How to Prevent Employee Credit Card Fraud

When people use a credit card to pay a place of business, they have a reasonable expectation of their information remaining between them and the employee taking the card. But what happens if that person uses the information or passes it on to someone else? Your customer's credit card info could conceivably be used to make fraudulent purchases, which could cost you money and impact your credit rating. Another way employees can commit credit card fraud is if they misuse your company's credit card. Following are a few tips on how to prevent employee credit card fraud.

Employee Credit Card Oversight

A common form of employee credit card fraud is when a worker is given a company credit card in order to make purchases for the business. Although most employees will take this responsibility seriously, there will always be someone who thinks they're underpaid or that the bosses simply won't notice a few extra purchases. You may not be able to catch every thief, but if you create an oversight section in your accounting department you may be able to prevent a large percentage of the fraud. You should have the oversight section work out a method of monitoring all the purchases of everyone who has a company credit card. Each employee should be compelled to account for each and every purchase they make, and be able to justify the expenditure. They should also be required to keep receipts of every transaction they make, and to turn them in to the accounting department on a regular basis.

Be Willing to Take Legal Action

When you hand out a company credit card to an employee, you should make it known that their use of the card will be monitored. Stress that being given the card is a show of trust on your part, and that you expect the card holder to use it honorably. You should also let them know that you are willing to take legal action in the event you discover credit card fraud on their part. Hopefully the threat of arrest and prosecution will be enough to deter any potential employee credit card fraud.

Monitor Your Credit Rating

No matter what form employee credit card fraud may take, there is a way that you can keep on top of it. If your credit cards are being misused, whether it's by your own employees, or people who work for a business you frequent, it will ultimately impact your credit rating. In order to make yourself aware of credit card fraud, you should keep a close eye on your credit score. The moment you discover a discrepancy, you should contact the credit reporting agencies and find out whether or not there actually is a problem.

As soon as you know for sure, contact your accounting department, especially if it involves your own employee's credit cards or the manager of the business whose employees you suspect may be stealing your information.
