

SBE NEWS ALERT

What to Know About Small Business Investment Companies (SBICs)

Did you know that the Small Business Investment Company (SBIC) Program has been helping small business access capital for more than fifty years?

What's the SBIC Program?

The Small Business Investment Company (SBIC) Program is a multi-billion dollar program that, in fiscal year 2013 alone, invested \$3.5 billion in financing dollars to small businesses! So how does it work?

SBICs are privately owned and managed investment funds. They're licensed and regulated by SBA and use their own capital plus funds – borrowed with an SBA guarantee – to make equity and debt investments in qualifying small businesses.

The SBA doesn't invest directly into small business through the SBIC Program, but provides funding to qualified investment management firms that are experts in certain sectors or industries. For every \$1 an SBIC raises from a private investor, the SBA will typically provide \$2 of debt capital (with a cap of \$150 million). Here's a look at how it works:

Firms combine their own capital with funds borrowed from the federal government at low rates. In turn, they invest these funds in promising new ventures. And it's all done with zero taxpayer dollars!

What are the benefits of the SBIC Program?

There are benefits for the SBICs and the small business recipients!

Small businesses that qualify for assistance from the SBIC program can receive equity capital, long-

term loans and expert management assistance. SBICs benefit small business owners by opening up greater access to equity capital and expert guidance they may not otherwise get through traditional venture capitalists.

Investment managers participating in the SBIC program can add to their own private investment capital with funds borrowed at favorable rates through the federal government.

And ultimately, the national economy benefits from the SBIC program as the small businesses financed by SBICs continue to create jobs and generate tax revenues over the program's life.

Want to learn more about the SBIC Program? Visit the SBIC Program pages, including the FAQ. Still have questions? Email askSBIC@sba.gov

SBIC Program Overview

A multi-billion dollar program founded in 1958, the SBIC Program is one of many financial assistance programs available through the U.S. Small Business Administration. The structure of the program is unique in that SBICs are privately owned and managed investment funds, licensed and regulated by SBA, that use their own capital plus funds borrowed with an SBA guarantee to make equity and debt investments in qualifying small businesses. The U.S. Small Business Administration does not invest directly into small business through the SBIC Program, but provides funding to qualified investment management firms with expertise in certain sectors or industries.

This section provides an overview of the SBIC Program, providing information on the benefits to small businesses, how investment funds can partic-

ipate and what the advantages are of investing in an SBIC. The content of this section, as well as a general overview of the Office of Investment and Innovation, is available for download by clicking the image below.

Program Achievements & Success Stories

On September 30th, 2013, the last day of the U.S. Government’s fiscal year, the SBIC Program closed another record year. Here are just a few of the results achieved:

- The SBA issued \$2.2 billion in new commitments to SBICs
- \$3.5 billion in financing dollars were invested in small businesses
- 1,068 small businesses were financed, 30% of which were in low-to-moderate income areas or were minority- or women-owned businesses
- ...all at ZERO cost to taxpayers...

Some of the country’s most successful corporations received financing from SBICs during their early stages of growth. The program’s “success stories” include thousands of small businesses, but here are a few of the more recognizable names:

- Costco
- Callaway
- Cutter & Buck
- Amgen
- Apple
- Intel
- Sun Microsystems
- Staples
- AOL
- FedEx
- Jenny Craig
- Build-a-Bear Workshop
- Outback Steakhouse

The SBIC Life Cycle:

Types of Licenses:

1. Investment funds licensed as SBICs currently have the option of applying for three different types of license:
2. Standard Debenture License: Funds have been licensed as Standard Licensees since the program was founded in 1958. They have the broadest investment mandate, are licensed through a “rolling admissions” process and are eligible for two tiers of leverage capped at \$150 M.
3. Impact Investment License: The Impact license is for funds with an investment mandate targeted social as well as financial returns. The managers of these funds pledge to invest 50% of their capital in “impact” investments and are eligible for an expedited licensing process. For more information about the Impact Investment License, please visit our Announcements & Initiatives section.
4. Early Stage Innovation License: The Standard and Impact licenses are most suitable for investors targeting later-stage companies with cash flow. The Early Stage Innovation License, by contrast, is designed to attract investment fund managers with experience supporting companies in their earliest stages of growth. They have access to one tier of leverage, capped at \$50 million and are licensed through an annual call (issued in December or January of each year) versus a rolling basis.
