

## Why Not Prequalifying Subcontractors is Still Risky Business

[ Article was originally posted on  
[www.constructconnect.com](http://www.constructconnect.com) ]

By Kendall Jones,

Not that long ago, general contractors who weren't using a subcontractor prequalification process were taking a huge risk. We were in the midst of the Great Recession and good contracting opportunities were becoming harder and harder to find.

This led to more firms, both general contractors and subcontractors, bidding on projects they weren't equipped to handle. General contractors were focused more on getting the lowest bid from subcontractors rather than making sure they were capable of adequately performing the work.

With the COVID-19 pandemic still in full swing, we find ourselves in a similar situation. Many projects have been delayed, cancelled, or decreased in scope. With the uncertainty surrounding the economic recovery, we again are seeing more contractors bidding on fewer opportunities.

### Avoiding Risky Subcontractors

This doesn't mean that general contractors should get lax in their subcontractor prequalifications. If anything, general contractors should be paying closer attention to whether their potential subcontractors are capable of successfully completing the jobs they are bidding on.

As a general contractor, you have to be selective when it comes to the subcontractors you work with. You want to choose companies that have a dependable skilled workforce, strong management, financial stability, and can perform quality work to your company's standards.

Dealing with a defaulting subcontractor can be a real nightmare. A subcontractor that isn't meeting its contractual obligations can wreak havoc on a project. This can lead to delays in the schedule that impact other subcontractors and can result in costly rework.

Having to replace a terminated subcontractor or supplement their work can kill a project. If a subcontractor is experiencing difficulties it is imperative that you work with them to resolve any issues before they escalate and get out of hand.

As with any business decision, picking subcontractors to work with requires you to do your due diligence. You should be prequalifying every subcontractor you are considering working with to

reduce risks that could impact your business such as subcontractor default or substandard work.

### Building Strong Relationships

Maybe you have a stable of subcontractors you routinely do business with, but what happens when you decide to take on a project in another state or all of your regular subcontractors are unavailable? At some point, you are going to work with a subcontractor that you have little to no experience working with.

The construction industry is heavily relationship-based. Take the time to reach out and review each subcontractor's prequalification submittals, approved or not, to discuss your decision. Prequalifying subcontractors before you allow them to bid on your projects can lead to mutually beneficial partnerships for years to come.

Make sure you add subcontractors who are prequalified to your distribution list for future Invitations to Bid. For subcontractors who didn't meet your prequalifications standards, take the time to explain why and what they can do to get qualified.

Here is some of the key information you need to obtain in your prequalification form:

**General** – You want to get some basic information such as company ownership, current management, the number of employees and the states in which they have contractor licenses.

Ask about the size and scope of the projects they typically work on and whether they are certified as a Minority Business Enterprise. Have them provide a list of projects they've completed over the past year or two and include project location and subcontract amount for each.

Find out what other projects they currently have going on. Don't be afraid to ask for resumes of relevant employees along with a list of the suppliers and subcontractors they will be employing.

**Safety** – At the very least you need to get their OSHA 300 information and whether they've had any citations issued and their Experience Modification Rate for the previous three years. You can also inquire about their training program and whether or not they hold regular safety meetings.

**Surety** – Find out who their current surety provider is along with their agent's name and contact information. Be sure to ask about their bond rates for specific volumes along with their single project bonding capacity and their aggregate bonding capacity.

# How SBA Helps Native American Small Business Owners Succeed

American Indians, Alaska Natives, and Native Hawaiians have a strong history of entrepreneurship and small business ownership. There are about 300,000 Native American-owned small businesses in the U.S. today, generating around \$50 billion of revenue a year. Native American business owners have made their mark in a variety of industries, including tourism, gaming, energy, agriculture, forestry, manufacturing, and federal contracting. These businesses sustain local communities, create jobs, and help grow the economy.

If you are interested in starting a business or boosting your existing business, the U.S. Small Business Administration (SBA) can help through a variety of financial support, contracting opportunities, and educational tools for Native American business owners.

## Financial Resources and Contracting Help

We offer a variety of financial resources like SBA-guaranteed loans that help small businesses grow in times of prosperity or recover after a disaster. If your small business was impacted by the pandemic, you may consider applying for an Economic Injury Disaster Loan (EIDL). These loans can be used to pay fixed debts, payroll, accounts payable, and other

expenses that can't be paid because of the disaster. Learn more about EIDL and other pandemic-related resources for small businesses here.

Beyond direct financial help, the SBA also provides growth opportunities for small businesses via contracting assistance programs. The HUBZone program for businesses in historically underutilized business zones allows qualified small businesses to compete for set-aside federal government contracts. Find out whether you may be eligible for one of SBA's contracting assistance programs on our website.

## Educational Opportunities

SBA also provides educational tools that benefit Native American business owners across the country. The SBA's Office of Native American Affairs (ONAA) is dedicated specifically to the prosperity of Native American entrepreneurs, offering training and technical assistance, including Native American Entrepreneurial Empowerment Workshops.

The Empowerment Workshops are free business training programs focused on entrepreneurship and small business management. Now through December, participants can choose between a full two-day workshop or shorter class days spread out over four

weeks. Both options are offered in a virtual webinar format, and participants are eligible to earn continuing education credits through Salish Kootenai College.

Native American businesses can also get one-on-one mentorships through SBA resource partners, which provide customized, expert small business advice both in-person and online.

You can also find resources for Native American entrepreneurs at:

- National Congress of American Indians: [www.ncai.org](http://www.ncai.org)
- Native American Finance Officers Association: [www.nafoa.org](http://www.nafoa.org)
- National Center for American Indian Enterprise Development: [www.ncaied.org](http://www.ncaied.org)
- Native American Contractors Association: [www.nativecontractors.org](http://www.nativecontractors.org)
- National 8(a) Association: <http://www.national8aassociation.org/>

Follow us on Twitter @SBAgov for more general business tips and @nativeSBA for updates on our Empowerment Workshops.

## Why Not Prequalifying Subcontractors is Still Risky Business

### Continued from page 1

If you are using subcontractor default insurance, the burden lies with the general contractor to thoroughly prequalify their subs.

**Financial** – Determine if the subcontractor has ever filed for bankruptcy and ask for their Dun & Bradstreet number if they have one. You can also ask them to provide other financial information such as current year revenues, working capital, total and current assets, net equity, current liabilities, and average monthly billings. Your safest bet is to have potential subcontractors provide financial statements prepared by a CPA who has construction industry experience.

**Litigation** – The first thing to determine is whether the company, or any of the owners, have any active litigation. Find out if the company has had any labor law violations, had their license suspended or revoked and if they've had any judgments filed against the company. You should also ask about any contract defaults and whether they've ever been terminated from a contract.

**References** – Ask them to provide three to four reference contacts that can attest to both the quality and dependability of their company and employees but can also verify the company's creditworthiness.

Ask for an in-person visit with your potential subcontractor either at their office or one of their project sites to get an idea of how they manage their business and perform their work.

Prequalifying should not be a "one and done" kind of deal. Requalifying subcontractors every six months to a year can help you identify any possible red flags that may have developed since the last time you worked with them.

General contractors should make their subcontractor prequalification process easily accessible. Create an online prequalification form that can be easily found on your company's website. Have a link to the form prominently featured on the page where you have your subcontractor opportunities or currently bidding projects listed.

## Tips for Subcontractors

If you are a subcontractor looking for more opportunities you should contact general contractors in your area and ask to get prequalified with their company. You don't have to wait until they have a job that meets your company's capabilities. Be proactive and get prequalified first, this way you'll get contacted by the general contractor first when they have an upcoming project requiring services your company provides.

Also, prequalifying can go both ways. Subcontractors should do a little research on general contractors they are hoping to work with on future

projects. Talk with other subcontractors who have worked with the GC in the past. Find out what it's like to work with them, if they've ever had any issues with the GC in the past and how promptly they pay their subcontractors and suppliers.

## Final Thoughts on Subcontractor Prequalification

Your subcontractor prequalification process should not be a cut and dry, yes or no decision. Yes, you need to set some minimum standards and create a process for assessing and approving subcontractors to bid on your projects, but you will occasionally need to make exceptions to your rules.

If you allow a subcontractor or supplier to bid on, or award, a project to a company that hasn't met your minimum standards, it's not the end of the world. To mitigate potential risks, you will just need to manage the subcontractor a little closer and keep a more watchful eye on them during the project.

Be open with subcontractors when you do this and let them know what risk management controls you are putting in place. Encourage them to come to you the moment they begin to experience any type of issue or delay so that you can work together to get things corrected before they get out of hand.

### ANVIL BUILDERS

1475 Donner Ave. San Francisco, CA 94124  
Phone: 415-285-5000 • Fax: 415-285-5005

Request for DBE's & LBE's  
Subcontractors and Suppliers for

**Project: Wawona Area Stormwater Improvement and Vicente Street Water Main Replacement**  
Contract No: WW-711

**Bid Date: Thursday, December 10, 2020 @ 2:00 PM**

The objective of the project is to minimize flooding and manage stormwater at the Wawona St. neighborhood close to 15th Ave., by installing a wet weather/auxiliary sewer from on Vicente St., from the intersection of Vicente Street and Wawona Street to 34th Avenue. In addition, the construction project installs a new water transmission main and replaces aging water distribution mains on Vicente Ave. The work also includes various street base restoration and paving. The work is to be performed in San Francisco, California. The Engineer's estimate is between \$30,000,000 to \$40,000,000.

Seeking all trades (but not limited to): Traffic Control, Asphalt Paving, Striping, Concrete, Trucking, Shoring Underground, Telescoping of Sewer/Storm, Grout, Settlement Monitoring, Trenchless Pipe Installation, Corrosion Protection, Painting and Coating, and Street Sweeping.

Plans, specifications, and requirements can be viewed at our office or by using the link below.

<https://www.sfwater.org/bids/DocList.aspx?bidid=4266>

For assistance with bonding, lines of credit, insurance, or anything else regarding bidding on this project, contact Anvil Builders via phone or email.

Will you be bidding this project? Please email or fax your response to [estimating@anvilbuilders.com](mailto:estimating@anvilbuilders.com) / 415-285-5005.
