Protect your data now — before the holiday rush begins

The holiday season is an exciting time for business owners, who expect to make their largest sales toward the end of the year.

But data thieves look forward to the holidays, too. They count on business owners and their employees to be too overwhelmed with sales to guard against unexpected attacks. Here's why:

- Increased holiday volume and larger amounts are more attractive to thieves
 - Less experienced temporary staff are easier prey
 - Small businesses are often more vulnerable than large corporations, because they're less likely to consistently follow Payment Card Industry (PCI) compliance guidelines
 - Business owners are more concerned with making holiday sales goals than checking for skimming devices or monitoring logs for unauthorized access
- **Next, get certified. Complete your PCI Compliance certification now** by validating your PCI compliance. You may want to use a PCI certification company like Trustwave. This will help you keep your customer information secure.
 - **Regularly change** your administrative passwords on all Point of Sale (POS) systems.
 - **Install a firewall and access control list** for remote access and administrative functions.
 - **Install the latest version of your virus protection software** on all your equipment.
 - **Inspect your POS terminals regularly** to be sure no new wires or skimming devices have been attached to your equipment. Take photos of your terminals as a record for comparison.
 - **Review your computer log each day** to check for unauthorized activity. A third of criminal attacks involve malicious employees.
 - **Educate your employees** about data protection procedures, and make it a daily part of their jobs. Share the article on holiday fraud on page 4 of this issue.
 - **Ask your vendor** if your POS is a Payment Application Data Security Standard (PA-DSS) compliant application.
 - **If a third-party vendor maintains your POS system**, ask them to document the data loss prevention procedures that have been put into place.
 - **Never use any part of your POS system** to browse the internet.
 - **Important: your wireless devices need extra security.** Be sure your laptops, tablets, and phones are encrypted and use passwords, to reduce risk if lost or stolen. For an overview of special requirements for wireless equipment, review the Payment Card Industry Data Security Standard (PCI DSS) Wireless Guidelines now, before the holiday season begins.

According to the 2011 Symantec U.S. Cost of a Data Breach Report, negligence caused 39 % of data breaches, and malicious attacks caused 37 % of data breaches — an increase of 6 % from the previous year. Malicious or criminal attacks are the most costly: averaging \$222 per compromised record. Multiply that by the number of customers you have to understand your potential risk.

The 2012 Verizon Data Breach Investigations Report found that most victims of data theft were targeted because of ease of opportunity. Thieves were able to exploit an obvious weakness, and they could succeed with very little effort.

Most attacks were directed against small businesses — and most data breaches could have been prevented with a few fairly easy and inexpensive procedures.

Don't make it easy for thieves. Take action now to help protect your business and your customer data by following these simple steps before the holidays begin.

Important steps you can take before the holiday rush:

- **By following PCI Best Practices** — and using basic common sense — you can help keep your sensitive information secure and prevent data breaches. Review your compliance guidelines, have a meeting with your staff, and put your procedures into place before the holidays.

Get started early. You'll feel good about taking care of these important issues now, before the holiday season begins. Knowing that you're doing your best to keep your business data and your customers' information safe will help you to focus on serving your customers during this important time of year.

UNIVERSITY OF CALIFORNIA DAVIS HEALTH SYSTEM

ADVERTISEMENT FOR BIDS

Subject to conditions prescribed by the University of California, Davis Health System, sealed bids for a lump-sum contract are invited for the following work:

PROJECT NO. 9577060-REBID • MIND PSYCH Sound Proof Room 1228

Description of Work: Project consists of renovating exam room 1228 to accept a manufactured sound booth (installed by others) with internal booth finishes, remodel the adjacent observation room (1226) for utilities being relocated out of room 1228 and to provide an access closet for above booth utilities in room 1228. Work includes installing ceiling access doors in room 1265 (Staff Toilet) and room 1263 (Staff Toilet) and remodel of staff toilet room 1265 to have a shower and salon sink complete. Contractor shall provide complete dust and access controls for rooms 1226, 1228, 1263, and 1265 for the duration of the project and take particular care to color tone closures to mirror surrounding finishes to minimize patient disruption during business hours while maintaining secure access to construction crew during off hour work schedule.

Procedures: Bidding Documents will be available at 9:00 AM on November 16, 2012, and will be issued only at:

Facilities Design and Construction
4800 2nd Avenue, Suite 3010, Sacramento, CA 95817
