

SBE NEWS ALERT

Small Businesses Create 2 Million Jobs

Small Business Hiring Powers Recovery...

Share of Net Job Creation Since the End of the Downturn by Employment Size of Firm

Source: ADP National Employment Report.

By Maria Contreras Sweet, SBA Administrator

Last week's jobs report offered more evidence that our economy is gathering a head of steam as we ring in the New Year. Last month, American businesses added back 252,000 jobs and our unemployment rate fell to its lowest level since June 2008. We're in the midst of 58 month of consecutive job growth – the longest streak on record since the mid-1990s.

Once again, it was not large corporations driving this train, but entrepreneurs and small businesses powering us out of the greatest economic crisis since the Great Depression. Small businesses created nearly 2 million of the roughly 3 million private-sector jobs generated in 2014. More than 7 million of the 11 million jobs created during our recovery have been generated by startups and small enterprises.

December's jobs picture is a microcosm of the upswing: 73 percent of last month's job growth

came from small businesses, according to ADP. Meanwhile, twice as many small businesses added jobs as cut them last month, according to a separate report by the National Federation of Independent Business (NFIB), which also found that small-firm revenues are on the rise.

American manufacturing is undergoing its best stretch of job growth since the 1990s. The U.S. auto industry is back, creating a half-million new jobs in the last five years. The United States is now the world's number No. 1 producer of oil and gas; President Obama's policies have helped cut our national deficits by about two-thirds; and 10 million Americans gained health insurance in the last year alone.

In short, we've come a long way.

Entrepreneurs have been our life preserver in this economic storm, because of their resilience in budgeting wisely and effectively deploying their capital. While commercial small business lending is still only at 91 percent of the pre-recession level, SBA-backed lending has now eclipsed its pre-recession output. In fact, small business borrowers

have received more SBA-supported capital under President Obama than any president before him – \$163 billion total since 2009.

In other words, SBA continues to play a pivotal role in America's economic comeback story. Upward pointing arrows on graphs and ascending numbers on spreadsheets don't always capture the real-life impact our agency has on this nation's improving economy. But I've heard story after story from entrepreneurs who tell me they would've gone belly up during the recession if not for timely SBA assistance.

One industry that's surging is computer systems design, which now employs 1.8 million Americans – 25 percent more than before the recession began. Earth-

Small Businesses Create 2 Million Jobs

Continued from page 1

Walk Communications is a pioneer in education technology, bringing mobile wireless computer labs and patented battery technology to schools across the globe. Five years ago, the Manassas, Virginia-based company was forced to cut more than half of its workforce due to recessionary pressures. But in 2010, Earthwalk received a \$1.5 million SBA loan to secure additional working capital and refinance its debt. Since then, the company has added back 20 workers and last year celebrated a record year of \$3 million in revenue growth.

There's ample reason to believe 2015 will be a ripe environment for small business growth. Consumer confidence is at a 7-year high. Our economy has added at least 200,000 jobs for the last 11

months in a row, and hiring is at levels we haven't seen since the Great Recession. The wind is finally at our back, and SBA is ready to help make this a breakthrough year for entrepreneurs on Main Street and beyond.

About the Author:

Maria Contreras-Sweet
SBA Administrator

Maria Contreras-Sweet is the Administrator of the U.S. Small Business Administration. The SBA helps both Main Street and high-growth small businesses get access to capital, counseling, federal contracts, disaster assistance and more.
