

Construction Certifications That Can Level Up Career Potential

[Article was originally posted on www.constructconnect.com]

By Holly Welles,

The construction industry is one of the few left in the world where you can start your career as a laborer and advance through various levels similar to the metaphorical corporate ladder in white-collar jobs. While it's impossible to do this entirely on your own merit, obtaining construction certifications can make those promotions easier to achieve. Here is a list of certifications you might consider if you want to level up your career potential:

1. National Council of Examiners for Engineering and Surveying (NCEES)

Engineering and surveying are both essential parts of the construction industry. Are you interested in trying your hand at one of these fields, or have you already spent part of your career behind a computer or out in the field taking elevation surveys? If either is true, obtaining a certification from the National Council of Examiners for Engineering and Surveying can jump-start your career and open up more opportunities.

Check with state offices to determine the exact amount of education and experience you need before you become eligible to take the certification exams.

2. Construction Management Certification

For many, construction management is the next logical step after spending years on the ground floor, learning the industry's ins and outs. You don't necessarily need a certification to become a construction manager, but it does make it easier to obtain those promotions. Consider a program from the Construction Manager Certification Institute, which provides some of the most easily recognized and accredited certifications in the country.

Construction managers are high in demand, with forecasters predicting 11% job growth through 2026—barring of course, the unprecedented disruption of 2020. Earning certification for construction management can launch workers into positions with both high income potential and high stability.

3. American Institute of Constructors (AIC)

At the American Institute of Constructors, there are two levels of certification. First, you obtain your Associate Constructor certification after graduating from a four-year construction management program or moving into the field from another industry. The second level of AIC certification is the Certified Professional Contractor, who, in addition to construction management experience, will have spent many years working in the field.

4. National Commission for the Certification of Crane Operators (NCCCO)

The National Commission for the Certification of Crane Operators is fairly self-explanatory. Their goal is to improve workplace safety by training and certifying crane operators and ensuring they follow the best safety practices. Since there are many different crane models, the NCCCO offers certification tests for each one.

This certificate is just one example of many equipment-specific certifications you may seek to jump-start your career or improve your forward momentum. In addition to keeping your workplace safer, well-trained and certified, proper care and training helps maintain the value of machinery and protect company investments. Well-trained operators are beneficial to their employers' bottom line and have good job prospects as a result.

5. Project Management Professional (PMP) Certification

Obtaining a PMP certification from the Project Management Institute showcases you as one of the most talented project managers in the country. It also improves your earning potential, with PMP certified managers making an average of 20% more than their uncertified counterparts. This certificate is also a fantastic tool for networking and connecting with other professionals.

6. U.S. Green Building Council (USGBC)

Sustainability is a hot-button topic in the construction industry. Construction professionals who pursue knowledge and experience in this sector set themselves up to stay on top of green construction trends and secure opportunities to do business for environmentally-focused projects.

The Leadership in Energy and Environmental Design (LEED) certification is the most widely used rating system to determine how sustainable a building is. Obtaining a certificate from the U.S. Green Building Council proves your dedication to sustainability in the construction sector. As more companies start switching to green materials and methods, individuals with USGBC certifications will be in higher demand than they already are.

SBA Awards Entrepreneur Fund \$200,000 PRIME Grant to Help Emerging Micro-Entrepreneurs Gain Access to Capital

[Article was originally posted on www.sba.gov]

By Minnesota District

The Entrepreneur Fund is set to receive a \$200,000 grant from the U.S. Small Business Administration to help low-income entrepreneurs gain access to capital through the Program for Investment in Micro-Entrepreneurs, more commonly known as PRIME. The Entrepreneur Fund is a Community Development Financial Institution that serves 17 rural counties in northeastern Minnesota, central Minnesota, and northwest Wisconsin by providing strategic business services and small business financing.

The SBA's PRIME award will support the Entrepreneur Fund's efforts to provide both traditional one-on-one consultations and technical

assistance, along with new virtual services. It will provide services to 400 disadvantaged microentrepreneurs to improve key business skills, develop entrepreneur networks, and access small business capital.

To do that, the Entrepreneur Fund intends to use the funds to develop more online learning platforms, virtual networking opportunities, and virtual classroom settings for business classes and programs. It will help the organization extend the reach of services to rural areas and support a transitioning culture around social distancing needs. This work will result in the growth of business revenues, personal incomes of the owner, and access to small business financing.

"These funds from the SBA will help the Entrepreneur Fund make an impact on entrepreneurs trying to take their business to the next level and make it sustainable during this challenging time," SBA Great Lakes Regional Administrator Rob Scott said. "This business development also will make an impact on local economies and help spur economic development and job creation in distressed areas, which is a key element of SBA's strategy."

For 2020, the SBA placed special emphasis on projects designed to offer training and technical assistance to strengthen economically disadvantaged businesses, particularly those projects serving entrepreneurs in Opportunity Zones, rural areas and Historically Underutilized Business Zones. The 30 PRIME grant recipients represent 19 states and 23 are in Opportunity Zones created by the Tax Cuts and Jobs Act of 2017 and designed to spur new capital investment in America's economically distressed communities. Nearly 9,000 communities in all 50 states, the District of Columbia, and five territories are designated as Opportunity Zones.

This year more than 120 organizations applied for PRIME grants, which range from \$75,000 to \$250,000, and typically require at least 50% in matching funds or in-kind contributions. PRIME was created by Congress as part of the Program for Investment in Microentrepreneurs Act of 1999. Grant funds will be made available on September 30, 2020, and the project period for each grant is one year.

Construction Certifications That Can Level Up Career Potential

Continued from page 1

7. Bachelor's Degree

If all else fails, go back to college. Obtaining a bachelor's degree in construction management or similar fields can be incredibly valuable. Start with a four-year program. You have the option to continue going to school for a master's degree or even a doctorate in the same

field, but a bachelor's degree is always the best place to start.

Certifications Can Improve Career Potential

If you work in the construction industry and have been struggling to secure promotions that you know you're qualified for, consider seeking additional certifications like the ones we've listed above. They're the perfect method to

showcase your skills in a way that helps you jump-start your career and launch it into the stratosphere. Look at your history and experience to figure out what certification tests you might already qualify for.

REQUEST FOR QUALIFIED/CERTIFIED DBE SUBCONTRACTOR AND SUPPLIER PARTICIPATION

Construction on State Highway in Alameda County near Fremont, CA
Caltrans Contract 04-160304
DBE Goal 11%

Bid Date: October 29, 2020 at 2:00 PM
Quotes not received by 12 PM on October 29th may not be reviewed/evaluated.

Flatiron West Inc. requests DBE subcontractor and supplier participation for the following items of work, but not limited to: CAS/Roadside Signage, Bridge Demo, Clear & Grub, Erosion Control, Landscaping/Irrigation, AC Paving, CIDH, Jt. Seal Assembly, Post Tensioning, Rebar, Shotcrete, Soil Nail Walls, Painting/Concrete Staining, AC Dike & Curbs, Underground Utilities, Fencing, Metal Railing, Bridge Concrete Barrier, Roadway Concrete Barrier, Striping & Markings, Minor Concrete, Clean/Treat Deck, Trucking & Aggregates (including: Class 2 & Structure Backfill), Ready Mix, Concrete Pumping Services, Welded Steel Pipe, Misc. Metals/Iron & Steel, Underground Precast & Pipe Products, SWPPP Plan & Materials, Lead Plan, Bridge Bearings, Street Sweeping, Traffic Control and QC Testing.

Non-DBE Subs/Suppliers: You will be expected to carry a proportionate percentage of 2nd-tier DBE participation with your quote. 2nd-tier DBE participation will be evaluated with your price.

100% performance/payment bonds will be required for the full amount of the subcontract price. Please contact Flatiron for any assistance to this solicitation, including obtaining bonding, insurance, equipment, materials and/or supplies. Provide subcontractor/supplier scopes/quotes as early as possible to enable estimators to perform a thorough evaluation of all quotes received. Quotes will be broken down into comparable packages as reasonably necessary to facilitate participation. Quotes must be valid for the same duration as specified by the Owner for Contract Award. We are signatory to Operating Engineers, Laborers, Ironworkers, Cement Masons, Carpenters and Pile Drivers Unions. Non-signatory subs will be required to sign an agreement for trades covered under our union agreements. Flatiron intends to work cooperatively with subcontractors and suppliers for all bid items you are licensed and qualified to perform. Bid items can be split to facilitate participation from all certified firms. Flatiron West will reimburse for bond premium up to 2%. **Firms must possess & provide current contractor's license number & DIR Registration number on the quote.** Firms must possess insurance and workers compensation coverage meeting project requirements. Waiver of Subrogation is required. Please contact Flatiron for any assistance required by your firm. Subcontractors/Suppliers will be required to execute our standard agreements and agree to the standard general terms & conditions. Copies are available for review on our Box.com ftp site upon email request.

Project documents (Plans and Special Provisions) may be obtained for free on the Caltrans website. To view and download projects docs for FREE from the Caltrans website you will need to "Create an Account" with Caltrans Connect. Use the following link <http://ppmoe.dot.ca.gov/des/oe/weekly-ads/all-adv-projects.php> to enter the Advertised Projects page and scroll to Contract number: 04-160304. Sign in is required to access project plans.

Project documents may also be viewed in our office by appointment only, or downloaded for FREE from our Box ftp site. Please send an email request to NorCalBids@flatironcorp.com to view/access plans and specs for FREE on our BOX.com ftp site, or to set-up an appointment to view and meet with an estimator in our office.

Please send all quotes by email to NorCalBids@flatironcorp.com or to our BID FAX at 707-746-1603.
