

Construction Worker Training is a Must for Healthcare Facilities

[Article was originally posted on
www.constructconnect.com]

By *Bill Bryant,*

Healthcare facilities are some of the most complex and heavily regulated of any building type. The broad span of spaces inside these buildings encompasses everything from patient rooms to emergency facilities, laboratories to cafeterias to offices, and more.

Perpetual advances to technology paired with a growing list of codes and compliance regulations generate a constant need for existing facility renovations and new facility construction.

With the vast majority of hospitals funding renovations and expansions (74%), most facilities continue to operate through the duration of the construction process. Patients, staff, and visitors are often in close proximity to active construction where, “the risk for contamination with health care construction is present and, therefore, it is essential that construction personnel be well-trained to identify and mitigate the risk,” say researchers from the recent study, “Renovation in hospitals: Training construction crews to work in health care facilities,” published by the American Journal of Infection Control, which surveyed a total of 129 respondents working in various roles at the top 15 U.S. healthcare contractor firms.

The question is, how do we educate healthcare construction workers on how to work around everyday activities, mitigate any unexpected construction emergencies, while safely and effectively getting their work done?

While the CDC requires healthcare facilities to perform an Infection Control Risk Assessment

(ICRA) before any renovation, construction, or repair project, they are not required to execute the recommendations that result from the assessment. Furthermore, the construction workers themselves are not required to participate in or implement said training.

ASHE also offers a Health Care Physical Environment Worker certification, recommending that each general contractor/project lead hold a Certified Healthcare Construction (CHC) certification and that at least one CHC should be part of every healthcare construction project. However, just like ICRA this certification is recommended, not required.

While most construction companies do choose to participate in specialized ICRA or ASHE training courses, these courses are often geared towards project managers and the knowledge gleaned fails to land on those that need it most: the workers and subcontractors on site. As a result, they often do not have an understanding of the importance of infection control during a project.

One proposed solution is through legislation, making ICRA certification mandatory for all construction personnel who work on healthcare construction sites. In New Jersey, Joseph Demark, Jr., the President and Business Manager of the Green Advantage Pre-construction Risk Assessment/Infection Control Risk Assessment (PCRA/ICRA) Certificate Program is doing just that, working to see that ICRA certification is required legislatively for all healthcare facility construction workers in NJ.

However, many construction companies are opposed to this solution. As aforementioned, healthcare facilities are required to perform an ICRA assessment, but not required to implement the recommendations. And many in fact, do not.

The reason is twofold. First, there is no standardized method of how to implement the results of an ICRA plan and no consequences if it isn't implemented. “Hypothetically, let's say you did receive an ICRA plan document from the Owner with the RFP or even during Pre-Con. Aside from confirming the project title, relative work area and some broad dust control requirements; what did that document do for you?” asks Claire Foster of AMI Environmental. “One of the biggest issues with the broad concept measures ‘identified’ in an ICRA plan, is the absence of a clearly identified path to compliance for the workers in the field. This oftentimes leads to a lot of subjective evaluation that ultimately drives the tradesmen to throw up their hands and view ICRA concepts as an impediment to scope execution.”

What Claire is expressing is not a one-off situation. It is a common theme construction companies encounter when bidding a healthcare construction project. If a construction company approaches a facility, asks them what their ICRA plan requires of their workers during construction and the facility personnel don't know, it makes it very difficult for the construction company to know what to include in a bid. Once hired, the construction company can only implement the procedures that have been budgeted for, and without guidance from the facilities ICRA team, are left to use their best guess in terms of everything else.

It appears that the issue is not the lack of education on the side of the construction companies, but the lack of clarity on whose responsibility it is to spearhead the implementation of the ICRA recommendations.

Starc Systems, a temporary containment solutions company states, “Infection control should be a primary concern for contractors, project managers, architects, and facility and construction management teams in the developmental and planning stages of an ICRA construction project. An ICRA strategy should be agreed upon by all parties. The ICRA team works together to study risk factors, potential hazards to patients, people, and medical equipment, and ways to minimize the risk of HAIs related to the ICRA construction.

Even if the importance of ICRA is understood by both healthcare facilities and construction com-

Request for Proposals for Scope III • Bid Solicitation 7 SFPUIC - Southeast Plant • New Headworks Construction ADVERTISEMENT FOR SUBCONTRACTOR PROPOSALS

Subject to conditions prescribed by the City and County of San Francisco, CA responses to this bid request are sought from subcontractors for Structural Steel, Dampproofing and Sealants, Doors, Overhead Doors, Glass and Glazing, Overhead Crane Procurement, Aluminum Grit Tank Covers.

PROJECT DESCRIPTION: The intent of this project is to replace the existing Headworks Facility at the SE Water Pollution Control Plant with a new all-weather 250 MGD Headworks Facility. This is solicitation 7 for Scope III New Headworks Construction.

SCOPE / DRAWINGS:

The drawings for Scope III are included in the Plan Room on Smartbidnet.com. The scopes being sought for this project are as follows:

- 3-19 Structural Steel - Furnish and Install - 20% LBE Requirement
- 3-25 Dampproofing and Sealants - 20% LBE Requirement
- 3-27 Doors - 20% LBE Requirement
- 3-28 Overhead Doors - 20% LBE Requirement
- 3-29 Glass and Glazing - 20% LBE Requirement
- 3-40 Overhead Crane Procurement - 0% LBE Requirement
- 3-66 Aluminum Grit Tank Covers - 0% LBE Requirement

PRE-QUALIFICATION OF PROSPECTIVE SUBCONTRACTORS: The Owner has determined that subcontractors who submit bids to Sundt/Walsh on this Project must be pre-qualified. Those subcontractors who pre-qualify will be allowed to bid on the above Scope of Work.

Interested firms may obtain Pre-qualification Documents on the Smartbidnet.com website or by contacting David Cooley, via e-mail at dcooley@sundt.com. All prequal documentation must be submitted by November 12, 2020.

LOCAL BUSINESS ENTERPRISE (LBE) REQUIREMENTS: The following project-wide LBE participation requirement is: LBE-15%. Each Bid Package has a specific LBE requirement as indicated above. Any proposals that fail to meet the Bid Package LBE requirement will be deemed non-responsive.

DISADVANTAGED BUSINESS ENTERPRISE (DBE) REQUIREMENTS: All subcontractors are hereby notified that it is expected that work to be performed under this contract will be in full or in part financed by the Clean Water State Revolving Fund (SRF), administered by the United States Environmental Protection Agency (US EPA) and the State Water Resources Control Board (SWRCB). Bidders shall comply with all applicable terms and conditions, special provisions, and reporting requirements, as set forth in these specifications, and as may be required by federal law, rule, or regulation. Additionally, meeting the project-wide Fair Share Objective is encouraged: MBE-6.4%, WBE-2.0%. Refer to Contract Section 00 48 10.01, Paragraph 2 for more information.

PRE-BID MEETING DATE:

There will be an on-line Pre-Bid meeting on November 5, 2020 at 2:00 pm. The meeting will be held via Microsoft Teams video conferencing. Please email David Cooley, dcooley@sundt.com, if you would like to attend.

BID DUE DATE: All bid documents must be submitted no later than December 10, 2020 by 2:00 p.m., California Time.

Confidentiality of the information provided will be respected to the extent permitted by law.

QUESTIONS: Direct all project specific questions to David Cooley at Sundt/Walsh. All questions should be submitted via e-mail. The e-mail address is Dcooley@sundt.com.

SWINERTON

**INVITATION TO PREQUALIFY AND BID FOR
AIRPORT POWER GENERATION & DISTRIBUTION UPGRADES
JOHN WAYNE AIRPORT
PROJECT NO: P404**

APPLICABLE TRADES

Site Concrete, CMU, Structural Steel, Misc. Metals; Roofing (patching) Painting; Plumbing; HVAC; Electrical (including Solar and 12kV distribution); Fire Alarm; Data/Comm; Trailers; Chain-link Fence & Gate; Fireproofing.

APPLICANTS

Prequalified Trade Contractors will be eligible to bid the project. If interested in prequalifying and bidding, please contact vmiguel@swinerton.com or 213.896.3439 for the prequalification forms. Do NOT contact the County of Orange, John Wayne Airport, Architect or any of the project Consultants. All queries direct to Swinerton.

REQUIRED SUBMITTALS

1. Submit all documents required for Swinerton Prequalification.
 - a. Visit: <http://www.swinerton.com/subcontractors/subcontractor-prequal>
2. RFP forms provided with bid documents
3. Complete Review of and Sign Swinerton Master Service Agreement.

DUE DATE FOR PREQUALIFICATIONS APPLICATIONS

For all subcontractors not prequalified with Swinerton, all documents required for Swinerton Prequalification are due by Friday, October 30, 2020 5:00PM PST

PROJECT INFORMATION AND DESCRIPTION:

The objectives of the Airport Power Generation and Distribution Upgrades project include improved airport Central Utility Plant (CUP) power reliability and resiliency and a reduction in the usage of SCE electrical power. To achieve these objectives, the project provides for the installation of solar photovoltaic (PV) system on the upper level of Parking Structure C, the installation of a battery energy storage system (BESS, 12kV power distribution upgrades, and the installation of a microgrid control system and upgrades.

Estimator: Tin Tran - ttran@ntkconstruction.com

We, NTK Construction, Inc. (NTK), will be bidding this project as a prime contractor and we are interested in receiving proposals/quotes from qualified and certified LBE, DBE, MBE, WBE, DVBE subcontractors and suppliers for the following items of work: (but not limited to)

Concrete, Metals, Roofing, Painting, Plumbing, Mechanical, HVAC and Electrical

The objective of this project is to provide redundant effluent pumping capacity of the North Shore Pump Station (NSS) during wet weather. This project will replace existing four (4) dry weather pumps with larger capacity units so that they are capable of pumping redundant capacity during wet weather. The project also includes upgrades to the motor control centers (MCC's) and distributed control system (DCS).

The estimated cost of construction contract is 33,000,000.

Project goals: 11% LBE (local only)

The project plans and specifications may be viewed at our office (501 Cesar Chavez St., Suite 115, San Francisco, CA 94124) or may be obtained from the SFPUC. Please visit their website at <http://sfwater.org/contracts>. A confidentiality agreement is required.

Please respond to this email and let us know whether or not you are interested in submitting a quote for this project. Please include your company name, contact name, the scope you will be bidding on and the best way to contact you.

RELENTLESS GROWTH VIA IMPORT

Filipino food has never looked better to the Tan family. Stella and Kim Tan founded G.L. Food Wholesales in Los Angeles and began importing pre-packaged foods in 1991. Since then they've enjoyed phenomenal growth in becoming one of the dominant importers of Filipino dry, canned and frozen foods in the country. In 1997, when son Randy began managing the business, sales were \$300,000 a month. They now top \$2.8 million a month. With growth at this pace, expansion was inevitable. Using SBA-504 financing, the company recently purchased land and is now building a state-of-the-art, 100,000 square-foot facility (including an 18,000 square-foot freezer), which will nearly double their current space.

"CDC was the key to us getting what we consider a 'killer' deal. Loan officer Dean Aloe and other CDC staff were honest, straight-forward and always quick to respond."

At our discretion, 100% Payment and 100% Performance bonds may be required as a subcontract condition. This will be a PREVAILING WAGE JOB. DGC is an Equal Opportunity/Affirmative Action Employer.

Construction Worker Training is a Must for Healthcare Facilities

Continued from page 1

panies alike, and the issue of responsibility is solved there is still the question of financial responsibility.

Smaller healthcare facilities such as post-acute care, rehabilitation, clinics, and skilled nursing facilities fall victim to lax implementation of ICRA protocols the most, as they tend to have the smallest construction budgets. Since following ICRA recommended construction procedures come as an added cost, (the ICRA Instructor Guide states, "The Infection Control Risk Assessment may require you to spend more time putting up barriers to isolate your work area than it takes to actually perform the work,") many facilities choose to have very lax protocols or opt-out of the recommendations entirely.

If the healthcare facility operators don't budget for proper ICRA protocols such as the installation of anterooms and HEPA-filtered air filtration units, or aren't willing to pay for the increased labor costs associated with the recommended safety precautions such as increased construction area cleaning and specific protocols for debris removal, then we as general contractors will be unable to execute the requirements for construction procedures. As a result, those of us who require our employees to uphold the protocols will lose the bids. The other GC's who decide to disregard ICRA recommendations to come in at a lower price will be the ones getting the work and the patients will suffer the consequences," says Erik Good, Senior Project Manager at Global Construction.

If making the courses themselves mandatory is not the answer, perhaps passing legislation that makes the implementation of the ICRA recommendations required could solve the problem?

"The importance of compliance is protecting lives," notes Jonathan Flannery, FASHE, Senior Associate Director of Advocacy for ASHE. "Keeping patient and staff safety foremost in mind, we don't want to do things just to save money. But we want to do things in a way that uses resources wisely."

With the problems that can be addressed by ICRA training and credentialing only getting worse, an even greater emphasis needs to be placed on the importance of ICRA training, credentialing, and plan implementation. As we emerge into a post-COVID-19 world, industry leaders in both healthcare and construction must make their voices heard in an effort to find a solution that is feasible and beneficial to the facility operators, the construction companies, and most importantly, the patients.
