

July 4: The Birth of American Independence

By History Channel

Variouly known as the Fourth of July and Independence Day, July 4 has been a federal holiday in the United States since 1941, but the tradition of Independence Day celebrations goes back to the eighteenth century and the American Revolution (1775 to 1783).

In June of 1776, representatives of the thirteen colonies then fighting in the revolutionary struggle weighed a resolution that would declare their independence from Great Britain. On July 2, the Continental Congress voted in favor of independence, and two days later its delegates adopted the Declaration of Independence, a historic document drafted by Thomas Jefferson.

From 1776 until the present day, July Fourth has been celebrated as the birth of American independence, with typical festivities ranging from fireworks, parades, and concerts to more casual family gatherings and barbecues.

When the initial battles in the Revolutionary War broke out in April 1775, few colonists desired

complete independence from Great Britain, and those who did were considered radical. By the middle of the following year, however, many more colonists had come to favor independence, thanks to growing hostility against Britain and the spread of revolutionary sentiments such as those expressed in Thomas Paine's bestselling pamphlet *Common Sense*, published in early 1776.

On June 7, when the Continental Congress met at the Pennsylvania State House (later called Independence Hall) in Philadelphia, the Virginia delegate Richard Henry Lee introduced a motion calling for the colonies' independence. Amid heated debate, Congress postponed the vote on Lee's resolution, but appointed a five-man committee—including Thomas Jefferson of Virginia, John Adams of Massachusetts, Roger Sherman of Connecticut, Benjamin Franklin of Pennsylvania, and Robert R. Livingston of New York—to draft a formal statement justifying the break with Great Britain.

On July 2, the Continental Congress voted in favor of Lee's resolution for independence in a near-unanimous vote (the New York delegation

abstained, but later voted affirmatively). On that day, John Adams wrote to his wife, Abigail, that July 2 "will be celebrated, by succeeding Generations, as the great anniversary Festival" and that the celebration should include "Pomp and Parade. . .

IS SOLICITING COST PROPOSALS FROM DBE AND SBE SUBCONTRACTORS/VENDORS FOR:

Amtrak Washington Terminal Yard HSR Ready Track Expansion Project, Washington, DC Amtrak Contract
 Bid Date: July 16, 2020

Description of Project:
 Overall, the project includes four (4) new tracks within the service yard (3 electrified and 1 non-electrified) to support the needs of the Acela 21 program. Amtrak Forces will complete the installation of all track work (approximately 5,000 LF of new track), including installation of seven (7) new turnouts. Additionally, the catenary wire work will be completed by Amtrak Forces (approximately 7,250 LF of new messenger and contact wire), including installation of 21 catenary poles. The work by the contractor includes new underground duct bank and site utility installation necessary for the new work, including complete installation of five (5) new high mast light poles with associated wiring and foundations, complete installation of 21 new catenary foundations, as well as fabrication and delivery of the 21 catenary poles, as well as upgrades to electric service to support new 480V wayside power.

Many bidding opportunities are available: miscellaneous metals, structural steel, caissons, fencing, survey, saw cutting, selective demolition, trucking, haul and disposal, concrete reinforcing steel, electrical, CPM scheduling.

IS SOLICITING COST PROPOSALS FROM DBE AND SBE SUBCONTRACTORS/VENDORS FOR:

Amtrak Baltimore Penn Station NGHSR Station Renovations Project, Baltimore Amtrak Contract
 Bid Date: July 24, 2020

Description of Project:
 This station is Amtrak's eighth busiest station nationally with approximately three million passengers per year utilizing approximately 150 Amtrak intercity and Maryland Transit Administrations MARC commuter trains each day. Ridership is forecast to increase significantly at this principal station along the Northeast Corridor. To accommodate this increase, Amtrak plans to introduce its high-speed train (HST) fleet to increase the train frequency along the corridor. MARC also plans to increase the frequency of its service to correspond to its commuter passenger increasing volume.

The project also includes other significant improvements such as:

- Reconstruction of a side level boarding platform (48" above top of rail). Platform 2 reconstruction will bring the architectural elements back to their original beauty while making the functional and ADA-compliant enhancements of a side boarding with an elevator, an escalator, and refurbished stairs.
- Construction of a new Platform 5, which will be approximately 1,000 feet long and constructed with precast concrete planks.
- A new canopy including lighting, signage, drain leaders, electrical outlets, video surveillance cameras, and passenger information display systems (PIDS) which include audio-visual messaging and speakers.
- A new pedestrian bridge will extend from the Concourse elevator lobby, over Tracks 7 and F.

Many bidding opportunities are available: demolition, drilled piers, micropiles, structural steel, miscellaneous metals, precast concrete, roofing, skylights, curtainwall, wall panels, gypsum board, masonry, paint, tile, terrazzo, tactile warning surfacing, elevator, escalator, HVAC, fire protection, plumbing, electrical, signage, sitework, fencing, landscaping.

IS SOLICITING COST PROPOSALS FROM PANYNJ MWBE AND SDVOB AND LOCAL SUBCONTRACTORS/VENDORS FOR:

JFK Airport Bergen Electrical Substation Project
 PANYNJ RFP No: 60765
 Bid Date: July 27, 2020

Description of Project:
 The Bergen Substation Replacement Project ("project") will replace the existing Bergen and Van Wyck 5-kilovolt (5KV) electrical substations at John F. Kennedy International Airport with a new, single Bergen 5KV Substation. The Bergen Substation is a critical component of the electrical power distribution system at JFK and assists in supplying power to JFK airside-landside facilities and associated supporting infrastructure. The project also includes the decommissioning and demolition of the existing Bergen and Van Wyck substations following commissioning of the new, replacement facility.

The project for the new Bergen Substation will include the design and construction of a new, single substation that would replace the existing Bergen and Van Wyck substations. The scope of work for the project will include new switchgears, feeders, associated electrical equipment, and a new concrete building to house the substation equipment and associated building systems. Decommissioning, demolition, and site restoration at the existing Bergen and Van Wyck substation sites is also included in the scope of services.

Many bidding opportunities are available: furnish and install rebar, ready-mix concrete supply, masonry, structural steel, miscellaneous metals, waterproofing, building insulation, metal wall paneling, roofing, green roofing, fire proofing, doors, overhead coiling doors, windows, glazing, gypsum board, ceramic tiling, painting, sprinklers, plumbing, HVAC, piles/micropiles, pavement milling, sawcutting, asphalt concrete paving, mpt materials, fill material, line striping, fencing, landscaping, drainage, dumping, manholes, electrical, electrical materials and equipment, photography, portable toilets, dumpsters, office trailers, soil borings, soil testing, commissioning.

If you are interested in bidding on this project, please contact Skanska's Outreach Coordinator: Julia.Omanoff@skanska.com • EOE/M/F/Vet/Disabled

Amtrak Emergency Service Building Relocation Project, Manhattan Amtrak Contract
 Bid Date: July 28, 2020

Description of Project:
 The Emergency Services Building (ESB) project (the Project) consists of the construction within the secured site of the LIRR West Side Storage Yard (West Rail Yard) of a new electrical substation, emergency generator, and control panel within a fenced area as a temporary replacement for the ESB while it is demolished in favor of a new substation that is not a part of this contract, and moving an existing SCADA cabinet to a location adjacent to the aforesaid fenced area. This equipment will be located near the northwest corner of 11th Avenue and West 30th Street, north of the High Line structure. The Project also includes communications and electrical raceways, boxes, and cables related to the foregoing; fire alarm work related to the foregoing, a new water meter vault, and related civil work, all between the existing LIRR Access Road and West 30th Street.

Many bidding opportunities are available: Pipe materials, ready-mix concrete, rebar fabrication, rebar installation, erosion control materials, chain link fence, fill materials, haul and disposal, structural steel, metal deck, and miscellaneous metals.
