

Construction Industry Adds 28,000 Jobs In August After Spending Drop In July

But Contractors Cite Widespread Difficulty Finding Experienced Workers

Hiring Levels May Have Been Higher But Most Firms Report Having a Hard Time Finding Qualified Workers; Association Officials Call on Senate to Pass Perkins Bill to Boost Funding for Career and Technical Education

Construction employment increased by 28,000 jobs in August, following a dip in hiring and spending in July, but contractors face a lack of experienced workers, according to an analysis of new government data and a new workforce survey by the Associated General Contractors of America. Association officials said construction job growth would have been even higher but a majority of firms report having a hard time finding qualified workers.

“Construction firms have stayed busy, adding employees in the past year at nearly twice the rate of employers throughout the economy, but more than two-thirds of contractors report difficulty finding craft workers as the number of unemployed, experienced construction workers hit a 17-year low in August,” said Ken Simonson, the association’s chief economist. “Although construction spending has fluctuated recently, many contractors are still looking for qualified craft workers and project managers.”

Construction employment totaled 6,918,000 in August, an increase of 28,000 for the month and 214,000, or 3.2 percent, over 12 months.

Industry employment had dipped by 3,000 in July. The economist pointed out that the growth rate from August 2016 to last month was nearly double the 1.7 percent uptick in total nonfarm payroll employment over that period. The number of unemployed persons whose last job was in construction fell for the eighth consecutive year to 448,000, the lowest August total for the series since 2000.

“With such a small pool of unemployed construction workers available, it is no wonder that 70 percent of the respondents to the association’s workforce survey released this week said they were having trouble filling a variety of hourly craft positions,” Simonson commented. “Half or more of the 1608 respondents said they were having trouble finding carpenters, bricklayers, electricians, concrete workers or plumbers. Some salaried positions—notably project managers and supervisors—are also hard to fill.”

A separate government report today showed construction spending in July, the latest month available, totaled \$1.21 trillion at a seasonally adjusted annual rate, a decrease of 0.6 percent from the rate in June, but an increase of 1.8 percent from the July 2016 rate. The economist said the year-over-year growth was consistent with contractors’ reports that they still have plenty of projects and need more workers.

Construction officials urged federal, state and local leaders to act on measures outlined in the association’s Workforce Development Plan designed to help recruit and prepare more young adults for high-paying construction careers. In particular, they urged members of the Senate to pass a new Perkins Act that has already received widespread bipartisan support in the House. The measure increases funding for and reforms career and technical education programs, so more schools can offer construction-focused programs.

“Exposing students to construction as a career path will encourage more of them to pursue these high-paying careers,” said Stephen E. Sandherr, the association’s chief executive officer. Click here to see the national survey results, analysis of the data and regional and state-by-state results.

10 Business Ideas for Young Entrepreneurs In Their Spare Time

By Marsha Hunt,

Entrepreneurship is about finding cost-efficient solutions to problems that may get in the way of your success. Rather than being a career, those who call themselves entrepreneurs follow a certain lifestyle that revolves around finding new business ventures. As a young, eager entrepreneur, it's no surprise you're often motivated to make more money and put in extra work.

There are numerous low-cost side jobs you can do with your current skill set that can help you reel in more cash as long as you put in the work. To help you out, I've put together a list of 10 business ideas that young entrepreneurs could pursue in their free time.

Consulting

As an entrepreneur, you probably have a lot of knowledge about a particular field or sector. You can become a freelance consultant and advise companies that can benefit from your expertise. From marketing to human resources, sales, and even resource management, all of these skills can help you make good money by consulting.

App Creation

In a nutshell, companies of all sizes are turning to apps because they can help to ensure efficient and effective communication with customers. Apps can also help consumers carry out different tasks, such as updating information on their profile, processing orders, and receiving information about products without the need for assistance from another human.

You should be careful and make sure there aren't any license requirements in your area, and if you're working online, make sure you maintain a professional tone and good grammar throughout your communications.

Stock Exchange

Similarly to building apps, the stock exchange has always been regarded as a specialized field that was only accessible by invitation. Thanks

to the development of mobile devices and widespread of technology, you can become a stock trader from the comforts of your home.

Unless you're an expert in finances, you'll have to read and learn about the ins-and-outs of the stock market. You can always start trading in low-stakes markets to get familiarized with the industry and build a name for yourself, eventually moving into high-stake markets that generate more profits.

Simple Graphic Design

There is a wide spectrum of graphic design, ranging from putting together a simple banner to logo creation. A number of companies need experienced designers to help them build complex graphics, but you can teach yourself the basics and offer simple graphic design. You can specialize in providing banners and low-cost social media elements that companies often require quickly.

Customer Service Agent

If you have a fast internet connection and you enjoy providing assistance, you can always opt for a customer service gig from your home. If you have some experience in telecommunications, you can even look at opportunities to become a sales representative or collector, which often pay better.

These are great alternatives because you'll be provided with all the tools you need, some training, and you can almost always start immediately. However, always keep your client's time zone in mind or you may end up working late evenings or early mornings!

Translator

We live in a globalized society, so entrepreneurs that are fluent in more than one language have a significant advantage when it comes to business opportunities. Likewise, you can start offering translation services on the side, which can earn you a significant amount of money without having to learn a new skill.

Translation jobs vary greatly, and the bigger the company you work with, the bigger the payout. Just remember that they will also have higher quality standards, so tread carefully and only accept assignments if you feel you're fluent enough to handle them. Once you earn a reputation, you can expand and set up your own translation services agency.

Data Entry

One of the most basic jobs you can do is data entry. Filling out forms and other documents one by one does not require a high level of dexterity, and the work usually comes in bulk. You can earn a good amount of money and all you need is a computer and internet connection.

The only downside to data entry is that it has a relatively low payout and it can become extremely tedious after a while. You have to be really motivated and find ways to keep yourself engaged while you're on the clock.

City Guide

If you love the outdoors, meeting new people, and know your city like the back of your hand, you could offer walking city tours. Moreover, if you live in a developed metropolis with public bike rentals and bike lanes, you can provide cycling tours for tips or a set a flat rate per trip.

Local Deliveries

There are many companies that provide local delivery opportunities, a perfect side gig if you know your way around town. You can even opt for a bicycle delivery position and stay fit while earning money.

Rideshares

Rideshares are some of the fastest-growing jobs in Europe, Asia, and North America. You can now share your vehicle, drive people around your city, and get paid for it in your free time. There are numerous platforms that help connect drivers to people in need of rides, and the best part is the

10 Business Ideas for Young Entrepreneurs

Continued from page 4

majority of them provide the insurance needed
 to cover you in case of emergencies. You don't
 have to live in a big city, as sharing your vehicle
 can be extremely profitable in smaller towns and
 areas with slow public transport.

Finally...

There's nothing wrong with having a side hustle
 that helps you gain more financial flexibility. The
 jobs above should provide a great alternative if
 you want to invest your spare time into money-
 producing activities. Just make sure you provide
 quality work and you'll attain a status of success
 that can spread to your entrepreneurial ventures.

Source: www.entrepreneur.com

The San Francisco Bay Area Rapid Transit District (BART)
invites you to a **Pre-Submittal Matchmaking Session** for
Contract No. 49GH-110, Communications Based Train Control (CBTC) System
and
Contract No. 49GH-120, Train Control Performance Support Services (TCPSS)

The Session will be held on Wednesday, September 6, 2017 from 1:00 to 4:00 p.m. at the Joseph P. Bort MetroCenter Auditorium, 101 8th Street, Oakland, California 94607, accessible by BART – exit at the Lake Merritt Station in Oakland.

The total estimated cost of the Design-Build Contract is in the range of \$500 to \$625 million dollars not including options. This Contract is subject to BART's Disadvantaged Business Enterprise (DBE) Program. **A DBE participation goal commitment of 5%** was set for the total proposal price excluding any allowance and option items, if applicable.

The Design-Build Contract Work consists of furnishing all management and technical services including coordination, professional services, labor, equipment, materials, safety certification, training, spare parts, and other services to perform the design, manufacture, installation, testing, and handover of the turnkey CBTC System for BART. Subcontracting opportunities include, but are not limited to, electrical (C10), track work, construction services (C12, C8), project management, and communications.

The District is also requiring Proposals to be submitted for a Train Control Performance Support Services Contract (TCPSS) with the Proposal for the Design-Build CBTC System Contract. The annual estimated cost of the TCPSS Contract is in the range of \$5 to \$7 million dollars. This Contract is subject to BART's Small Business (SB) Participation Program that includes a preference for Proposers who meet or exceed the SB participation goal of 5% of the total proposal price excluding any allowance and option items, if applicable. This Contract is also subject to BART's Non-Discrimination Program for Subcontracting. **The availability percentages are 10% for Minority Business Enterprises and 12% for Women Business Enterprises.**

Security Sensitive Information (SSI) clearance is not required for firms who desire to attend the Pre-Submittal Matchmaking Session. SSI clearance is required for all subcontractors, suppliers, consultants, and other third parties to obtain access to the RFQ/P package, attend Pre-Submittal Conference, attend Pre-Proposal Conference/Site tour, and participate on the Contract. To request SSI clearance, please review the instructions found in the "Invitation to Propose" and "Third-Party Non-Disclosure Agreement (NDA)" documents. The "Third-Party NDA" is due on November 7, 2017. All documents may be downloaded from BART's website by going to the following link: <http://www.bart.gov/about/business/procurement/contractsout>.

Should you have any questions regarding BART's Disadvantaged Business Enterprise Program or Non-Discrimination Program for Subcontracting, please contact Aileen Hernandez, Senior Analyst, at (510) 464-6564 or ghernan@bart.gov. For questions related to procurement, please contact Irene Gray, Contract Administrator, at (510) 464-6390 or igray@bart.gov.

**To RSVP for the Pre-Submittal Matchmaking Session and obtain a copy of the
"Company Profile Form,"
please contact Lupe Serrano at lupe@llusterassociates.com or call (510) 303-7587.**
