

## Top 10 OSHA Standards Violations Cited for Construction in 2020

Image credit - [www.constructconnect.com](http://www.constructconnect.com)

[ Article was originally posted on [www.constructconnect.com](http://www.constructconnect.com) ]

By Kendall Jones,

We've compiled the list of Top 10 Most Frequently Cited Standards for Construction for fiscal year 2020 (October 2019 through September 2020).

Each year, the Occupational Safety and Health Administration (OSHA) releases the Top 10 Most Frequently Cited Standards from the previous fiscal year. By releasing the list, OSHA hopes to bring greater awareness to the standards most commonly cited for violations to help employers focus their efforts to make workplaces safer for employees.

The list OSHA provides covers all industries, so it doesn't provide much insight into which standards are most cited for a specific industry, like construction. OSHA also has separate sets of standards with different rules to control safety concerns for the construction, agriculture, and maritime industries, in addition to their General Industry standards.

Lucky for us, OSHA has a website where you can search the Frequently Cited OSHA Standards by North American Industry Classification System (NAICS) Codes as well as establishment size and by federal or state jurisdiction.

Below is the Top 10 Frequently Cited OSHA Standards for Construction using NAICS Code 23 for the 2020 fiscal year. Included are the title, standard number, the Top 10 ranking from the previous year, and the number of citations issued.

### Top 10 Frequently Cited OSHA Standards for Construction

- 1. Subpart Title: Fall Protection**  
Standard Number: 1926.501  
Title: Duty to have fall protection.  
FY2019 Top 10 Rank: 1  
Number of Citations: 3,917
- 2. Subpart Title: Scaffolds**  
Standard Number: 1926.451  
Title: General requirements.  
FY2019 Top 10 Rank: 2  
Number of Citations: 1,615

- 3. Subpart Title: Ladders**  
Standard Number: 1926.1053  
Title: Ladders.  
FY2019 Top 10 Rank: 3  
Number of Citations: 1,500

- 4. Subpart Title: Fall Protection**  
Standard Number: 1926.503  
Title: Training requirements.  
FY2019 Top 10 Rank: 4  
Number of Citations: 1,161

- 5. Subpart Title: Personal Protective and Life Saving Equipment**  
Standard Number: 1926.102  
Title: Eye and face protection.  
FY2019 Top 10 Rank: 5  
Number of Citations: 1,039

- 6. Subpart Title: General Safety and Health Provisions**  
Standard Number: 1926.20  
Title: General safety and health provisions.  
FY2019 Top 10 Rank: 6  
Number of Citations: 603

# Keep Your Business Safe from Cybersecurity Threats

[ Article was originally posted on [www.sba.gov](http://www.sba.gov) ]

By *Keith A. Bluestein*,

According to the National Cybersecurity Alliance, many small to medium-sized businesses (SMBs) have the misconception that their data is not valuable and that, in turn, they are unlikely to be the target of a cyberattack. However, 28% of cyberattacks involve small business victims. In short, all data is valuable – and there are simple steps that small business owners can take to protect theirs. This Cybersecurity Awareness Month, we encourage you to leverage the following tips and resources to ramp up your cybersecurity safeguards.

## Understand the Most Common Types of Cyberattacks

To effectively prevent cyberattacks, you must first understand some of the ways these threats can present themselves. The most common types of cyberattacks include:

- **Phishing:** Phishing is when cybercriminals send an email or text that appears to be from a legitimate organization or known individual. These emails often entice users to click on a link or open an attachment containing malicious code. After the code runs, your

computer may become infected with malware (i.e. software intentionally designed to cause damage to a computer, server, client, or computer network).

- **Viruses:** Viruses, a type of malware, are harmful programs that spread from computer to computer, giving cyber criminals access to systems.
- **Ransomware:** Ransomware is a type of malware that restricts access to a computer until a ransom is paid.

## Assess Your Cybersecurity Vulnerabilities

Once you understand what cyberattacks can look like, the next step is to evaluate your own operation's cybersecurity risks. A cybersecurity risk assessment can identify where a business is vulnerable and help you create a plan of action, which should include employee training, a strategy for securing email platforms, and a path forward to protect your business's information assets.

## Here are a few government tools you can use for your cybersecurity risk assessment:

**Federal Communications Commission (FCC) Planning Tool:** The FCC offers a cybersecurity planning tool to help you build a strategy based on your unique business needs.

**Cyber Resilience Review:** The Department of Homeland Security's (DHS) Cyber Resilience Review is a non-technical assessment to evaluate operational resilience and cybersecurity practices.

**Cyber Hygiene Vulnerability Scanning:** DHS also offers free cyber hygiene vulnerability scanning for small businesses.

**Cyber Essentials:** Cybersecurity & Infrastructure Security Agency's (CISA) Cyber Essentials is a guide for leaders of small businesses as well as leaders of small and local government agencies to develop an actionable understanding of where to start implementing organizational cybersecurity practices.

## Implement Best Practices

While your risk assessment will help you develop tailored cybersecurity plans based on your unique needs, there are also general best practices that all businesses can adopt to reduce vulnerability to a cyberattack. These include:

# Top 10 OSHA Standards Violations Cited for Construction in 2020

Continued from page 1

## 7. Subpart Title: Personal Protective and Life Saving Equipment

Standard Number: 1926.100

Title: Head protection.

FY2019 Top 10 Rank: 7

Number of Citations: 540

## 8. Subpart Title: Excavations

Standard Number: 1926.651

Title: Specific excavation requirements.

FY2019 Top 10 Rank: 8

Number of Citations: 495

## 9. Subpart Title: Scaffolds

Standard Number: 1926.453

Title: Aerial lifts.

FY2019 Top 10 Rank: 9

Number of Citations: 426

## 10. Subpart Title: Fall Protection

Standard Number: 1926.502

Title: Fall protection systems criteria and practices.

FY2019 Top 10 Rank: 10

Number of Citations: 403

Note: The data for position and number of citations is current as of October 8, 2020.

## Key Takeaways

The FY2020 list is identical to the FY2019 list in terms of position in the Top 10.

In fact, the list has been fairly consistent over the past few years, with most of the same standards topping the list for citations year in and year out. Employers should take note of this list and try and incorporate this in their safety trainings and toolbox talks.

Violations for standards revolving around fall hazards continue to dominate the list, which isn't surprising since falls are the leading cause of construction worker deaths every year. Six of the 11 standards making the list had to do with fall protection, ladders, and scaffolding.

## Avoidable, Yet Costly, Safety Violations

In addition to the very real possibility that violating OSHA standards can easily lead to accident, injuries, and even death, these citations cost the construction industry millions of dollars each year.

OSHA handed down 16,847 citations from 6,653 inspections in FY2020 to construction companies, totaling \$59,598,556 in penalties. These numbers are lower than in FY2019, but these numbers are preliminary because not everything has been reported this close to the end of the last fiscal year.

In FY2019, OSHA issued 31,788 citations based on 12,468 inspection, resulting in \$102,068,371 in fines. It will be interesting to see how the final numbers for FY2020 compare to FY2019 and whether there was any impact on the total number of inspections due to the COVID-19 pandemic.

Remember, OSHA standards are the bare minimum of what construction firms should be doing to protect workers. Be sure to check out our 10 Construction Site Safety Tips that address how to protect workers from hazards created when these standards are violated.
