mount, so too will job losses on the nonresidential side unless the federal government provides funding for infrastructure and relief for contractors.”

Construction employment climbed to 7,345,000 in October, an increase of 1.2 percent compared

to September. However, employment in the sector is down by 294,000 or 3.9 percent since the most recent peak in February, just before the pandemic triggered widespread project cancellations. Despite the employment pickup in October, nonresidential construction employment—comprising nonresidential building, specialty trades, and heavy and civil engineering construction—remains 262,000 jobs or 5.6 percent below its recent peak in February, Simonson noted.

The construction economist added that residential construction, covering residential building and specialty trade contractors, has had a stronger recovery, with employment down by just 32,000 jobs or 1.1 percent since February. The industry’s unemployment rate in October was 6.8 percent, with 674,000 former construction workers idled. These figures were the lowest since the pandemic struck but considerably higher than the October 2019 figures of 4.0 percent and 398,000 workers, respectively, the economist added.

In the association’s October survey, which covered more than 1,000 contractors that perform all types of nonresidential and multifamily construction, three out of four respondents reported that a scheduled project had been postponed or canceled. Only 37 percent of respondents ex-

pect their headcount to increase over the next 12 months. That was a sharp drop from the 75 percent who predicted an increase in the association’s annual Hiring and Business Outlook Survey released last December.

Association officials said they were encouraged by reports that Congress plans to consider new coronavirus relief measures before the end of the year. They noted that new measures, including investments in infrastructure, new Paycheck Protection Program flexibility and tax relief, and liability reforms will help offset the impacts of the growing number of project cancellations and delays.

“Congressional leaders understand that employers cannot afford to wait until next year for relief from the broad economic impacts of the coronavirus pandemic,” said Stephen E. Sandherr, the association’s chief executive officer. “We stand ready to work with Congress to make sure any new relief measures include new infrastructure investments, tax relief and liability reform so honest firms don’t fall victim to predatory lawyers seeking to profit from the coronavirus.”

Industry Gaining Hope for Infrastructure Legislation Under Biden

Peter DeFazio, Chair of the House Committee on Transportation and Infrastructure, says he is looking forward to discussions that could lead to substantial infrastructure investments during the Biden administration

[Article was originally posted on www.forconstructionpros.com]

By Jessica Lombardo,

While many in the construction are worried about what a Biden presidency might mean for our industry long term, there is reason to be hopeful that the career politician may be able to get more done in Washington during his presidency than President Trump was able to do. Hope for a substantial investment in our nation's infrastructure is one of those things that are showing promise.

After four years of empty promises from President Trump, House Committee on Transportation and Infrastructure Chair Peter DeFazio (D-OR), says he looks forward to a real 'Infrastructure Week' under a Biden administration

"Despite all his talking and tweeting about investing in our Nation's crumbling infrastructure, President Donald Trump's most significant contribution to the conversation on infrastructure was turning "Infrastructure Week" into a running joke," DeFazio said in a statement. "As a result, the American people got four years of worsening congestion, increased carbon pollution and further decline in the state of our roads, bridges, public transit and more."

Earlier this year, DeFazio wrote a transformational bill that he says would move our infrastructure out of the 1950s and into the modern era. The bill passed the House with bipartisan support this summer, but then, like so many other critical House-passed bills, the Moving Forward Act did not progress in the Senate.

"That all changes under a Biden administration," DeFazio says. "The President-elect has made it clear he is ready to work with Congress to deliver results for all Americans with bold investments in infrastructure that help everyone, from large metro areas dealing with unreliable transit and soon to be jam-packed highways, to rural communities that suffer from bridges in poor condition and deteriorating roads. President-elect Biden plans to 'Build Back Better,' and that's exactly what our Nation needs to move our infrastructure into the 21st century while creating millions of family wage jobs, supporting U.S. manufacturing, and harnessing American engineering and ingenuity. I can't wait to get started."

The Biden campaign has said, "We've seen the need for a more resilient economy for the long-term, and that means investing in a modern, sus-

tainable infrastructure and sustainable engines of growth — from roads and bridges, to energy grids and schools, to universal broadband."

However, the construction industry is still worried what this will all mean for them, especially if Biden includes "green" polices in his funding package.

Regulatory Changes Still Worry the Construction Industry

Also of concern for the industry is the potential change to regulatory reform. Under President Trump, reduced regulatory burdens sought to streamline many environmental review processes which would speed up construction projects.

According to the Trump Administration, their approach to Federal regulation reform will have raised real incomes by an estimated \$3,100 per household per year. Of this total, 20 notable Trump Administration deregulatory actions alone were projected to save American consumers and businesses about \$220 billion per year.

Biden has said that he would immediately put regulations back in place during his time in office which has many in the industry concerned. When the President-elect announced his Build Back Better plan, he promised to reverse those roll backs in order to protect citizens and our environment, prompting concern in the construction industry.

"The regulatory environment will change meaningfully under a Biden presidency," Arniban Basu, chairman and CEO at the Sage Policy Group says. "Among the most impacted industries will be oil, natural gas and coal. Firms in these segments are likely to face a more expensive regulatory framework, ultimately translated into less output than there would have been under a second Trump term. That will impact related construction."

REQUEST FOR DBE
SUBCONTRACTORS AND SUPPLIERS FOR:
Contra Costa County Public Works Dept.
255 Glacier Drive, Martinez, CA
**Hayward Maintenance Complex (Phase 2)
Civil Grading
San Francisco Bay Area Rapid Transit District
Contract No. 01RQ-102
BID DATE: December 1, 2020 @ 2:00 PM**

We are soliciting quotes for (including but not limited to):

Building Facilities Demolition, Trucking, Temporary and Permanent Erosion Control Measures, QC/QA Testing, RWP Training, Watchperson, Clearing & Grubbing, Sewer Pipe, Sanitary Sewer Manholes, Underground, Storm Drain Manhole, Drainage Inlet, Structural Retaining Wall, Structure Excavation, Structure Backfill, Sheet Pile Wall, Fencing, Gates, Chain Link Barrier, Overcrossing Abutment Rebar, Overcrossing Abutment Concrete, Overcrossing Column and Drilled Concrete Shaft Rebar, Overcrossing Column Concrete, Drilled Concrete Shaft Permanent Casing, Drilled Concrete Shaft, Minor Concrete, Hazardous Materials/Waste Disposal, Minor Concrete-Type B4 Curb, Structure Concrete, Structural Steel, Painting, Anti-Graffiti Coatings, Shoring, Jacking & Boring, Asphalt Emulsion Sealer, Pavement Markings, and Construction Materials

Jean Sicard (510-809-3411 jsicard@ocjones.com) is the estimator on this project and he is available to provide assistance or answer questions regarding the project scope of work including bid requirements, break out of bid items, plan or spec interpretation, bonding or insurance requirements, and other bid assistance. There is a Major Projects Project Stabilization Agreement in place for this project. This contract is subject to "Buy America" requirements. Plans and specs are available to review at our Berkeley office, or can be sent out via Building Connected. PDF format quotes should be emailed to the estimator or faxed to 510-526-0990 prior to 12:00 PM on the date of the bid. Quotes from DBE Subcontractors, Suppliers and Truckers are highly encouraged. OCJ is willing to breakout any portion of work to encourage DBE participation. Subcontractors must possess a current DIR, Contractors License, and insurance and workers compensation coverage including waiver of subrogation. OCJ may require Performance and Payment bonds on subcontracts. OCJ will pay the bond premium up to 2% of the contract value. Please contact OCJ for any assistance required by your firm in obtaining bonding or insurance. The US Small Business Administration may also assist you in obtaining bonding - please see the following site for information: <http://www.sba.gov/content/contractors>. Visit the California Access to Capital Program Financing Solutions website for additional resources for your small business - http://www.calbiz-finance.org/cal_cert_biz_program.html. OCJ is available to help obtain necessary equipment, material and/or supplies. All subcontractors are required to execute OC Jones' standard subcontract agreement, comply with all insurance requirements, and name OCJ as additional insured. Copies of our agreement and insurance requirements are available upon request. OCJ is a Union contractor, and we are signatory to the Operating Engineers, Laborers, Teamsters, and Carpenters. OCJ is an Equal Opportunity Employer.
